Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program Description Form

University Name: Babylon University

Faculty/Institute: College of engineering

Scientific Department: Department of Biomedical Engineering

Academic or Professional Program Name: Academic program

Final Certificate Name: Bachelor's degree in Biomedical Engineering

Academic System: ABET

Description Preparation Date: 2024/4/7

File Completion Date: 2024/4/1

Signature:

Head of Department Name: Dr. Fawaz F.
Al Bakri

Date: 14/4/2024

Signature:

Scientific Associate Name:

Dr. Ali H. Nahab

Date:

14/4/2024

Approval of the Dean

1. Program Vision

The vision of the Department of Biomedical Engineering is to create an innovative, interdisciplinary academic program that emphasizes the fundamentals of biomedical engineering; state of the art applications pertaining to biomedical instrumentation, biomechanics, biomaterials, biotechnology, biocomputing and other healthcare related areas in an environment of life-long learning and research.

2. Program Mission

The mission of the Department of Biomedical Engineering is to provide a student-centered environment that facilitates a culture of inter-disciplinary learning and innovation, while encouraging active participation in scholarly and professional activities to serve the biomedical engineering profession and society, while advancing regional economic development.

3. Program Objectives

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

4. Program Accreditation

Accreditation Board for Engineering and Technology (ABET)

5. Other external influences

There are no sponsor.

6. Program Structure

| Program Structure | Number of Courses | Credit hours | Percentage | Reviews* |
|--------------------------|-------------------|--------------|------------|----------|
| Institution Requirements | 9 | 15 | 8.621% | - |
| College Requirements | 7 | 13 | 7.471% | - |

| | | | | |
|--------------------------------|----------|-----|---------|---|
| Department Requirements | 60 | 146 | 83.908% | - |
| Summer Training | 1 | - | - | - |
| Other | Workshop | - | - | - |

* This can include notes whether the course is basic or optional.

| 7. Program Description | | | | |
|-------------------------------|--------------------|--------------------------|---------------------|------------------|

| Fifth /second semester | MDER526 | Biomedical Sensors | 2 | 0 |
| Fifth /second semester | MDER527 | Project II | 0 | 4 |

8. Expected learning outcomes of the program

| Knowledge | |
|--|---|
| Learn about electronic devices and how to maintain them | Learn about the concept of biomedical engineering and study and understand prosthetic limbs. |
| Skills | |
| The skills goals special to the programme . | The student's knowledge of the concept of electronic circuit. |
| | The student's ability to analyze the medical device circuit and systems. |
| Ethics | |
| Teacher-student relationships: Trust, respect, and fairness should underpin every interaction. Ethical considerations guide teachers in fostering safe and supportive learning environments where students feel heard and valued. | Honesty: is a very important trait to have in Education. Honesty means being loyal, truthful, trustworthy, sincere, and fair. It is admirable in several cultures and religions. |
| Conflict of Interest ethic in Education is a condition in which your main responsibility to a student is negotiated by engaging priorities. Conflicts of Interest can display in a variety of contexts and for several various reasons | Responsibility: Along with all the ethics, responsibility is also one of the vital ethics in Education. The student's responsibility takes place when students take an energetic part in their studying by acknowledging they are responsible for their academic success. |

9. Teaching and Learning Strategies

1- VERBAL COMMUNICATION

Student able to express his ideas clearly and confidently in speech:

- Verbal communication.
- Able to Express ideas clearly and confidence at talk.

2- TEAMWORK

Work confidently within a group:

- Teamwork

- The work in confidence within a group

3- ANALYSING & INVESTIGATING

Gather information systematically to establish facts & principles. Problem solving:

- Analysis and investigation.

- Collect information systematically and scientifically to establish facts and principles for a solution to a problem.

4- INITIATIVE/SELF MOTIVATION

Able to act on initiative, identify opportunities & proactive in putting forward ideas & solutions:

- Initiative.

- Motivation to work and the ability to take initiative, identify opportunities and develop ideas and solutions.

5- WRITTEN COMMUNICATION

10. Evaluation methods

1- Exams

2- Project discussion

3- summer training

4- Practical exams

11. Faculty

Faculty Members

| Academic Rank | Specialization | | Special Requirements/Skills (if applicable) | | Number of the teaching staff | |
|---------------|----------------|---------|---|---|------------------------------|----------|
| | General | Special | | | Staff | Lecturer |
| | 20 | 7 | - | - | 27 | 10 |

Professional Development

Mentoring new faculty members

Successful mentoring relationships go through four phases: preparation, negotiating, enabling growth, and closure. These sequential phases build on each other and vary in length. In each phase, there are specific steps and strategies that lead to mentoring excellence.

Professional development of faculty members

The Biomedical Engineering curriculum emphasizes the continuous integration of classical and modern engineering principles with the life sciences and health care. Biomedical Engineers apply these skills to innovation in the health care industry, basic biological sciences, and the underpinning of medical practice.

Consistent with the mission of Babylon University and the College of Engineering, the Bachelor of Science program in Biomedical Engineering aims to create world-class engineers who will, after graduation, contribute to social and economic development through the application of engineering to the solution of problems in medicine and biology.

12. Acceptance Criterion

central

13. The most important sources of information about the program

College and University website
University Guide
The most important books and resources for the department

14. Program Development Plan

The academic program is developed annually through an annual update of academic curricula and vocabulary that keeps pace with the scientific development taking place in the medical and electronic fields and that is compatible with the needs of the labor market.

Course Description Form

| | |
|---|--|
| 1. Course Name: | |
| Cell Biology | |
| 2. Course Code: | |
| MDER213 | |
| 3. Semester / Year: | |
| 1 st semester / 2 nd year | |
| 4. Description Preparation Date: | |
| April, 3, 2024 | |
| 5. Available Attendance Forms: | |
| In class | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | |
| Theory : 2 Hrs Units : 2 | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Dr. Ashwaq Mokhief Salmman Email: m.ash_aljbouri@yahoo.com | |
| 8. Course Objectives | |
| <p>Course Objectives</p> | <ol style="list-style-type: none"> 1. To introduce the fundamental principles of cell biology, including the organization of cells, their structure, and their function. 2. To provide an understanding of the biochemical pathways that occur within cells, including metabolism, protein synthesis . 3. To introduce the principles of cell division, including mitosis and meiosis, and how these processes contribute to the growth and development of organisms. 4. To provide an understanding of the structure and function of cellular organelles such as the nucleus, mitochondria, endoplasmic reticulum, and Golgi apparatus. 5. To introduce the principles of cellular communication, including the role of signaling molecules, receptors, and second messengers in cell signaling. 6. Overall, the module aims to provide students with a strong foundation in cell biology, and to develop their understanding of the complex interactions that occur within cells. It also aims to provide students |

with an understanding of the fundamental processes that drive cell growth, division, and differentiation.

9. Teaching and Learning Strategies

Strategy

- Attend lectures and take detailed notes: Cell Biology is a complex subject, and attending lectures regularly and taking thorough notes is important to ensure that you don't miss any important information..
- Use visual aids: Cellular structures and processes can be complex and difficult to visualize. Using visual aids like diagrams, animations, and videos can help you understand and remember the material better.
- Focus on understanding the concepts: Cell Biology involves a lot of complex concepts, and memorization alone is not sufficient. Focus on understanding the concepts and how they relate to one another.
- Participate in discussions: Participating in class discussions and asking questions can help you understand the material better and stay engaged with the course.
- Use study guides and practice quizzes: Use study guides and practice quizzes to test the knowledge and identify areas where need to focus the studying.
- Collaborate with classmates: Working with other students can be an effective way to learn the material. Collaborate on problem sets, organize study groups, and help each other.
- Practice: Cell Biology involves a lot of memorization, so make sure to practice regularly.
- This will help become more confident in abilities and improve the understanding of cellular structures and processes over time
-

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|---|---|------------------------------|---|
| 1 | 2 | Introduction to the cell, theories of cell | Introduction to the cell, theories of cell | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Understand the types of cells. | types of cells | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Understand the prokaryotes, eukaryotes cells , cell shapes, cell size | Quiz One + prokaryotes, eukaryotes cells , cell shapes, cell size | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Understand The viruses | The viruses | Theory, discussions, quizzes | Final and Mid term exams, home works, |

| | | | | | |
|----|---|---|---|------------------------------|---|
| | | | | | and quizzes |
| 5 | 2 | Understand the the nucleus, cilia and flagella | the nucleus, cilia and flagella | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Understand the the plasma membrane | the plasma membrane | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Understand the Cytosol, Organelles , Cytoplasm | Cytosol, Organelles , Cytoplasm | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Understand the cytoplasmic inclusions | Mid-term Exam + cytoplasmic inclusions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Understand the cytoskeleton, centrosome | cytoskeleton, centrosome | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Understand the cell division;somatic cells division, reproductive cell division | cell division;somatic cells division, reproductive cell division | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Understand the ribosomes, lysosomes, peroxisomes | ribosomes, lysosomes, peroxisomes | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Understand the endoplasmic reticulum, mitochondria, the golgi apparatus | Quiz Three + the endoplasmic reticulum, mitochondria, the golgi apparatus | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | Understand the protein synthesis. | protein synthesis. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Understand the cell junction | cell junction | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | - | Preparatory week before the final Exam | Theory, discussions, quizzes | Final and Mid term exams, home works, |

| | | | | | |

| 8. Course Objectives | |
| Course Objectives | <p>1- Fundamental IT Knowledge: Understand the basic concepts, principles, and components of information technology. Gain knowledge of computer hardware, software, networks, and data management.</p> <p>2- Programming Skills: Learn operating system such as MS_DOS and WINDOWS and learn about programming languages relevant to the course, such as Matlab programming.</p> <p>3- Networking Concepts: Learn the basics of computer networks and protocols. Understand network architecture, security, and troubleshooting.</p> <p>Information Security: Understand the principles of information security. Learn about common security threats, encryption, and best practices for securing data and systems.</p> <p>Emerging Technologies:</p> |

| | |
|--|--|
| | <p>Stay updated on current trends and emerging technologies in the IT field. Explore topics like artificial intelligence, machine learning, cloud computing, and the Internet of Things (IoT).</p> <p>Professional Communication: Enhance written and verbal communication skills, especially in the context of conveying technical information to non-technical stakeholders.</p> |
|--|--|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | This course prepares students for a career in information technology by providing them with a comprehensive set of skills and knowledge relevant to the field. |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|-------------|--------------|-----------------------------------|--|------------------------|--------------------------|
| 1 | 3 | | Introduction to Information technology | Theory & Practical | |
| 2 | 3 | | Basic concept of Information technology | Theory & Practical | |
| 3 | 3 | | Computer Hardwar (theoretical and practical) | Theory & Practical | |
| 4 | 3 | | Computer software (theoretical and practical) | Theory & Practical | |

| | | | | | |
|----|---|--|-------------------------------|--------------------|--|
| 5 | 3 | | Digital Domain | Theory & Practical | |
| 6 | 3 | | Digital Domain | Theory & Practical | |
| 7 | 3 | | Logic Gates | Theory & Practical | |
| 8 | 3 | | 1 Mid Exam | Theory & Practical | |
| 9 | 3 | | Fundamentals of Communication | Theory & Practical | |
| 10 | 3 | | Networking | Theory & Practical | |
| 11 | 3 | | Local Area Network | Theory & Practical | |

| | | | | | |
|----|---|--|-------------------------|--------------------|--|
| 12 | 3 | | Wide Area Network | Theory & Practical | |
| 13 | 3 | | Wireless Communication | Theory & Practical | |
| 14 | 3 | | Communication protocols | Theory & Practical | |
| 15 | 3 | | 2 Mid Exam | | |

| | | | | | |
|--|--|--|--|--|--|
| | | | | | |
| 11. Course Evaluation | | | | | |
| Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc | | | | | |
| 12. Learning and Teaching Resources | | | | | |
| Required textbooks (curricular books, if any) | | | | | |
| Main references (sources) | | | | | |
| Recommended books and references (scientific journals, reports...) | | | | | |
| Electronic References, Websites | | | | | |

Course Description Form

| | |
|--|--|
| 1. Course Name: | |
| Mathematics III | |
| 2. Course Code: | |
| MATH210 | |
| 3. Semester / Year: | |
| 1 st semester / 2 nd year | |
| 4. Description Preparation Date: | |
| April, 3, 2024 | |
| 5. Available Attendance Forms: | |
| In class | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | |
| Theory : 2 Hrs ,1 Tut Units : 2 | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Mr. Ali Talib Jawad Email: eng.ali.talib@uobabylon.edu.iq | |
| 8. Course Objectives | |
| <p>Course Objectives</p> | <ol style="list-style-type: none"> 1. Memorize change of coordinate formulae between rectangular, cylindrical, and spherical coordinate systems. 2. Convert equations between rectangular, cylindrical and spherical coordinate systems. 3. Perform geometric operations on vectors: addition, subtraction, multiplication by a scalar, dot product, and cross product. 4. Memorize formulae for length and direction of vector. 5. Compute dot and cross products given either algebraic or geometric information. 6. Memorize formulae for parametric equation of a line in space and explain geometrical and physical interpretations 7. Given information in a variety of ways, find the critical information needed to write the equation of a plane; namely, a point and a normal vector. |

| | |
|--|--|
| | <ol style="list-style-type: none"> 8. Solve geometric problems involving vectors. 9. Prove basic algebraic properties of vectors. 10. Gain deeper knowledge of multivariate differentiation operations such as Gradient, Divergent and Curl, and Jacobians. 11. Calculate first and second partial derivatives. 12. Compute double and triple integrals. 13. Recognize 1st order equations that can be solved by each of the three methods: separation of variables, linear equations, and exact equations, and use the appropriate method to solve them. 14. Use ∇-first-order differential equation as a mathematical model in some engineering applications. 15. Solve linear and nonlinear higher-order differential equations as well as systems of linear first-order differential equations. 16. Solve first-order differential equation numerically.. |
|--|--|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | <ul style="list-style-type: none"> • In this classroom, active learning techniques are employed and the focus is placed on more challenging problems. Teams work together in class to come up with a result and explain why it makes sense to use a more formal writing style. Outside of class, students individually practice problem-solving skills. |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|--|---|------------------------------|---|
| 1 | 2 | Understand the 3-D system coordinates: Cartesian, Cylindrical, and Spherical Coordinates, distance between two points in space, equation of sphere in space. | Integration Problems Using Basic Integration Formulas | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Understand the Vectors form, vector algebra operations, unit vector, and vector applications. | Integration Problems Using by Parts Method | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Understand the Dot product , cross product, and triple scalar or box product . | Integration Problems Using Trigonometric Integral Method | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|--|--|------------------------------|---|
| 4 | 2 | Understand the Lines in space and planes in space. | Integration Problems Using Integration by Trigonometric Substitutions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Understand the Del and Curl operators, First order partial differentiation, Second order partial differentiation, and Jacobians. | Integration Problems Using Integration by Partial Fractions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Understand the Multiple integrals, double integrals, and triple integrals. | Improper Integrals. Convergence and Divergence Theorem | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Mid-term Exam, Introduction to Differential Equations. | Mid-term Exam, Basic fundamentals of Sequences and Series. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Understand the First-Order Differential Equations, separable variables equations, linear equations, and exact equations. | Sequences, Convergence and Divergence of Sequences, Bounded Monotonic Sequences, Infinite Series, Geometric Series | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Understand Modeling with First-Order Differential Equations: Linear Models and Nonlinear Models. | Power Series, Infinite Taylor Series, Infinite Maclaurin Series | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Understand the Modeling with First-Order Differential Equations: Modeling with Systems of First-Order DEs. | Matrices, Determinants, Definition of Matrix, Properties, Special Matrices | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Understand the Higher-Order Differential Equations, Homogeneous and Nonhomogeneous Equations. | Matrix Algebra, Definition of Determinant, Properties, Cofactors and Cominors | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Understand the Modeling with Higher-Order Differential Equations: Linear Models and Nonlinear Models. | Evaluation of determinants, Inverse of Matrix | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|---|---|------------------------------|---|
| 13 | 2 | Understand the Systems of Linear First-Order Differential Equations, Homogeneous Linear Systems. | Solving systems of linear equations using Matrices (1). | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Understand the Systems of Linear First-Order Differential Equations, Nonhomogeneous Linear Systems. | Solving systems of linear equations using Matrices (2). | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | Understand the Numerical Solutions of Ordinary Differential Equations. | Application of Matrices in Engineering. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following: mid-term exam 30 % , daily evaluation 10%, and final exam. 60 %

12. Learning and teaching Resources

| | |
|---|--|
| Required textbooks (curricular books, if any) | 1 .University Calculus Early Transcendentals Fourth Edition in SI Units, 2020. 2. “A First Course in Differential Equations with Modeling Applications, Eleventh Edition”, Dennis G. Zill, 2018. |
| Recommended books | 1“ .Classical Vector Algebra”, Vladimir Lepetic, 2023 2. A First Course in Differential Equations, Modeling, and Simulation Second Edition. Carlos A. Smith and Scott W. Campbell, 2016. |
| websites | https://www.amazon.com/University-Calculus-Early-Transcendentals-Units/dp/1292317302 https://www.amazon.com/Course-Differential-Equations-Modeling-Applications/dp/1305965728 |

Course Description Form

| | |
|---|---|
| 1. Course Name: Engineering Mechanics I | |
| 2. Course Code: BMER210 | |
| 3. Semester/first / Year: 2023-2024 | |
| 4. Description Preparation Date: 24/12/2023 | |
| 5. Available Attendance Forms: Presence | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: <div style="border: 1px solid black; padding: 2px; display: inline-block;">Ali Sadik Gafer Qanber</div> | |
| Email: <div style="border: 1px solid black; padding: 2px; display: inline-block;">ali.sadigj@uobabylon.edu.iq</div> | |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none">1. To understand the principles and concepts of mechanics, including force systems, equilibrium, and motion.2. To develop the ability to analyze two and three-dimensional systems and apply appropriate mathematical techniques.3. To apply the principles of force systems to solve problems involving moments, couples, and resultants.4. To construct and interpret free-body diagrams to analyze equilibrium conditions in two dimensions.5. To gain proficiency in analyzing and evaluating the behavior of structures, such as plane trusses and frames. |

| | |
|--|--|
| | <p>6. To apply the principles of friction to solve problems related to forces and frictional interactions.</p> <p>7. To understand the concept of center of mass and its application in analyzing systems with distributed forces.</p> |
|--|--|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | <p>Lectures: Traditional lectures can be used to introduce new concepts, explain theoretical principles, and provide a foundation for understanding the course material. Instructors can use multimedia presentations, demonstrations, and real-life examples to enhance the learning experience.</p> <p>Problem-Based Learning: Encourage students to actively engage with the course material by presenting them with real-world problems or case studies that require the application of the concepts they have learned. This approach fosters critical thinking and problem-solving skills.</p> <p>Interactive Discussions: Engage students in class discussions to promote deeper understanding and critical thinking. Encourage them to ask questions, share their perspectives, and engage in collaborative problem-solving activities. This strategy allows students to learn from each other and develop their communication skills.</p> <p>Hands-on Activities and Experiments: Incorporate practical activities, laboratory experiments, or simulations to provide students with a hands-on experience and reinforce theoretical concepts. This approach helps students develop a better understanding of the subject matter through direct engagement and observation.</p> <p>Group Projects: Assign group projects or assignments that require students to work collaboratively to solve complex problems or design engineering solutions. This strategy promotes teamwork, communication, and enhances problem-solving skills.</p> <p>Use of Technology: Integrate technology tools and resources such as interactive simulations, virtual laboratories, online resources, and educational software to enhance learning. These tools can provide visual representations, interactive exercises, and immediate feedback to facilitate understanding and engagement.</p> <p>Assessments: Use a variety of assessment methods, including quizzes, assignments, exams, and project presentations, to evaluate students' understanding of the material. Provide timely and constructive feedback to help students identify areas for improvement.</p> |
|-----------------|--|

Real-World Applications: Relate the course material to real-world applications and examples. This helps students understand the practical relevance of the concepts being taught and enhances their motivation and engagement.

Active Learning Strategies: Encourage active learning through activities such as problem-solving exercises, group discussions, role-playing, concept mapping, and peer teaching. These strategies promote deeper engagement with the material and enhance retention and understanding.

Office Hours and One-on-One Support: Provide opportunities for individualized support and clarification through office hours or virtual consultations. This allows students to seek assistance with specific questions or difficulties they may encounter.

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|-------------|--------------|---|--|------------------------|---|
| 1 | 3 | 1. Understand the fundamental concepts of forces, including vector representation and the analysis of two-dimensional force systems. 2. Demonstrate proficiency in calculating moments, couples, and the resultant forces in a system. 3. Apply the conditions for equilibrium to solve statics problems in two dimensions. 4. Construct free-body diagrams and use them to analyze forces | Introduction into Two and Three Dimensional Systems, | Presence | Attending 5 + Quiz 5 + midterm exam 30 + final exam 60 = 100 |
| 2 | 3 | | Force Systems: Two-Dimensional Force System. | Presence | |
| 3 | 3 | | Moment, | Presence | |
| 4 | 3 | | Couple. | Presence | |
| 5 | 3 | | Resultants, | Presence | |
| 6 | 3 | | Equilibrium. | Presence | |
| 7 | 3 | | Free-body Diagrams, | Presence | |
| 8 | 3 | | Equilibrium | Presence | |
| 9 | 3 | | Conditions: Two-dimensions. | Presence | |
| 10 | 3 | | Structures: Plane Trusses, | Presence | |

| | | | | | |
|----|---|---|---|----------|--|
| 11 | 3 | acting on objects in equilibrium. | Frames. | Presence | |
| 12 | 3 | 5. Analyze structures such as trusses and frames to determine their stability and internal forces. | Fluid Static, Friction, Application of Friction: Belts. | Presence | |
| 13 | 3 | | | Presence | |
| 14 | 3 | | Distributed Forces, | Presence | |
| 15 | 3 | 6. Apply principles of friction to solve problems involving systems with belts. | Center of Mass. | Presence | |
| | | 7- Calculate the center of mass for objects and understand its significance in equilibrium and motion analysis. | | | |

11 Course Evaluation

Attending 5 + Quiz 5 + midterm exam 30 + final exam
60 = 100

| لغة العربية | |
| ٢. رمز المقرر : | |
| UREQ211 | |
| ٣. الفصل / السنة : | |
| الفصل الأول / المرحلة الثانية | |
| ٤. تاريخ إعداد هذا الوصف | |
| 2024/4/3 | |
| ٥. أشكال الحضور المتاحة | |
| ٦. عدد الساعات الدراسية (الكلية / عدد الوحدات (الكلية) | |
| نظري : 1 ساعة عدد الوحدات : 1 | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم : م.م. هبة اليمينيل : | |
| ٨. اهداف المقرر | |
| اهداف المادة الدراسية | <p>١- تقوية القدرة اللغوية لدى الطلبة واكسابهم مهارة التعبير الصحيح. 2- تقوية ملكة الطلبة الدبية لتذوق وادراك مواطن الجمال فيها . 3- تنمية قدرة الطلبة على فهم المادة المقروءة وتنمية مهاراتهم الخطية والمالئية لغرض الكتابة الصحيحة باستعمال عالمات الترقيم . 4- مساعدة الطلبة على التعبير الصحيح وضبط اساليبيهم 5- اكتساب الطلبة قدرات نحوية تمكنهم من تقويم السننهم عند القراءة .</p> |

| | |
|--|--|
| <p>تنمية الثروة اللغوية للطلبة وتزويدهم بكثير من اللفاظ بفضل ما يعرض عليهم من امثلة واساليب . 7-</p> <p>تدريب الطلبة على حسن الداء وجودة اللقاء . 8-</p> <p>الربط بين مواد اللغة العربية بجميع فروعها .</p> <p>9- التعرف على مواطن الضعف عند الطلبة في رسم الكلمات والعمل على معالجتها</p> <p>10- تنمية الذوق الفني لدى الطلبة بما يطلعون عليه من نماذج وما يمارسونه من كتابات .</p> | |
|--|--|

٩. استراتيجيات التعليم والتعلم

| | |
|---|--|
| <p>الاستراتيجية</p> <p>• 1- اتباع اسلوب التدريس الحديث لدروس اللغة العربية للقضاء على صعوبة وجمود بعض مواضيع هذه الدروس ,وإيصال الفكرة والمعلومة للطلبة بطرق مفهومة كالحوار المباشر بين التدريسي والطلبة وبالتالي تحفيزهم على التفكير من خلال طرح الأسئلة التفاعلية من قبل التدريسي . و ثم اتاحة فرصة النقاش بين الطلبة انفسهم لاستفادة من محتوى الموضوع ,وتشجيع الطلبة على التعاون وزيادة اهتمامهم تجاه المواضيع المختلفة وتنمية البداع لديهم.</p> <p>• 2-امكانية استخدام التكنولوجيا والطرق الحديثة بالتدريس كاستخدام البور بوينت بالصوت والصور لتميز المعلومات.</p> <p>• 3-تكليف الطلبة بإعداد بحوث وتقارير بشكل فردي او على شكل مجموعات للتعبير عن مواهبهم والوقوف على الأخطاء التي تم ارتكابها وبالتالي يستفاد الطالب من هذه الأخطاء وتصحيحها لترسخ في اذهانهم .</p> | |
|---|--|

| 8. Course Objectives | | | | | |
| Course Objectives | | | <ol style="list-style-type: none"> 1. Introduce the fundamental principles of electromagnetism, including electric fields, magnetic fields, and electromagnetic waves. 2. Provide students with the knowledge and skills necessary to understand and apply these principles in engineering and physics. 3. Develop students' problem-solving skills in electromagnetics. 4. Prepare students for further study in electromagnetics and related fields | | |
| 9. Teaching and Learning Strategies | | | | | |
| Strategy | | <ul style="list-style-type: none"> • Learning Technologies on Campus using Whiteboard and TV monitor. • Hand out lecture notes. • Video lectures on YouTube and google classroom. | | | |
| 10. Course Structure | | | | | |
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
| 1 | 2 | Understand the vectors and Cartesian | Vector algebra, Cartesian coordinates, Dot and | Theory, discussions, | Final and Mid term exams, |

| | | | | | |
|---|---|---|--|------------------------------|---|
| | | coordinates, dot and cross product Cylindrical and Spherical coordinate systems, differential and Integral elements | Cross product, Cylindrical and Spherical coordinate systems, differential and Integral elements | quizzes | home works, and quizzes |
| 2 | 2 | Understand the Coulombs law and Electric Field Intensity, Charge distribution, Line, Surface and Volume charge distributions, Fields of infinite line charge and infinite sheet charge. | Coulombs law and Electric Field Intensity, Charge distribution, Line, Surface and Volume charge distributions, Fields of infinite line charge and infinite sheet charge. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Understand the Electric flux , Electric flux density, Gauss's Law, Divergence, Maxwell 's first equation, The vector operator , Gauss's Divergence theorem | Electric flux , Electric flux density, Gauss's Law, Divergence, Maxwell 's first equation, The vector operator , Gauss's Divergence theorem | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Understand the Energy and Potential , Definition of potential, Gradient, equipotential, and Dipole | Energy and Potential , Definition of potential, Gradient, equipotential, and Dipole | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Understand the Conductors & dielectric, energy gap, conductivity, current, current density and boundary conditions | Conductors & dielectric, energy gap, conductivity, current, current density and boundary conditions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Understand the Capacitance, Poisson and Laplace equations, solution of one variable | Capacitance, Poisson and Laplace equations, solution of one variable | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Understand the Magnetostatics: The steady Magnetic Fields produced by moving charges, Biot-Savart law, magnetic field, Ampère's law, curl, stocks theorems magnetic potential | Magnetostatics: The steady Magnetic Fields produced by moving charges, Biot-Savart law, magnetic field, Ampère's law, curl, stocks theorems magnetic potential | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Understand the Maxwell's equations: A set of four equations that describe the behavior of electric and magnetic fields, force and torque on closed circuit, force on moving charge | Maxwell's equations: A set of four equations that describe the behavior of electric and magnetic fields, force and torque on closed circuit, force on moving charge | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | - | Mid-term Exam + Time varying fields, Faraday | Theory, discussions, | Final and Mid term exams, |

| | | | | | |
|----|---|---|--|------------------------------|---|
| | | | law, displacement current | quizzes | home works, and quizzes |
| 10 | 2 | Understand the Electromotive force (EMF) and Faraday's law of electromagnetic induction Lenz's law and the concept of self-inductance Induced electric fields and Maxwell's displacement current | Electromotive force (EMF) and Faraday's law of electromagnetic induction Lenz's law and the concept of self-inductance Induced electric fields and Maxwell's displacement current | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Understand the Electromagnetic Waves (EMW)and Waveguides, properties of EMW (wavelength, frequency, velocity, etc.). Reflection, refraction, and transmission of EMW. Wave polarization and the polarization of light, Antennas and Radiating Systems: Basic antenna principles and radiation patterns. Different types of antennas (dipole, Yagi-Uda, etc.). | Electromagnetic Waves (EMW)and Waveguides, properties of EMW (wavelength, frequency, velocity, etc.). Reflection, refraction, and transmission of EMW. Wave polarization and the polarization of light, Antennas and Radiating Systems: Basic antenna principles and radiation patterns. Different types of antennas (dipole, Yagi-Uda, etc.). | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Understand the Antenna arrays and their characteristics. Antenna gain, directivity, and efficiency. Radio wave propagation and link budget analysis | Antenna arrays and their characteristics. Antenna gain, directivity, and efficiency. Radio wave propagation and link budget analysis | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | Understand the Electromagnetic Interference (EMI)and Compatibility, EMI sources and types of. EMI coupling mechanisms (conduction, radiation, etc.). EMI mitigation techniques and shielding methods, field simulation and modeling techniques, Applications of Electromagnetic Fields (EMF) | Electromagnetic Interference (EMI)and Compatibility, EMI sources and types of. EMI coupling mechanisms (conduction, radiation, etc.). EMI mitigation techniques and shielding methods, field simulation and modeling techniques, Applications of Electromagnetic Fields (EMF) | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Understand the Applications EMF: EM sensors and their applications. EMF in wireless communication | Applications EMF: EM sensors and their applications. EMF in wireless communication systems, EM | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|--|---|------------------------------|---|
| | | systems, EM compatibility in electronic systems | compatibility in electronic systems | | |
| 15 | 2 | Understand the Applications of EMF: EM imaging techniques (MRI, NMR, etc.) | Applications of EMF: EM imaging techniques (MRI, NMR, etc.) | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following: mid-term exam 30 % , daily evaluation 10%, and final exam. 60 %

12. Learning and teaching Resources

| | |
|---|---|
| Required textbooks (curricular books, if any) | "Engineering Electromagnetics" by William H. Hayt Jr. and John A. Buck. This is a widely used textbook that provides a comprehensive introduction to electromagnetic theory and its applications. It covers both fundamental concepts and advanced topics. |
| Recommended books | 1. "Electromagnetic Fields and Waves" by Paul Lorrain, Dale R. Corson, and François Lorrain. This textbook provides an introduction to electromagnetic theory and covers a variety of applications. It includes practical examples and exercises to enhance understanding. 2. "Field and Wave Electromagnetics" by David K. Cheng. This book provides a comprehensive treatment of electromagnetic theory, including both classical and modern applications. It covers topics such as transmission lines, waveguides, and antennas |

| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Mr. Ali Talib Jawad Email: eng.ali.talib@uobabylon.edu.iq | |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none"> 1. Memorize change of coordinate formulae between rectangular, cylindrical, and spherical coordinate systems. 2. Convert equations between rectangular, cylindrical and spherical coordinate systems. 3. Perform geometric operations on vectors: addition, subtraction, multiplication by a scalar, dot product, and cross product. 4. Memorize formulae for length and direction of vector. 5. Compute dot and cross products given either algebraic or geometric information. 6. Memorize formulae for parametric equation of a line in space and explain geometrical and physical interpretations 7. Given information in a variety of ways, find the critical information needed to write the equation of a plane; namely, a point and a normal vector. |

| | |
|--|--|
| | <ol style="list-style-type: none"> 8. Solve geometric problems involving vectors. 9. Prove basic algebraic properties of vectors. 10. Gain deeper knowledge of multivariate differentiation operations such as Gradient, Divergent and Curl, and Jacobians. 11. Calculate first and second partial derivatives. 12. Compute double and triple integrals. 13. Recognize 1st order equations that can be solved by each of the three methods: separation of variables, linear equations, and exact equations, and use the appropriate method to solve them. 14. Use ∇-first-order differential equation as a mathematical model in some engineering applications. 15. Solve linear and nonlinear higher-order differential equations as well as systems of linear first-order differential equations. 16. Solve first-order differential equation numerically.. |
|--|--|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | <ul style="list-style-type: none"> • In this classroom, active learning techniques are employed and the focus is placed on more challenging problems. Teams work together in class to come up with a result and explain why it makes sense to use a more formal writing style. Outside of class, students individually practice problem-solving skills. |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|--|---|------------------------------|---|
| 1 | 2 | Understand the 3-D system coordinates: Cartesian, Cylindrical, and Spherical Coordinates, distance between two points in space, equation of sphere in space. | 3-D system coordinates: Cartesian, Cylindrical, and Spherical Coordinates, distance between two points in space, equation of sphere in space. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Understand the Vectors form, vector algebra operations, unit vector, and vector applications. | Vectors form, vector algebra operations, unit vector, and vector applications. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Understand the Dot product , cross product, and triple scalar or box product . | Dot product , cross product, and triple scalar or box product. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|--|---|------------------------------|---|
| 4 | 2 | Understand the Lines in space and planes in space. | Lines in space and planes in space. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Understand the Del and Curl operators, First order partial differentiation, Second order partial differentiation, and Jacobians. | Del and Curl operators, First order partial differentiation, Second order partial differentiation, and Jacobians. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Understand the Multiple integrals, double integrals, and triple integrals. | Multiple integrals, double integrals, and triple integrals. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Mid-term Exam, Introduction to Differential Equations. | Mid-term Exam, Introduction to Differential Equations. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Understand the First-Order Differential Equations, separable variables equations, linear equations, and exact equations. | First-Order Differential Equations, separable variables equations, linear equations, and exact equations. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Understand Modeling with First-Order Differential Equations: Linear Models and Nonlinear Models. | Modeling with First-Order Differential Equations: Linear Models and Nonlinear Models. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Understand the Modeling with First-Order Differential Equations: Modeling with Systems of First-Order DEs. | Modeling with First-Order Differential Equations: Modeling with Systems of First-Order DEs. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Understand the Higher-Order Differential Equations, Homogeneous and Nonhomogeneous Equations. | Higher-Order Differential Equations, Homogeneous and Nonhomogeneous Equations. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Understand the Modeling with Higher-Order Differential Equations: Linear Models and Nonlinear Models. | Modeling with Higher-Order Differential Equations: Linear Models and Nonlinear Models. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | Understand the Systems of Linear First-Order Differential Equations, Homogeneous Linear Systems. | Systems of Linear First-Order Differential Equations, Homogeneous Linear Systems. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|---|--|------------------------------|---|
| 14 | 2 | Understand the Systems of Linear First-Order Differential Equations, Nonhomogeneous Linear Systems. | Systems of Linear First-Order Differential Equations, Nonhomogeneous Linear Systems. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | Understand the Numerical Solutions of Ordinary Differential Equations. | Numerical Solutions of Ordinary Differential Equations. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following: mid-term exam 30 % , daily evaluation 10%, and final exam. 60 %

| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none"> 1. To understand the composition and functions of different body fluids, including blood, plasma, interstitial fluid, and intracellular fluid. 2. To identify and describe the various fluid compartments in the body, including the intracellular and extracellular compartments, and understand how fluid distribution is regulated. 3. To comprehend the mechanisms involved in maintaining water balance in the body, including water absorption, reabsorption, and excretion, as well as the role of hormones such as antidiuretic hormone (ADH). 4. To gain knowledge of electrolyte balance and its importance for various physiological processes, including the regulation of ions such as sodium, potassium, calcium, and chloride, and the mechanisms involved in maintaining electrolyte homeostasis. 5. To acquire a comprehensive understanding of red blood cells (RBCs), including their structure, function, production through erythropoiesis, and an understanding of conditions such as anemia and polycythemia. 6. To explore the role of white blood cells (WBCs) in the immune response, including the different types of WBCs, their functions, and their significance in defending against pathogens and diseases. 7. To develop knowledge of immunology, including the immune system's innate and adaptive responses, the role of immunoglobulins (antibodies) in specific defense mechanisms, and an understanding of different types of immunoglobulins (IgG, IgA, IgM, IgE, IgD). 8. To understand the structure and function of platelets, their role in blood clotting |

| | |
|--|---|
| | (hemostasis), and an awareness of disorders related to platelet function. |
|--|---|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | <ul style="list-style-type: none"> • Theory in class room. • Quizzes and seminars. |

| Name: dr alaa Imran al-muttairi E mail : al_al_44@uobabylon.edu.iq | |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none"> 1. To develop a deep understanding of Fourier series, Fourier transform, and Laplace transform, and their significance in engineering analysis. 2. To explore the concepts of periodic functions and their representation through Fourier series, enabling the analysis of periodic phenomena in engineering systems. 3. To investigate the properties and applications of Fourier series, including the determination of coefficients, identification of odd and even functions, and half-range expansion techniques. 4. To explore the properties and applications of the Fourier transform, including signal processing, spectral analysis, and filtering techniques in engineering applications. 5. To investigate the convolution and multiplication properties of functions in the Fourier domain, facilitating the understanding of signal processing operations and system behavior. 6. To introduce the Laplace transform and its applications in solving linear differential equations, providing a powerful mathematical tool for system analysis and control. <p>To understand the properties and applications of the Laplace</p> |

| | |
|--|--|
| | transform, including frequency-domain representation of engineering systems. To understand the inverse Laplace transform and its application in obtaining time-domain solutions from Laplace-domain representations, enabling the analysis and synthesis of engineering systems. |
|--|--|

9. Teaching and Learning Strategies

| | |
|-----------------|---|
| Strategy | The material is presented theoretically, followed by assigning students homework. Practical networking demonstrations are integrated into the lectures using Packet Tracer software. Additionally, students are tasked with conducting seminars on certain subjects and presenting them to their peers. |
|-----------------|---|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|--|--|-----------------|-------------------------|
| 1 | 3 | Understand fundamental mathematical techniques used in engineering analysis. Gain proficiency in applying mathematical methods to solve engineering problems. | Introduction to engineering analysis, Natural Signals, and Periodic Signals. | Classroom | Quiz and oral questions |
| 2 | 3 | Differentiate between natural (non-periodic) signals and periodic signals. Identify common examples of each type of signal in engineering applications. | Fourier series, Dirichlet Conditions and Trigonometric Fourier series form | Classroom | Quiz and oral questions |
| 3 | 3 | Understand the concept of representing periodic functions using Fourier series. Learn how to express periodic signals using trigonometric or exponential Fourier series forms. | Symmetry Conditions. | Classroom | Quiz and oral questions |
| 4 | 3 | Recognize the conditions under which a function can be accurately represented using a Fourier series. Apply Dirichlet conditions and symmetry conditions to determine the suitability of a function for Fourier series representation. | Exponential Fourier series form and Parssival's theorem for periodic function power. | Classroom | Quiz and oral questions |

| | | | | | |
|----|---|--|--|-----------|-------------------------|
| 5 | 3 | Apply Fourier series techniques to analyze electrical circuits. Understand how periodic signals are used to model and analyze circuit behavior. | Fourier Series applications in circuit analysis . | Classroom | Quiz and oral questions |
| 6 | 3 | Understand the concept of transforming signals from the time domain to the frequency domain. Learn how to use the Fourier transform to analyze non-periodic signals. | Fourier transform definition . | Classroom | Quiz and oral questions |
| 7 | 3 | Gain familiarity with key properties of the Fourier transform, such as linearity, time shifting, frequency shifting, and scaling. Apply these properties to simplify signal analysis and manipulation. | Properties of Fourier transform. | Classroom | Quiz and oral questions |
| 8 | 3 | Understand how convolution in the time domain corresponds to multiplication in the frequency domain. | Convolution property and inverse Fourier transform . | Classroom | Quiz and oral questions |
| 9 | 3 | Understand how frequency-domain analysis can provide insights into circuit performance and response. | Fourier transform on electrical circuits applications. | Classroom | Quiz and oral questions |
| 10 | 3 | Understand the definition of the Laplace transform. | Laplace transform definition, Laplace transform of special functions | Classroom | Quiz and oral questions |
| 11 | 3 | | Midterm Exam | | |
| 12 | 3 | Explore the properties of the Laplace transform. | Properties of Laplace Transform. | Classroom | Quiz and oral questions |

| | | | | | |
|----|---|--|--|-----------|-------------------------|
| 13 | 3 | Master the techniques for finding the inverse Laplace transform. | Inverse Laplace transform. | Classroom | Quiz and oral questions |
| 14 | 3 | Apply Laplace transform methods to analyze circuits. | Laplace transform applications to circuits | Classroom | Quiz and oral questions |
| 15 | 3 | Apply Laplace transform methods to analyze circuits. | Laplace transform applications to circuits | | |

| Name: | |
| Email: | |
| 8. Course Objectives | |
| <p>Course Objectives</p> | <ol style="list-style-type: none"> 1. To understand the anatomy and organization of the nervous system: Gain knowledge about the structure and function of nervous tissue, the organization of the central and peripheral nervous systems, and the roles of cranial and spinal nerves. 2. To explore the gross anatomy of the brain: Learn about the cerebral hemispheres, including the different lobes and their functions, as well as the composition and significance of gray and white matter within the hemispheres. 3. To study functional localization and key structures in the brain: Explore the concept of functional localization within the cerebrum, including the basal ganglia, limbic system, and diencephalon. Understand their roles in motor control, emotions, learning, and sensory processing. 4. To gain knowledge about the central nervous system and its support |

| | |
|--|---|
| | <p>structures: Study the ventricular system and cerebrospinal fluid (CSF), which play essential roles in protecting and nourishing the brain. Learn about the brainstem, cerebellum, and spinal cord, and their functions in vital processes such as respiration, coordination, and sensory transmission.</p> <p>5. To understand the anatomical features of the head and neck: Explore the anatomy of the skull, scalp, face, oral cavity, nasal cavity, and neck, including the nerves, blood vessels, and muscles associated with these regions. Gain knowledge about the lymphatic drainage, investigations, and blood supply of the CNS.</p> |
|--|---|

9. Teaching and Learning Strategies

| | |
|-----------------|---|
| Strategy | <ul style="list-style-type: none"> • Lectures: Conducting interactive lectures to introduce and explain the theoretical concepts and principles related to Fourier series, Fourier transform, Laplace transform, and their applications. The lectures should include visual aids, examples, and demonstrations to enhance understanding and engagement. • Problem-solving sessions: Organize regular problem-solving sessions where students can practice applying the concepts learned in lectures to solve engineering analysis problems. Provide guided exercises and real-world examples to reinforce their understanding and develop problem-solving skills. • Multimedia resources: Provide access to multimedia resources such as video tutorials, online simulations, and interactive animations that complement the lectures and allow students to explore concepts at their own pace. These resources can help reinforce learning and provide alternative explanations for complex topics. |
|-----------------|---|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|---|---|------------------------------|---|
| 1 | 2 | Understand the organization and structure of the nervous system, including cranial and spinal nerves. | Introduction: Nervous tissue and organization of the nervous system | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Understand the organization and structure of the nervous system, including cranial and spinal nerves. | Cranial nerves and spinal nerves | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|---|---|---|--|------------------------------|---|
| | | | | | |
| 3 | 2 | Describe the gross anatomy and functional localization of key structures in the cerebral hemisphere and brain. | Gross anatomy of the cerebral hemisphere and Gray and white matter of the hemisphere | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Explain the roles of basal ganglia, limbic system, diencephalon, brainstem, cerebellum, and spinal cord in motor control, emotions, coordination, and sensory processing. | Functional localization in the cerebrum, Basal ganglia , and Limbic system | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | study the ventricular system and cerebrospinal fluid (CSF), gaining insight into their roles in protecting and nourishing the brain | Diencephalon and CSF and ventricular system | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | explore the brainstem and cerebellum, understanding their contributions to vital processes such as coordination, motor control, and sensory transmission | Brain stem and Cerebellum | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | examine the structures and functions of the spinal cord and peripheral nerves, including their roles in transmitting signals throughout the body. | Spinal cord | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Meninges and dural venous sinuses | Meninges and dural venous sinuses | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | introduce investigations of the central nervous system (CNS), discussing | Blood supply of the CNS and Investigations of the CNS | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|---|---|------------------------------|---|
| | | various imaging techniques and their clinical applications | | | |
| 10 | 2 | The skull, The scalp and facial muscles and Nerves and vessels of the face | The skull, The scalp and facial muscles and Nerves and vessels of the face | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | The bony orbit and extraocular muscles, and Nerves and vessels of the orbit | The bony orbit and extraocular muscles, and Nerves and vessels of the orbit | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | The nasal cavity and The paranasal sinuses | The nasal cavity and The paranasal sinuses | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | The oral cavity and teeth and Hard and soft palate | The oral cavity and teeth and Hard and soft palate | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | The tongue, Salivary glands , and Muscles of mastication and the temporomandibular joint | The tongue, Salivary glands , and Muscles of mastication and the temporomandibular joint | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | The pharynx ,The larynx , The ear ,Cranial fossae , Cranial nerves , and Fascia of the neck | The pharynx ,The larynx , The ear ,Cranial fossae , Cranial nerves , and Fascia of the neck | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| 8. Course Objectives | |
| Course Objectives | <ul style="list-style-type: none"> - This program aims to enrich your problem-solving skills to address the upcoming challenges within the application of medical physics in the field of Biomedical Engineering. - The module will enable you to understand the principles of physics underpinning the generation of medical images widely used by allied health professionals and medical consultants within the health care sector. - Undertaking this module at level 3 will enable you to become proficient in further applying these fundamental concepts in processing and enhancing medical images using digital and computer algorithms to be delivered as part of a module on medical image processing at level 5. <p>This module has been carefully designed and developed to allow you to enhance your sound knowledge in medical physics, its principle and applications and thereby prepare yourself for a technical, research or development role within medical physics or imaging systems.</p> |
| 9. Teaching and Learning Strategies | |
| Strategy | In this module you will be attending lectures and seminars. You will also participate in classroom and small group discussions. Each of these activities is supported by pre and post-session, directed self-study such as quizzes or assignments. This module develops your understanding of medical imaging (x-ray system, CT scanner, and MRI system) in biomedical engineering and will use examples of how physics is applied to image formation in a variety of modalities. |

Develop an understanding of cultural |

nuances in language use and communication.

| | |
|---|--|
| | Grammar and Vocabulary: |
| | <ul style="list-style-type: none"> • Reinforce and expand on essential grammar points and language patterns. • Increase vocabulary range and usage through thematic units and contexts. |
| | Listening and Speaking: |
| | <ul style="list-style-type: none"> • Improve listening skills through a variety of audio materials, including dialogues, interviews, and recordings of native speakers. • Enhance speaking abilities by providing opportunities for role-plays, discussions, debates, and presentations. |
| | Reading and Writing: |
| | <ul style="list-style-type: none"> • Develop reading comprehension skills with engaging texts, articles, and stories that reflect real-world contexts. • Practice different types of writing, such as emails, letters, reports, and essays, to enhance writing skills. |
| | Exam Preparation (if applicable): |
| | <ul style="list-style-type: none"> • Provide practice tasks and exercises that prepare students for English proficiency exams, such as Cambridge English: First (FCE) or similar exams. |
| | Language Functions and Situations: |
| | <ul style="list-style-type: none"> • Cover a range of language functions and situations, including expressing likes and dislikes, describing experiences, talking about future plans, etc. • Offer language practice in contexts relevant to students' daily lives and future needs. |
| Critical Thinking and Problem-Solving: | |
| <ul style="list-style-type: none"> • Encourage students to think critically and analyze language use in different contexts. • Develop problem-solving skills through language tasks that require creative thinking and application of learned concepts. | |
| Self-Study and Autonomy: | |
| <ul style="list-style-type: none"> • Promote self-study habits by providing supplementary materials, exercises, and online resources. • Encourage learners to take ownership of their learning process and set language learning goals. | |

9. Teaching and Learning Strategies

Strategy The teaching and learning strategies in the "New Headway Intermediate" series aim to create an engaging and effective learning experience for students, enabling them to develop their language skills in a communicative and interactive way.

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|----------------------------|---|-----------------|-------------------|
| 1 | 2 | | Unit 4 – Doing the right things Modal verbs (1) | Theory | |
| 2 | 2 | | Unit 4 – Doing the right things Modal verbs (1) | Theory | |
| 3 | 2 | | Unit 4 – Doing the right things Requests and offers | Theory | |
| 4 | 2 | | Unit 5 – On the move Future forms | Theory | |
| 5 | 2 | | Unit 5 – On the move Future forms | Theory | |

| | | | | | |
|----|---|--|---|--------|--|
| 6 | 2 | | Unit 5 – On the move Travelling around | Theory | |
| 7 | 2 | | Mid – exam | Theory | |
| 8 | 2 | | Unit 6 – Likes and dislikes Like | Theory | |
| 9 | 2 | | Unit 6 – Likes and dislikes Verb + -ing or infinitive? | Theory | |
| 10 | 2 | | Unit 6 – Likes and dislikes Verb + -ing or infinitive? | Theory | |
| 11 | 2 | | Unit 6 – Likes and dislikes Sign and soundbites | Theory | |
| 12 | 2 | | Review | Theory | |

| | | | | | |
|--|--|--|--|--|--|
| | | | | | |
| 11. Course Evaluation | | | | | |
| Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc | | | | | |
| 12. Learning and Teaching Resources | | | | | |
| Required textbooks (curricular books, if any) | | | | | |
| Main references (sources) | | | | | |
| Recommended books and references (scientific journals, reports...) | | | | | |
| Electronic References, Websites | | | | | |

Course Description Form

| 1. Course Name: | | | | | |

| Theory : 2 Hrs Units : 2 | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: | |
| Email: | |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none"> 1. Engineers need to collect, organize, analyze, and Interpret data in simple flowcharts in order to make decisions. 2. Statistics helps in identifying scientific and engineering problems using statistical models for problem-solving to helping make decisions based on probability. 3. Identifying system random selection operations in experiments and analyzing the primary data for hypothesis testing is determined. 4. Engineering statistics are used in the quality control and efficiency of processes and systems. 5. Study the probabilities and simulation of the systems before applying them. |
| 9. Teaching and Learning Strategies | |

| | |
|-----------------|--|
| Strategy | <ul style="list-style-type: none"> • Theory in class room. • Quizzes and home works. |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|---|---|------------------------------|---|
| 1 | 2 | Understand the basic concepts and terminology of engineering statistics, including the various kinds of variables, measurement, and measurement scales. | Introduction - provide an overview of the basic statistical concepts | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | understand how data can be appropriately organized and displayed. | present a set of basic procedures and statistical measures for describing data | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Definitions and fundamentals- definition, population, sample, random sample, frequency distributions and histogram and polygon, relative and cumulative frequencies. | Definitions and fundamentals- definition, population, sample, random sample, frequency distributions and histogram and polygon, relative and cumulative frequencies. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Measure of central location and measure of variation and dispersion. | Measure of central location and measure of variation and dispersion. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Probability theory: Relative frequency Venn diagram, intersection, union, conditional probability, mutually exclusive events, permutations and combinations, applications | Probability theory: Relative frequency Venn diagram, intersection, union, conditional probability, mutually exclusive events, permutations and combinations, applications | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Probability Distributions: Discrete distribution; binomial distribution and Poisson distribution | Probability Distributions: Discrete distribution; binomial distribution and Poisson distribution | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Mid-term Exam + Mean and Variance of Discrete Probability Distributions | Mid-term Exam + Mean and Variance of Discrete Probability Distributions | Theory, discussions, quizzes | Final and Mid term exams, home works, |

| | | | | | |
|----|---|---|---|------------------------------|---|
| | | | | | and quizzes |
| 8 | 2 | Probability Distributions: continuous distribution; normal distribution, t-distribution, applications | Probability Distributions: continuous distribution; normal distribution, t-distribution, applications | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Sampling theory: sampling distributions, and sampling distribution of means, applications. | Sampling theory: sampling distributions, and sampling distribution of means, applications. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Sampling theory: distribution of the sample proportion | Sampling theory: distribution of the sample proportion | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Estimation of Population's Mean (Large Samples) | Estimation of Population's Mean (Large Samples) | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Confidence Intervals for the Mean (Small Samples) | Confidence Intervals for the Mean (Small Samples) | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | Correlation Coefficient, Regression, Simple Linear Regression, Coefficient of Determination | Correlation Coefficient, Regression, Simple Linear Regression, Coefficient of Determination | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Hypothesis testing: a single population mean | Hypothesis testing: a single population mean | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | Hypothesis testing: a single population proportion | Hypothesis testing: a single population proportion | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | |
|--|---|
| 11 Course Evaluation : | |
| Distributing the score out of 100 according to the following : mid term exam 30 % , daily evaluation 10%, and final exam. 60 % | |
| 12. Learning and teaching Resources | |
| Required textbooks (curricular books, if any) | Applied statistics and probability for engineers, 3rd ed. Montgomery,DC and Runger, GC. |
| Recommended books | Probability and statistics for engineers, 2008, India ed. Devore, JL. |

| 8. Course Objectives | |
| Course Objectives | <p>1- This program aims to enrich your problem-solving skills to address the upcoming challenges within the application of medical physics in the field of Biomedical Engineering.</p> <p>2- The module will enable you to understand the principles of physics underpinning the generation of medical signals widely used by allied health professionals and medical consultants within the health care sector.</p> <p>3- Undertaking this module at level 4 will enable you to become proficient in further applying these fundamental concepts in processing and enhancing medical signals using digital and computer algorithms to be delivered as part of a module on medical signal processing at level 5.</p> <p>This module has been carefully designed and developed to allow you to enhance your sound knowledge in medical physics, its principle and applications and thereby prepare yourself for a technical, research or development role within medical physics or biomedical signal systems.</p> |
| 9. Teaching and Learning Strategies | |
| Strategy | In this module you will be attending lectures and seminars. You will also participate in classroom and small group discussions. Each of these activities is supported by pre and post-session, directed self-study such as quizzes or assignments. This module develops your understanding of medical signaling (ECG, EMG, and EEG) in biomedical engineering and will use examples of how physics is applied to signal formation in a variety of modalities. |
| 10. Course Structure | |

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|----------------------------|---------------------------------------|----------------------|---------------------|--|
| 16 | Th. 2 Prac. 2 Tut. 1 | Theoretical and Practical experiences | ECG, EMG and EEG | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|---|--|--|--|--|--|
| | | | | | |
| 11. Course Evaluation | | | | | |
| Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports..... etc | | | | | |
| 12. Learning and Teaching Resources | | | | | |
| Required textbooks (curricular books, if any) | | | | | |
| Main references (sources) | | | | | |
| Recommended books and references (scientific journals, reports...) | | | | | |
| Electronic References, Websites | | | | | |

| | |
|-------------------|--|
| Textbook | Medical Instrumentation Application and Design, John G. Webster |
| References | ECG from Basics to Essentials Step by Step by Roland X. Stroobandt, S. Serge Barold, Alfons F. Sinnaeve SURFACE ELECTROMYOGRAPHY, Physiology, Engineering, and Applications |

Course Description Form

| | |
|---|--|
| 1. Course Name: Communication I | |
| | |
| 2. Course Code: | |
| MDER412 | |
| 3. Semester / Year: First / 2024 | |
| | |
| 4. Description Preparation Date: 14/4/2024 | |
| | |
| 5. Available Attendance Forms: Attendance | |
| | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) 3 | |
| | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Mr. Ahmed Toman Thahab Email: eng.ahmed.thahab@uobabylon.edu.iq | |
| 8. Course Objectives | |
| Course Objectives | <ul style="list-style-type: none"> • Learning domain transform and signal analysis. • Essential parts of a communication system. • Transmitting data and its impairments . • A full understand of bandpass transmission and modulation techniques. • The reasons behind converting analogue signals into digital. • Noise sources in electrical elements. |
| 9. Teaching and Learning Strategies | |
| Strategy | The core strategy that will be implemented in delivering this module is presenting the material and encourage students to participate through exercises and critical thinking questions. Moreover, interactive tutorials, homework and Matlab tutorials are assigned to students in delivering this module. Various lab experiments related to the material are implemented in delivering the material. |

| 10. Course Structure | | | | | |
|----------------------|-------|---|---|----------------------------|-------------------|
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
| 1 | 3 | Introducing students to signals and their representation in the two main domains | Introduction – signals, types of signals, representation of signals: time representation and frequency representation, Block diagram of communication . | Lecture and discussion | Exam |
| 2 | 3 | Teaching students to analyze periodic and aperiodic signals. | Fourier Series and Fourier transform | Lecture and Home work | Exam &Homework |
| 3 | 3 | Explaining the properties of the Fourier transform | Properties of Fourier Transform and Inverse Fourier transform and applications | Lecture and Home work | Exam & Homework |
| 4 | 3 | Illustrating the principle energy and power spectral density and their properties | Power spectral density and Energy spectral density | Lecture and Discussion | Exam &Homework |
| 5 | 3 | illustrating the principles of baseband, passband signals and modulation | baseband and passband transmission, modulation | Lecture and Discussion | Exam & Homework |
| 6 | 3 | illustrating the principle of AM and its spectrum | Amplitude modulation(AM), types of AM, Spectrum of AM signal | Lecture and Lab Experiment | Exam & Homework |
| 7 | 3 | Understating the circuits that generate and detect AM signals. | AM generation and detection, Comparison between AM types. | Lecture and Lab Experiment | Exam & Homework |
| 8 | 3 | Introducing the principle of FM nad its spectrum and compare it with AM | Frequency modulation(FM), spectrum of AM signals | Lecture and Lab Experiment | Exam & Homework |
| 9 | 3 | Driving the bandwidth equation and power calculation equations | Bessel Function, Bandwidth, power of FM signals, Phase modulation. | Lecture and Home work | Exam & Homework |
| 10 | 3 | Introducing students to sampling theory and its application in signal processing | Sampling theorem and Nyquist rate, Reconstruction of Signal | Lecture and Home work | Exam & Homework |

| | | | | | |
|----|---|--|--|-----------------------|-----------------|
| 11 | 3 | Introducing other modulation schemes regarding pulse modulation | Pulse Modulation , Pulse amplitude modulation , pulse duration modulation , Pulse position modulation. | Lecture and Home work | Exam & Homework |
| 12 | 3 | Introducing students the importance of digital signals and analogue signal conversion to digital | Pulse code modulation, quantization, uniform quantization signal to quantization to noise ratio | Lecture and Home work | Exam & Homework |
| 13 | 3 | Illustrating the transmission scheme | Frequency division multiplexing, time division multiplexing. | Lecture and Home work | Exam & Homework |
| 14 | 3 | Introducing the types of noise and its sources | PCM and time division multiplexing, Noise. | Lecture and Home work | Exam & Homework |
| 15 | 3 | | Assessment Exam | - | - |
| | | | | | |

11. Course Evaluation

The quizzes and home work 10%, mid term exam is 30%, LAB assessment 10% and the final exam 50%

12. Learning and Teaching Resources

| | |
|--|--|
| Required textbooks (curricular books, if any) | Modern digital and Analog communication systems by Lathi |
| Main references (sources) | |
| Recommended books and references (scientific journals, reports...) | Communication systems by Simon Haykins |
| Electronic References, Websites | |

| 5. Available Attendance Forms: | | | | | |
| | | | | | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | | | | | |
| Theory : 2Hrs Practical : 3 Hrs Units : 3 | | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | | |
| Name: Prof. Dr. Mahmoud Shaker Nasr Email: eng.mahmoud.shaker@uobabylon.edu.iq | | | | | |
| 8. Course Objectives | | | | | |
| Course Objectives | | | <ul style="list-style-type: none"> • To learn the digital electronics and how to manage the digital information and the design of digital and logic systems. | | |
| 9. Teaching and Learning Strategies | | | | | |
| Strategy | | <ul style="list-style-type: none"> • Theory in class room. • Practice in the lab. • Quizzes and home works. | | | |
| 10. Course Structure | | | | | |
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
| 1 | 2 | Introduction | Introduction | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Dif. Between analog and digital signals, and the types of data transfer | Dif. Between analog and digital signals, and the types of data transfer | Theory, discussions, quizzes, and | Final and Mid term exams, home works, |

| | | | | | |
|----|---|--|--|---|---|
| | | | | practice. | and quizzes |
| 3 | 2 | Numbering systems-1 | Numbering systems-1 | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Numbering systems-2 | Numbering systems-2 | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Complements, signed numbers, binary codes and algebra | Complements, signed numbers, binary codes and algebra | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Theory and operation of Logic gates-1 | Theory and operation of Logic gates-1 | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Theory and operation of Logic gates-2 | Theory and operation of Logic gates-2 | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | SOP, POS, NAND and NOR implementation | SOP, POS, NAND and NOR implementation | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Kmap, don't care; combinational logic circuits | Kmap, don't care; combinational logic circuits | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Binary adder and subtractor and design procedure | Binary adder and subtractor and design procedure | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Decimal adders and comparators circuits design | Decimal adders and comparators circuits design | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Decoders and encoders circuits design, | Decoders and encoders circuits design, | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | Multiplexers and demultiplexers circuit design. | Multiplexers and demultiplexers circuit design. | Theory, discussions, quizzes, and | Final and Mid term exams, home works, |

| | | | | | |
|----|---|--------------------------|--------------------------|---|---|
| | | | | practice. | and quizzes |
| 14 | 2 | Project design -1 | Project design -1 | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | Project design -1 | Project design -1 | Theory, discussions, quizzes, and practice. | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following : mid term exam 30 % , daily evaluation 10%, lab. evaluation 10% and final exam. 50 %

12. Learning and teaching Resources

| | |
|---|---|
| Required textbooks (curricular books, if any) | Thomas L. Floyd "Digital Fundamentals" , Eleventh Edition Global, Edition 2015. |
| Recommended books | David Money and Harris' Sarah L. Harris "In Praise of Digital Design and Computer Architecture", British Library Cataloguing-in-Publication Data, 2013. |
| Electronics References, Websites | Thomas L. Floyd "Digital Fundamentals" , Eleventh Edition Global, Edition 2015. |

Course Description Form

| 1 / 1 | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | |
| Name: Noor ahmed Email: | | | | |
| 8. Course Objectives | | | | |
| Course Objectives | <ul style="list-style-type: none"> 1- 1. To enable the students to communicate effectively and appropriately in real life situation. 2- 2. To use English effectively for study purpose across the curriculum; 3- 3. To develop interest in and appreciation of Literature; 4- 4. To develop and integrate the use of the four language skills i.e. Reading, Listening, Speaking and Writing; 5- 5. to revise and reinforce structure already learnt. 6- 6. Students will have the opportunity to consider aspects of current English language teaching theory and develop their awareness of how these theories translate to the classroom to influence teaching practice. | | | |
| 9. Teaching and Learning Strategies | | | | |
| Strategy | <p>Focus on academic language, literacy and vocabulary</p> <p>Link background knowledge and culture to learning</p> <p>Increase comprehensible input and language output</p> <p>Promote classroom interaction</p> | | | |
| 10. Course Structure | | | | |
| | Hours | Required Learning | | Evaluation |

| Week | | Outcomes | Unit or subject name | Learning method | method |
|------|-----------------|---------------------------------------|---|---------------------|--|
| 1 | Th. 1 Tut. 1 | Theoretical and Practical experiences | The tense system: auxiliary verbs, modal auxiliary verbs, full verbs. English tense usage: time, the simplest aspect, the continuous aspect, the perfect aspect, active and passive. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 2 | Th. 1 Tut. 1 | Theoretical and Practical experiences | The present perfect: Present perfect simple and continuous (unfinished past, present result, indefinite past). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 3 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Narrative tenses: past simple, past perfect, past continuous, present perfect, time clauses). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 4 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Questions: question forms, asking for descriptions, indirect questions. Negatives: forming negatives, negative questions. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 5 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Listening and speaking: listen to syllabus subjects-related tapes, and discussing presentation given by students. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 6 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Future forms: will and going to for (prediction, intentions, and decisions), present continuous for arrangements, present simple for timetable, future continuous, | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-----------------|---|--|------------------------|---|
| 7 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Expressing quantity: meaning, usage of all quantifiers with different examples. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 8 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Everyday English, social expressions, hot verbs (make and do), formal language and informal language. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 9 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Mid-term Exam + Discussing answers of mid-term exam. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 10 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Modal <u>auxiliary</u> verbs: uses of modal auxiliary verbs for (probability, present, future, ability, advice, obligation, permission, willingness, and refusal) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 11 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Relative clauses: defining relative clauses, non-defining relative clauses. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 12 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Expressing habit: as present simple, present continuous | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 13 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Reading and speaking skills: reading exercises, discussing presentation given by students | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-----------------|---|--|------------------------|---|
| 14 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Hypothesizing: first and second conditional, third conditional, other structures of hypothesis. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 15 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Determiners: each and every, enough, articles (a/an, the, zero article). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 16 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Preparatory week before the final Exam | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |

| 5. Available Attendance Forms: | |
| IN PERSON | |
| 6. Number of Credit Hours (Total) / Number of Units : | |
| 30 UNITS / 2 UNITS | |
| 7. Course administrator's name (mention all, if more than one name) Name: Dr. Fawaz F. Al-Bakri | |
| Email: fawaz@uobabylon.edu.iq | |
| Course Objectives | <ul style="list-style-type: none"> • Increase the range of solvable problems by developing standard techniques with a wide range of applicability • Understand the mathematical structure of mechanics |
| 9. Teaching and Learning Strategies | |
| Strategy | <ul style="list-style-type: none"> • The student will acquire the basic knowledge for the study of holonomic systems with particular regard to the kinematics and dynamics of rigid bodies • The student will learn mathematic instruments, such as theorems and algorithms, which permit to face real problems in applied mathematics, physics, informatics and many other fields. With these mathematical instruments, student gets new abilities to clear useful theoretical and application problems. • At the end of course student will be able to get new mathematical techniques of knowledge and understanding to face all possible links moreover, if it is possible, they will propose untreated new problems. |

| | | | | | and quizzes |
| 14 | 3 | Biomechanics for spine human body | Biomechanics for spine human body | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 3 | Biomechanics for spine human body | Biomechanics for spine human body , different problems according biomechanics analyses | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following : mid term exam 30 % , daily evaluation 10%, experimental practice 10% and final exam. 50 %

12. Learning and teaching Resources

| | |
|---|---|
| Required textbooks (curricular books, if any) | Susan.J.hall et.al., Basic Biomechanics, Textbook, 2015. |
| Recommended books | Susan.J.hall et.al., Basic Biomechanics, Textbook, 2015. |
| Electronics References, Websites | Taylor and Francis, Biomechanics of Human Motion, Textbook ,2018. |

Course Description Form

| | |
|---|--|
| 1. Course Name: Communication II | |
| | |
| 2. Course Code: | |
| MDER422 | |
| 3. Semester / Year: First / 2024 | |
| | |
| 4. Description Preparation Date: 14/4/2024 | |
| | |
| 5. Available Attendance Forms: Attendance | |
| | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) 3 | |
| | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Mr. Ahmed Toman Thahab Email: eng.ahmed.thahab@uobabylon.edu.iq | |
| 8. Course Objectives | |
| Course Objectives | <ul style="list-style-type: none"> • Learning domain transform and signal analysis. • Essential parts of a communication system. • Transmitting data and its impairments . • A full understand of bandpass transmission and modulation techniques. • The reasons behind converting analogue signals into digital. • Noise sources in electrical elements. |
| 9. Teaching and Learning Strategies | |
| Strategy | The core strategy that will be implemented in delivering this module is presenting the material and encourage students to participate through exercises and critical thinking questions. Moreover, interactive tutorials, homework and Matlab tutorials are assigned to students in delivering this module. Various lab experiments related to the material are implemented in delivering the material. |

| 10. Course Structure | | | | | |
|----------------------|-------|---|---|----------------------------|-------------------|
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
| 1 | 3 | Introducing students to signals and their representation in the two main domains | Introduction – signals, types of signals, representation of signals: time representation and frequency representation, Block diagram of communication . | Lecture and discussion | Exam |
| 2 | 3 | Teaching students to analyze periodic and aperiodic signals. | Fourier Series and Fourier transform | Lecture and Home work | Exam & Homework |
| 3 | 3 | Explaining the properties of the Fourier transform | Properties of Fourier Transform and Inverse Fourier transform and applications | Lecture and Home work | Exam & Homework |
| 4 | 3 | Illustrating the principle energy and power spectral density and their properties | Power spectral density and Energy spectral density | Lecture and Discussion | Exam & Homework |
| 5 | 3 | illustrating the principles of baseband, passband signals and modulation | baseband and passband transmission, modulation | Lecture and Discussion | Exam & Homework |
| 6 | 3 | illustrating the principle of AM and its spectrum | Amplitude modulation(AM), types of AM, Spectrum of AM signal | Lecture and Lab Experiment | Exam & Homework |
| 7 | 3 | Understating the circuits that generate and detect AM signals. | AM generation and detection, Comparison between AM types. | Lecture and Lab Experiment | Exam & Homework |
| 8 | 3 | Introducing the principle of FM nad its spectrum and compare it with AM | Frequency modulation(FM), spectrum of AM signals | Lecture and Lab Experiment | Exam & Homework |
| 9 | 3 | Driving the bandwidth equation and power calculation equations | Bessel Function, Bandwidth, power of FM signals, Phase modulation. | Lecture and Home work | Exam & Homework |
| 10 | 3 | Introducing students to sampling theory and its application in signal processing | Sampling theorem and Nyquist rate, Reconstruction of Signal | Lecture and Home work | Exam & Homework |

| | | | | | |
|----|---|--|--|-----------------------|-----------------|
| 11 | 3 | Introducing other modulation schemes regarding pulse modulation | Pulse Modulation , Pulse amplitude modulation , pulse duration modulation , Pulse position modulation. | Lecture and Home work | Exam & Homework |
| 12 | 3 | Introducing students the importance of digital signals and analogue signal conversion to digital | Pulse code modulation, quantization, uniform quantization signal to quantization to noise ratio | Lecture and Home work | Exam & Homework |
| 13 | 3 | Illustrating the transmission scheme | Frequency division multiplexing, time division multiplexing. | Lecture and Home work | Exam & Homework |
| 14 | 3 | Introducing the types of noise and its sources | PCM and time division multiplexing, Noise. | Lecture and Home work | Exam & Homework |
| 15 | 3 | | Assessment Exam | - | - |
| | | | | | |

11. Course Evaluation

The quizzes and home work 10%, mid term exam is 30%, LAB assessment 10% and the final exam 50%

| 8. Course Objectives | | | | |
| Course Objectives | <ul style="list-style-type: none"> 1- 1. To enable the students to communicate effectively and appropriately in real life situation. 2- 2. To use English effectively for study purpose across the curriculum; 3- 3. To develop interest in and appreciation of Literature; 4- 4. To develop and integrate the use of the four language skills i.e. Reading, Listening, Speaking and Writing; 5- 5. to revise and reinforce structure already learnt. 6- 6. Students will have the opportunity to consider aspects of current English language teaching theory and develop their awareness of how these theories translate to the classroom to influence teaching practice. | | | |
| 9. Teaching and Learning Strategies | | | | |
| Strategy | <p>Focus on academic language, literacy and vocabulary</p> <p>Link background knowledge and culture to learning</p> <p>Increase comprehensible input and language output</p> <p>Promote classroom interaction</p> | | | |
| 10. Course Structure | | | | |
| | Hours | Required Learning | | Evaluation |

| Week | | Outcomes | Unit or subject name | Learning method | method |
|------|-----------------|---------------------------------------|---|---------------------|--|
| 1 | Th. 1 Tut. 1 | Theoretical and Practical experiences | The tense system: auxiliary verbs, modal auxiliary verbs, full verbs. English tense usage: time, the simplest aspect, the continuous aspect, the perfect aspect, active and passive. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 2 | Th. 1 Tut. 1 | Theoretical and Practical experiences | The present perfect: Present perfect simple and continuous (unfinished past, present result, indefinite past). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 3 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Narrative tenses: past simple, past perfect, past continuous, present perfect, time clauses). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 4 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Questions: question forms, asking for descriptions, indirect questions. Negatives: forming negatives, negative questions. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 5 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Listening and speaking: listen to syllabus subjects-related tapes, and discussing presentation given by students. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 6 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Future forms: will and going to for (prediction, intentions, and decisions), present continuous for arrangements, present simple for timetable, future continuous, | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-----------------|---|--|------------------------|---|
| 7 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Expressing quantity: meaning, usage of all quantifiers with different examples. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 8 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Everyday English, social expressions, hot verbs (make and do), formal language and informal language. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 9 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Mid-term Exam + Discussing answers of mid-term exam. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 10 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Modal <u>auxiliary</u> verbs: uses of modal auxiliary verbs for (probability, present, future, ability, advice, obligation, permission, willingness, and refusal) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 11 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Relative clauses: defining relative clauses, non-defining relative clauses. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 12 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Expressing habit: as present simple, present continuous | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 13 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Reading and speaking skills: reading exercises, discussing presentation given by students | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-----------------|---------------------------------------|--|---------------------|--|
| 14 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Hypothesizing: first and second conditional, third conditional, other structures of hypothesis. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 15 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Determiners: each and every, enough, articles (a/an, the, zero article). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 16 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Preparatory week before the final Exam | Theory and practice | Test, Laboratory, Quizzes and final exam |

| 7. Course administrator's name (mention all, if more than one name) | | | | | |
| Name: Sura Baha Email: | | | | | |
| 8. Course Objectives | | | | | |
| Course Objectives | <ol style="list-style-type: none"> 1. To develop problem-solving skills and an understanding of Therapeutic Instrumentation through the application of techniques. 2. To understand how to deal with medical device malfunctions. 3. To understand how to calibrate medical devices. 4. To develop the student skills to develop the medical system to fit the work with the vital variables of the human body. 5. To understand how biosignals are processed. 6. To understand the types of medical devices required to treat human body problems. | | | | |
| 9. Teaching and Learning Strategies | | | | | |
| Strategy | The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials, and by considering types of simple experiments involving some sampling activities that are interesting to the students. | | | | |
| 10. Course Structure | | | | | |

Course Description Form

| | | | | | |
|---|--------------|--|--|------------------------|---------------------------|
| 1. Course Name: | | | | | |
| Thermo-Fluid Mechanics II | | | | | |
| 2. Course Code: | | | | | |
| MDER426 | | | | | |
| 3. Semester / Year: | | | | | |
| 2 nd semester / fourth year | | | | | |
| 4. Description Preparation Date: | | | | | |
| April, 10, 2024 | | | | | |
| 5. Available Attendance Forms: | | | | | |
| ---- | | | | | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | | | | | |
| Theory : 2 Hrs App: 2 Hrs Units : 3 | | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | | |
| Name: | | | | | |
| Email: | | | | | |
| 8. Course Objectives | | | | | |
| Course Objectives | | | <ul style="list-style-type: none"> • To cover the <i>basic principles</i> of thermodynamics, fluid mechanics, and heat transfer. • To present numerous and diverse real-world <i>engineering examples</i> to give students a feel for how thermal-fluid sciences are applied in engineering practice. • To develop an <i>intuitive understanding</i> of thermal-fluid sciences by emphasizing the physics and physical arguments. | | |
| 9. Teaching and Learning Strategies | | | | | |
| Strategy | | The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials and by considering type of simple experiments involving some sampling activities that are interesting to the students. | | | |
| 10. Course Structure | | | | | |
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
| 1 | 2 | | Properties and Units | Theory, discussions, | Final and Mid term exams, |

| | | | | | |
|----|---|--|--|------------------------------|---|
| | | | | quizzes | home works, and quizzes |
| 2 | 2 | | Fluid Static Pressure Head | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | | Flow Patterns | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | | Newton's Law of Viscosity | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | | Continuity Equation | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | | Energies Relationships Bernoulli Equation | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | | Mid-term Exam - Reynolds Number Friction Factor | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | | Pressure Drop in Pipes and Fittings | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | | Pumps, Flow measurement, Boundary layer | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | | Heat Transfer :Conduction, | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | | Convection, Radiation | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | | steady heat conduction | Theory, discussions, | Final and Mid term exams, |

| | | | | | |
|----|---|--|---------------------------|------------------------------------|--|
| | | | | quizzes | home works, and quizzes |
| 13 | 2 | | Thermal resistance | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | | Heat Exchangers | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | | Refrigeration | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following : mid term exam 30 % , daily evaluation 10%, and final exam. 60 %

12. Learning and teaching Resources

| | |
|--|---|
| Required textbooks (curricular books, if any) | Yunus A. Cengel, John B. Cimbala, Fluid Mechanics: fundamentals and applications, Third edition, McGraw-Hill Science/Engineering/Math, 2013 Yunus A. Cengel, Heat Transfer a Practical Approach, second edition, McGraw – Hill, 2003 |
| Recommended books | Yunus A. Cengel, John B. Cimbala, Robert H. Turner, Fundamental of Thermal-fluid science, fifth edition, McGraw Hill education, 2017 |
| Electronics References, Websites | |

Course Description Form

| | |
|---|---|
| 1. Course Name: Control I | |
| | |
| 2. Course Code: | |
| | |
| 3. Semester / Year: One /2024 | |
| | |
| 4. Description Preparation Date: | |
| | |
| 5. Available Attendance Forms: | |
| | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) 75/3 | |
| 75 Hours/ 3 credits | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Asst. Prof Dr. Hayder Mahdi Abdulridha Email: drenghaider@uobabylon.edu.iq | |
| 8. Course Objectives | |
| Course Objectives | <ul style="list-style-type: none"> • To provide the fundamental knowledge of control system engineering and the concept of mathematical modeling of the physical system. • The subject gives various classical analysis tools for design and stability of system in time and frequency domain |
| 9. Teaching and Learning Strategies | |
| Strategy | 1- Thinking strategy according to the student's ability (Example: If the student is able to learn the correct concept of management, he will acquire the skill of managing and organizing his personal life) 2- High thinking skill strategy (for example, if the student wants to make a good decision, it is important that he thinks well before he makes the decision, and if he decides without thinking, or if he cannot think well, or if he cannot decide, or perhaps he will not decide, then this This means he does not have high thinking skills. 3- Critical thinking strategy in learning (Critical Thanking) (it is a term that symbolizes the highest levels of thinking, which aims to pose a problem and then analyze it logically to reach the desired solution) |
| 10. Course Structure | |

| Week | Hours | Required Learning | Unit or subject name | Learning method | Evaluation |
|---|-------|---|----------------------|--|--|
| | | Outcomes | | | method |
| 1- Introduction | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 2- Mathematical Modeling of Electrical and Mechanical Systems | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 3- Block Diagrams and Signal Flow Graphs | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 4- Time Domain Response | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 5- Transient Response | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 6- Steady State Error | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |

| | | | | | |
|---------------------------------------|---|---|-----------|--|--|
| 7- Stability Analysis | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 8- Root Locus | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 9- Frequency Response | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 10- State Space Analysis | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 11- Solving State Space Equations | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 12- Controllability and Observability | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |
| 13- PID Controllers | 2 | Theoretical principles and applications | Control I | Lectures presentations and solving exercises | 1-Mid exam 2-Semester exam 3-Evaluating the performance of the student's activity in the lecture 4-Homework |

| 5 / 3 | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Dr. Amir F. Al-Bakri Email: amir.albakri@uobabylon.edu.iq | |
| 8. Course Objectives | |
| Course Objectives | <p>1- This program aims to enrich your problem-solving skills to address the upcoming challenges within the application of medical physics in the field of Biomedical Engineering.</p> <p>2- The module will enable you to understand the principles of physics underpinning the generation of medical diagnostic instrumentations widely used by allied health professionals and medical consultants within the health care sector.</p> <p>3- Undertaking this module at level 5 will enable you to become proficient in further applying these fundamental concepts in processing and enhancing medical image using digital and computer algorithms to be delivered as part of a module on medical image processing at level 5.</p> <p>This module has been carefully designed and developed to allow you to enhance your sound knowledge in medical physics, its principle and applications and thereby prepare yourself for a technical, research or development role within medical physics or biomedical image systems..</p> |
| 9. Teaching and Learning Strategies | |
| Strategy | In this module you will be attending lectures and seminars. You will also participate in classroom and small group discussions. Each of these activities is supported by pre and post-session, directed self-study such as quizzes or assignments. This module develops your understanding of US imaging in biomedical engineering and will use examples of how physics is applied to image formation in a variety of modalities. |

| 3 | 2 | Understanding of the fundamental concepts of tribology, including friction, wear, lubrication, and surface interactions, as they apply to biological systems | Friction and Wear | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Lubricant Materials | Lubricant Materials | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Biotribology of Hip Joint | Biotribology of Hip Joint | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Biotribology of Regenerated Cartilage | Biotribology of Regenerated Cartilage | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Wear Measurements | Wear Measurements | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Frictional Heating of Articulating Surfaces | Frictional Heating of Articulating Surfaces | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Biotribology of Titanium Alloys 157 | Biotribology of Titanium Alloys 157 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Biotribology of Artificial Knee | Biotribology of Artificial Knee | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Mid.Exam + Biotribology of the Dental Application | Mid.Exam + Biotribology of the Dental Application | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Improve Biotribology for Different Biomedical Application | Improve Biotribology for Different Biomedical Application | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|--|--|------------------------------|---|
| 13 | 2 | Recently Methods for Improvement Biotribology Properties | Recently Methods for Improvement Biotribology Properties | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Future Directions in Biotribology | Future Directions in Biotribology | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | Preparatory week before the final Exam | Preparatory week before the final Exam | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following : mid term exam 30 % , daily evaluation 10%, and final exam. 60 %

12. Learning and teaching Resources

| | |
|---|--|
| Required textbooks (curricular books, if any) | Biotribology , Wiley , J. Paulo Davim |
| Recommended books | Biotribology of Natural and Artificial Joints, eruo Murakami |
| Electronics References, Websites | |

Course Description Form

| | |
|--|--|
| 1. Course Name: | |
| Computer Network | |
| 2. Course Code: | |
| MDER523 | |
| 3. Semester / Year: | |
| Second/fifth | |
| 4. Description Preparation Date: | |
| 4/6/2024 | |
| 5. Available Attendance Forms: | |
| In classroom | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | |
| 2/2 | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Dr. Alaa Imran Al-Muttairi Email: al_al_44@uobabylon.edu.iq | |
| 8. Course Objectives | |
| Course Objectives | <ul style="list-style-type: none"> 1- To Understand the fundamentals of computer networks and their importance in modern computing. 2- To Explore different types of networks and network topologies. 3- To Familiarize students with the OSI model and its layers and understand the functions and responsibilities of each OSI layer. 4- To Learn about IPv4 addressing, including the structure of IP addresses and subnetting. 5- To Understand the functions and roles of different devices in a computer network. 6- To Explore the process of packet delivery and forwarding in an IP-based network. 7- To Understand the purpose and operation of the Address Resolution Protocol (ARP). <p>Introduce IPv6 addressing and its advantages over IPv4. To Understand the practical implications of wave propagation in wireless network design</p> |
| 9. Teaching and Learning Strategies | |

| | |
|-----------------|---|
| Strategy | The material is presented theoretically, followed by assigning students homework. Practical networking demonstrations are integrated into the lectures using Packet Tracer software. Additionally, students are tasked with conducting seminars on certain subjects and presenting them to their peers. |
|-----------------|---|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|-------------|--------------|---|---|------------------------|--------------------------|
| 1 | 2 | Basic concepts of computer networks | Introduction to computer networks. | In classroom | Quiz + oral questions |
| 2 | 2 | Types of networks (LAN, WAN, MAN), Network topologies (Bus, Star, Mesh, Ring), Network protocols and standards, Client-server models versus peer-to-peer models | OSI computer network reference model – Part 1. | In classroom | Quiz + oral questions |
| 3 | 2 | OSI model and its layers | OSI computer network reference model – Part 2. | In classroom | Quiz + oral questions |
| 4 | 2 | TCP/IP model and its layers | TCP/IP (Internet) computernetwork reference model. | In classroom | Quiz + oral questions |
| 5 | 2 | IPv4 addressing and subnets, Classful and classless addressing, Subnet masks and subnet calculations | Network Layer , IPV4 addresses (Classful addressing). | In classroom | Quiz + oral questions |

| | | | | | |
|----|---|---|---|--------------|-----------------------|
| 6 | 2 | IPv4 addressing and subnets, Classful and classless addressing, Subnet masks and subnet calculations | Network Layer , IPV4 addresses (Classless addressing). | In classroom | Quiz + oral questions |
| 7 | 2 | Network Address Translation (NAT) translation and private addressing, Overview of network devices: Switches, Routers, Firewalls, Hubs | Computer Network Devices. | In classroom | Quiz + oral questions |
| 8 | 2 | Understanding packet routing within networks | Delivery and Forwarding of IP Packets. | In classroom | Quiz + oral questions |
| 9 | 2 | Understanding ARP protocol | Address Resolution Protocol (ARP). | In classroom | Quiz + oral questions |
| 10 | 2 | IPv6 addressing: structure and types | Network Layer , IPV6 addresses. | In classroom | Quiz + oral questions |
| 11 | 2 | Understanding wave propagation, Understanding the Fresnel equation | Free Space Wave Propagation – Friis Equation. | In classroom | Quiz + oral questions |
| 12 | 2 | | Midterm Exam | In classroom | Quiz + oral questions |

| | | | | | |
|----|---|--|---|--------------|-----------------------|
| 13 | 2 | Recognizing the power budget calculation at the receiver end | Wave Propagation – Related Power to Electrical field. | In classroom | Quiz + oral questions |
| 14 | 2 | Understanding the impact of radio waves after reflection from the ground | Ground Reflection and diffraction Part-1 | In classroom | Quiz + oral questions |
| 15 | 2 | Practical lecture | Ground Reflection and diffraction Part-2 | In classroom | Quiz + oral questions |

| | | | | | |

| Required textbooks (curricular books, if any) | Introduction to artificial neural systems, J. M. Zurada, West Publishing Co. (1992). |
| Recommended books | Fundamentals of neural networks: architectures, algorithms and applications, L. V. Fausett, Pearson Education India, (2006). |

Course Description Form

| | |
|---|---|
| 1. Course Name: | |
| Cell Biology | |
| 2. Course Code: | |
| MDER213 | |
| 3. Semester / Year: | |
| 1 st semester / 2 nd year | |
| 4. Description Preparation Date: | |
| April, 3, 2024 | |
| 5. Available Attendance Forms: | |
| In class | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | |
| Theory : 2 Hrs Units : 2 | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Dr. Ashwaq Mokhief Salmman Email: m.ash_aljbouri@yahoo.com | |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none">1. To introduce the fundamental principles of cell biology, including the organization of cells, their structure, and their function.2. To provide an understanding of the biochemical pathways that occur within cells, including metabolism, protein synthesis .3. To introduce the principles of cell division, including mitosis and meiosis, and how these processes contribute to the growth and development of organisms.4. To provide an understanding of the structure and function of cellular organelles such as the nucleus, mitochondria, endoplasmic reticulum, and Golgi apparatus.5. To introduce the principles of cellular communication, including the role of signaling molecules, receptors, and second messengers in cell signaling.6. Overall, the module aims to provide students with a strong foundation in cell biology, and to develop their understanding of the complex interactions that occur within cells. It also aims to provide students |

with an understanding of the fundamental processes that drive cell growth, division, and differentiation.

9. Teaching and Learning Strategies

Strategy

- Attend lectures and take detailed notes: Cell Biology is a complex subject, and attending lectures regularly and taking thorough notes is important to ensure that you don't miss any important information..
- Use visual aids: Cellular structures and processes can be complex and difficult to visualize. Using visual aids like diagrams, animations, and videos can help you understand and remember the material better.
- Focus on understanding the concepts: Cell Biology involves a lot of complex concepts, and memorization alone is not sufficient. Focus on understanding the concepts and how they relate to one another.
- Participate in discussions: Participating in class discussions and asking questions can help you understand the material better and stay engaged with the course.
- Use study guides and practice quizzes: Use study guides and practice quizzes to test the knowledge and identify areas where need to focus the studying.
- Collaborate with classmates: Working with other students can be an effective way to learn the material. Collaborate on problem sets, organize study groups, and help each other.
- Practice: Cell Biology involves a lot of memorization, so make sure to practice regularly.
- This will help become more confident in abilities and improve the understanding of cellular structures and processes over time
-

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|---|---|------------------------------|---|
| 1 | 2 | Introduction to the cell, theories of cell | Introduction to the cell, theories of cell | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Understand the types of cells. | types of cells | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Understand the prokaryotes, eukaryotes cells , cell shapes, cell size | Quiz One + prokaryotes, eukaryotes cells , cell shapes, cell size | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Understand The viruses | The viruses | Theory, discussions, quizzes | Final and Mid term exams, home works, |

| | | | | | |
|----|---|---|---|------------------------------|---|
| | | | | | and quizzes |
| 5 | 2 | Understand the the nucleus, cilia and flagella | the nucleus, cilia and flagella | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Understand the the plasma membrane | the plasma membrane | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Understand the Cytosol, Organelles , Cytoplasm | Cytosol, Organelles , Cytoplasm | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Understand the cytoplasmic inclusions | Mid-term Exam + cytoplasmic inclusions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Understand the cytoskeleton, centrosome | cytoskeleton, centrosome | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Understand the cell division;somatic cells division, reproductive cell division | cell division;somatic cells division, reproductive cell division | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Understand the ribosomes, lysosomes, peroxisomes | ribosomes, lysosomes, peroxisomes | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Understand the endoplasmic reticulum, mitochondria, the golgi apparatus | Quiz Three + the endoplasmic reticulum, mitochondria, the golgi apparatus | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | Understand the protein synthesis. | protein synthesis. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Understand the cell junction | cell junction | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | - | Preparatory week before the final Exam | Theory, discussions, quizzes | Final and Mid term exams, home works, |

| | | | | | |
|--|--|--|--|--|-------------|
| | | | | | and quizzes |
|--|--|--|--|--|-------------|

11 Course Evaluation :

Distributing the score out of 100 according to the following: mid-term exam 30 % , daily evaluation 10%, and final exam. 60 %

12. Learning and teaching Resources

| | |
|--|---|
| Required textbooks (curricular books, if any) | PRINCIPLES OF Cell Biology. George Plopper and Diana Bebek Ivankovic .Third edition,2021 |
| Recommended books | Karps Cell Biology. Janet Iwasa and Wallace Marshall. Global edition.2016 |

Course Description Form

| 1. Course Name: | | | | | |
|---|-------|---|---|------------------------------|---|
| ElectronicI | | | | | |
| 2. Course Code: | | | | | |
| MDER212 | | | | | |
| 3. Semester / Year: | | | | | |
| 1 st semester / second year | | | | | |
| 4. Description Preparation Date: | | | | | |
| April, 10, 2024 | | | | | |
| 5. Available Attendance Forms: | | | | | |
| In Class | | | | | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | | | | | |
| Theory : 2 Hrs Tutorial : 1 Practical : 3 Units : | | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | | |
| Name: Asst. Prof. Ali Shaban Hassooni Email: eng.ali.shaban@uobabylon.edu.iq | | | | | |
| 8. Course Objectives | | | | | |
| Course Objectives | | | Developing the skills of understanding, analyzing and designing electronic circuits for semiconductor diodes and BJT transistors and their practical applications | | |
| 9. Teaching and Learning Strategies | | | | | |
| Strategy | | <ul style="list-style-type: none"> Theory in class room. Practical in Lab. Quizzes and home works. | | | |
| 10. Course Structure | | | | | |
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
| 1 | 2 | Semiconductor Diodes: Unbiased PN Junction, Forward & Reverse Biased PN Junction, Diode Characteristics: Diode Equation, Diode Equivalent Circuits, Graphical Solution, | Semiconductor Diodes: Unbiased PN Junction, Forward & Reverse Biased PN Junction, Diode Characteristics: Diode Equation, Diode Equivalent Circuits, Graphical Solution, | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|---|---|------------------------------|---|
| 2 | 2 | Breakdown & Biasing a diode, Dc characteristics, power dissipation in a diode, Ripple Voltage and ripple factor, Zenor Diodes | Breakdown & Biasing a diode, Dc characteristics, power dissipation in a diode, Ripple Voltage and ripple factor, Zenor Diodes | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Diode Applications: Rectifiers, Half and full wave rectifiers, wave form shaping Capacitor Filter, Inductor smoothing, | Diode Applications: Rectifiers, Half and full wave rectifiers, wave form shaping Capacitor Filter, Inductor smoothing, | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | L-C smoothing, Clipping & Clamping Circuits, Voltage Regulation | L-C smoothing, Clipping & Clamping Circuits, Voltage Regulation | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Bipolar Junction Transistor (BJT): Operation of pnp and npn, Current Components, | Bipolar Junction Transistor (BJT): Operation of pnp and npn, Current Components, | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Characteristics of CE, CB & CC Configurations Operating Point and Operating Regions, | Characteristics of CE, CB & CC Configurations Operating Point and Operating Regions, | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Biasing the BJT: Fixed Bias, the emitter current, Base common emitter amplifier, Self-Bias Circuits | Biasing the BJT: Fixed Bias, the emitter current, Base common emitter amplifier, Self-Bias Circuits | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Equivalent circuit model, Dc analysis of transistor, Load line, h parameters in common emitter. | Equivalent circuit model, Dc analysis of transistor, Load line, h parameters in common emitter. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Biasing the BJT: DC bias with voltage feedback, DC or static characteristic of the transistor, Limitation of the transistor | Biasing the BJT: DC bias with voltage feedback, DC or static characteristic of the transistor, Limitation of the transistor | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Mid-term Exam + Design of dc bias circuits, design of current gain stabilized | Mid-term Exam + Design of dc bias circuits, design of current gain stabilized | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Small Signal Low Frequency Analysis: Transistor amplifier, Ac equivalent circuit Graphical Analysis, | Small Signal Low Frequency Analysis: Transistor amplifier, Ac equivalent circuit Graphical Analysis, | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Two Port Devices & The BJT Hybrid Model, Conversion Formulas, | Two Port Devices & The BJT Hybrid Model, Conversion Formulas, | Theory, discussions, | Final and Mid term exams, |

| | | | | | |
|----|---|--|--|------------------------------|---|
| | | | | quizzes | home works, and quizzes |
| 13 | 2 | Comparison of BJT Amplifier Configurations, Cascading Amplifiers, Simplified Models. | Comparison of BJT Amplifier Configurations, Cascading Amplifiers, Simplified Models. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Frequency response of RC coupled amplifier | Frequency response of RC coupled amplifier | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | high performance of RC coupled amplifier. | high performance of RC coupled amplifier. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following : mid term exam 30 % , daily evaluation 10%, practical 10% and final exam. 50 %

12. Learning and teaching Resources

| | |
|--|---|
| Required textbooks (curricular books, if any) | Electronic Devices and Circuit Theory 11th-ed Robert L. Boylestad Louis Nashelsky |
| Recommended books | INTEGRATED ELECTRONICS MILLMAN · HALKIAS. |
| Electronics References, Websites | https://books-world.net/electronic-devices-and-circuit-theory-11th-ed/ |

Course Description Form

| | |
|--|--|
| 1. Course Name: Second stage / English Language | |
| | |
| 2. Course Code: | |
| | |
| 3. Semester / Year: First - second | |
| | |
| 4. Description Preparation Date: 5-4- 2023 | |
| | |
| 5. Available Attendance Forms: Theory | |
| | |
| 6. Number of Credit Hours (Total) / Number of Units (Total): 2 Hours | |
| | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: <input type="text" value="Abeer Abd Al-Hameed Mahmood"/> | |
| Email: <input type="text" value="Eng.abeer.abd@uobabylon.edu.iq"/> | |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none">1. To enable the students to communicate effectively and appropriately in real life situation.2. To use English effectively for study purpose across the curriculum;3. To develop interest in and appreciation of Literature;4. To develop and integrate the use of the four language skills i.e. Reading, Listening, Speaking and Writing;5. to revise and reinforce structure already learnt.6. Students will have the opportunity to consider aspects of current English language teaching theory and develop their awareness of how these theories translate to the classroom to influence teaching practice. |
| 9. Teaching and Learning Strategies | |

| | |
|-----------------|--|
| Strategy | <p>Focus on academic language, literacy and vocabulary</p> <p>Link background knowledge and culture to learning</p> <p>Increase comprehensible input and language output</p> <p>Promote classroom interaction</p> |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|-------------|--------------|-----------------------------------|---|------------------------|--------------------------|
| 1 | 2 | | Unit 1 – Getting to know you (tenses, Questions, Social expression, Using a bilingual dictionary) | Theory | |
| 2 | 2 | | Complete Unit 1 - (Social expression) | Theory | |
| 3 | 2 | | Unit 2 – The way we live (collection – daily life, Making conversation) | Theory | |
| 4 | 2 | | Complete Unit 2 – | Theory | |
| 5 | 2 | | Unit 3 – Past tenses, Word formation | Theory | |

| | | | | | |
|----|---|--|--|--------|--|
| 6 | 2 | | Complete Unit 3 – (Time expression) | Theory | |
| 7 | 2 | | Unit 4 – Let's go shopping! (much / many, some / any, a few, a little, a lot of, | Theory | |
| 8 | 2 | | Complete unit 4 -Articles | Theory | |
| 9 | 2 | | Unit 5 – What do you want to do? (Verb Patterns 1, future forms) | Theory | |
| 10 | 2 | | Complete Unit 5- (Hot verbs and how do you feel?) | Theory | |
| 11 | 2 | | Mid Exam | Theory | |
| 12 | 2 | | Unit 6 – Tell me! What's it like? (what ... like?, comparative and superlatives) | Theory | |

| | | | | | |
|----|---|--|---|--------|--|
| 13 | 2 | | Complete Unit 6 - (synonyms and antonyms, directions) | Theory | |
| 14 | 2 | | Review | Theory | |
| | | | | | |

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

12. Learning and Teaching Resources

| | |
|---|--------------------------------------|
| Required textbooks (curricular books, if any) | Pre- intermediate |
| Main references (sources) | New- Headway English course / Oxford |
| Recommended books and references (scientific journals, reports...) | |
| Electronic References, Websites | |

Course Description Form

| | |
|--|---|
| 1. Course Name: Second Stage / Information Technology | |
| | |
| 2. Course Code: | |
| | |
| 3. Semester / Year: First - second | |
| | |
| 4. Description Preparation Date: 5-4-2024 | |
| | |
| 5. Available Attendance Forms: Theory and Practical | |
| | |
| 6. Number of Credit Hours (Total) / Number of Units (Total): 3 Hours | |
| | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: | Abeer Abd Alhameed Mahmood |
| Email: | Eng.abeer.abd@uobabylon.edu.iq |
| 8. Course Objectives | |
| Course Objectives | <p>1- Fundamental IT Knowledge: Understand the basic concepts, principles, and components of information technology. Gain knowledge of computer hardware, software, networks, and data management.</p> <p>2- Programming Skills: Learn operating system such as MS_DOS and WINDOWS and learn about programming languages relevant to the course, such as Matlab programming.</p> <p>3- Networking Concepts: Learn the basics of computer networks and protocols. Understand network architecture, security, and troubleshooting.</p> <p>Information Security: Understand the principles of information security. Learn about common security threats, encryption, and best practices for securing data and systems.</p> <p>Emerging Technologies:</p> |

| | |
|--|--|
| | <p>Stay updated on current trends and emerging technologies in the IT field. Explore topics like artificial intelligence, machine learning, cloud computing, and the Internet of Things (IoT).</p> <p>Professional Communication: Enhance written and verbal communication skills, especially in the context of conveying technical information to non-technical stakeholders.</p> |
|--|--|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | This course prepares students for a career in information technology by providing them with a comprehensive set of skills and knowledge relevant to the field. |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|-------------|--------------|-----------------------------------|--|------------------------|--------------------------|
| 1 | 3 | | Introduction to Information technology | Theory & Practical | |
| 2 | 3 | | Basic concept of Information technology | Theory & Practical | |
| 3 | 3 | | Computer Hardwar (theoretical and practical) | Theory & Practical | |
| 4 | 3 | | Computer software (theoretical and practical) | Theory & Practical | |

| | | | | | |
|----|---|--|-------------------------------|--------------------|--|
| 5 | 3 | | Digital Domain | Theory & Practical | |
| 6 | 3 | | Digital Domain | Theory & Practical | |
| 7 | 3 | | Logic Gates | Theory & Practical | |
| 8 | 3 | | 1 Mid Exam | Theory & Practical | |
| 9 | 3 | | Fundamentals of Communication | Theory & Practical | |
| 10 | 3 | | Networking | Theory & Practical | |
| 11 | 3 | | Local Area Network | Theory & Practical | |

| | | | | | |
|----|---|--|-------------------------|--------------------|--|
| 12 | 3 | | Wide Area Network | Theory & Practical | |
| 13 | 3 | | Wireless Communication | Theory & Practical | |
| 14 | 3 | | Communication protocols | Theory & Practical | |
| 15 | 3 | | 2 Mid Exam | | |

| | | | | | |
|--|--|--|--|--|--|
| | | | | | |
| 11. Course Evaluation | | | | | |
| Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc | | | | | |
| 12. Learning and Teaching Resources | | | | | |

Course Description Form

| | |
|--|--|
| 1. Course Name: | |
| Mathematics III | |
| 2. Course Code: | |
| MATH210 | |
| 3. Semester / Year: | |
| 1 st semester / 2 nd year | |
| 4. Description Preparation Date: | |
| April, 3, 2024 | |
| 5. Available Attendance Forms: | |
| In class | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | |
| Theory : 2 Hrs ,1 Tut Units : 2 | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Mr. Ali Talib Jawad Email: eng.ali.talib@uobabylon.edu.iq | |
| 8. Course Objectives | |
| <p>Course Objectives</p> | <ol style="list-style-type: none"> 1. Memorize change of coordinate formulae between rectangular, cylindrical, and spherical coordinate systems. 2. Convert equations between rectangular, cylindrical and spherical coordinate systems. 3. Perform geometric operations on vectors: addition, subtraction, multiplication by a scalar, dot product, and cross product. 4. Memorize formulae for length and direction of vector. 5. Compute dot and cross products given either algebraic or geometric information. 6. Memorize formulae for parametric equation of a line in space and explain geometrical and physical interpretations 7. Given information in a variety of ways, find the critical information needed to write the equation of a plane; namely, a point and a normal vector. |

| | |
|--|--|
| | <ol style="list-style-type: none"> 8. Solve geometric problems involving vectors. 9. Prove basic algebraic properties of vectors. 10. Gain deeper knowledge of multivariate differentiation operations such as Gradient, Divergent and Curl, and Jacobians. 11. Calculate first and second partial derivatives. 12. Compute double and triple integrals. 13. Recognize 1st order equations that can be solved by each of the three methods: separation of variables, linear equations, and exact equations, and use the appropriate method to solve them. 14. Use ∇-first-order differential equation as a mathematical model in some engineering applications. 15. Solve linear and nonlinear higher-order differential equations as well as systems of linear first-order differential equations. 16. Solve first-order differential equation numerically.. |
|--|--|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | <ul style="list-style-type: none"> • In this classroom, active learning techniques are employed and the focus is placed on more challenging problems. Teams work together in class to come up with a result and explain why it makes sense to use a more formal writing style. Outside of class, students individually practice problem-solving skills. |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|--|---|------------------------------|---|
| 1 | 2 | Understand the 3-D system coordinates: Cartesian, Cylindrical, and Spherical Coordinates, distance between two points in space, equation of sphere in space. | Integration Problems Using Basic Integration Formulas | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Understand the Vectors form, vector algebra operations, unit vector, and vector applications. | Integration Problems Using by Parts Method | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Understand the Dot product , cross product, and triple scalar or box product . | Integration Problems Using Trigonometric Integral Method | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|--|--|------------------------------|---|
| 4 | 2 | Understand the Lines in space and planes in space. | Integration Problems Using Integration by Trigonometric Substitutions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Understand the Del and Curl operators, First order partial differentiation, Second order partial differentiation, and Jacobians. | Integration Problems Using Integration by Partial Fractions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Understand the Multiple integrals, double integrals, and triple integrals. | Improper Integrals. Convergence and Divergence Theorem | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Mid-term Exam, Introduction to Differential Equations. | Mid-term Exam, Basic fundamentals of Sequences and Series. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Understand the First-Order Differential Equations, separable variables equations, linear equations, and exact equations. | Sequences, Convergence and Divergence of Sequences, Bounded Monotonic Sequences, Infinite Series, Geometric Series | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Understand Modeling with First-Order Differential Equations: Linear Models and Nonlinear Models. | Power Series, Infinite Taylor Series, Infinite Maclaurin Series | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Understand the Modeling with First-Order Differential Equations: Modeling with Systems of First-Order DEs. | Matrices, Determinants, Definition of Matrix, Properties, Special Matrices | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Understand the Higher-Order Differential Equations, Homogeneous and Nonhomogeneous Equations. | Matrix Algebra, Definition of Determinant, Properties, Cofactors and Cominors | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Understand the Modeling with Higher-Order Differential Equations: Linear Models and Nonlinear Models. | Evaluation of determinants, Inverse of Matrix | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|---|---|------------------------------|---|
| 13 | 2 | Understand the Systems of Linear First-Order Differential Equations, Homogeneous Linear Systems. | Solving systems of linear equations using Matrices (1). | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Understand the Systems of Linear First-Order Differential Equations, Nonhomogeneous Linear Systems. | Solving systems of linear equations using Matrices (2). | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | Understand the Numerical Solutions of Ordinary Differential Equations. | Application of Matrices in Engineering. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following: mid-term exam 30 % , daily evaluation 10%, and final exam. 60 %

12. Learning and teaching Resources

| | |
|---|--|
| Required textbooks (curricular books, if any) | 1 .University Calculus Early Transcendentals Fourth Edition in SI Units, 2020. 2. “A First Course in Differential Equations with Modeling Applications, Eleventh Edition”, Dennis G. Zill, 2018. |
| Recommended books | 1“ .Classical Vector Algebra”, Vladimir Lepetic, 2023 2. A First Course in Differential Equations, Modeling, and Simulation Second Edition. Carlos A. Smith and Scott W. Campbell, 2016. |
| websites | https://www.amazon.com/University-Calculus-Early-Transcendentals-Units/dp/1292317302 https://www.amazon.com/Course-Differential-Equations-Modeling-Applications/dp/1305965728 |

Course Description Form

| | |
|---|---|
| 1. Course Name: Engineering Mechanics I | |
| 2. Course Code: BMER210 | |
| 3. Semester/first / Year: 2023-2024 | |
| 4. Description Preparation Date: 24/12/2023 | |
| 5. Available Attendance Forms: Presence | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: <div style="border: 1px solid black; padding: 2px; display: inline-block;">Ali Sadik Gafer Qanber</div> | |
| Email: <div style="border: 1px solid black; padding: 2px; display: inline-block;">ali.sadigj@uobabylon.edu.iq</div> | |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none">1. To understand the principles and concepts of mechanics, including force systems, equilibrium, and motion.2. To develop the ability to analyze two and three-dimensional systems and apply appropriate mathematical techniques.3. To apply the principles of force systems to solve problems involving moments, couples, and resultants.4. To construct and interpret free-body diagrams to analyze equilibrium conditions in two dimensions.5. To gain proficiency in analyzing and evaluating the behavior of structures, such as plane trusses and frames. |

| | |
|--|---|
| | <ol style="list-style-type: none"> 6. To apply the principles of friction to solve problems related to forces and frictional interactions. 7. To understand the concept of center of mass and its application in analyzing systems with distributed forces. |
|--|---|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | <p>Lectures: Traditional lectures can be used to introduce new concepts, explain theoretical principles, and provide a foundation for understanding the course material. Instructors can use multimedia presentations, demonstrations, and real-life examples to enhance the learning experience.</p> <p>Problem-Based Learning: Encourage students to actively engage with the course material by presenting them with real-world problems or case studies that require the application of the concepts they have learned. This approach fosters critical thinking and problem-solving skills.</p> <p>Interactive Discussions: Engage students in class discussions to promote deeper understanding and critical thinking. Encourage them to ask questions, share their perspectives, and engage in collaborative problem-solving activities. This strategy allows students to learn from each other and develop their communication skills.</p> <p>Hands-on Activities and Experiments: Incorporate practical activities, laboratory experiments, or simulations to provide students with a hands-on experience and reinforce theoretical concepts. This approach helps students develop a better understanding of the subject matter through direct engagement and observation.</p> <p>Group Projects: Assign group projects or assignments that require students to work collaboratively to solve complex problems or design engineering solutions. This strategy promotes teamwork, communication, and enhances problem-solving skills.</p> <p>Use of Technology: Integrate technology tools and resources such as interactive simulations, virtual laboratories, online resources, and educational software to enhance learning. These tools can provide visual representations, interactive exercises, and immediate feedback to facilitate understanding and engagement.</p> <p>Assessments: Use a variety of assessment methods, including quizzes, assignments, exams, and project presentations, to evaluate students' understanding of the material. Provide timely and constructive feedback to help students identify areas for improvement.</p> |
|-----------------|--|

Real-World Applications: Relate the course material to real-world applications and examples. This helps students understand the practical relevance of the concepts being taught and enhances their motivation and engagement.

Active Learning Strategies: Encourage active learning through activities such as problem-solving exercises, group discussions, role-playing, concept mapping, and peer teaching. These strategies promote deeper engagement with the material and enhance retention and understanding.

Office Hours and One-on-One Support: Provide opportunities for individualized support and clarification through office hours or virtual consultations. This allows students to seek assistance with specific questions or difficulties they may encounter.

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|-------------|--------------|---|--|------------------------|---|
| 1 | 3 | 1. Understand the fundamental concepts of forces, including vector representation and the analysis of two-dimensional force systems. 2. Demonstrate proficiency in calculating moments, couples, and the resultant forces in a system. 3. Apply the conditions for equilibrium to solve statics problems in two dimensions. 4. Construct free-body diagrams and use them to analyze forces | Introduction into Two and Three Dimensional Systems, | Presence | Attending 5 + Quiz 5 + midterm exam 30 + final exam 60 = 100 |
| 2 | 3 | | Force Systems: Two-Dimensional Force System. | Presence | |
| 3 | 3 | | Moment, | Presence | |
| 4 | 3 | | Couple. | Presence | |
| 5 | 3 | | Resultants, | Presence | |
| 6 | 3 | | Equilibrium. | Presence | |
| 7 | 3 | | Free-body Diagrams, | Presence | |
| 8 | 3 | | Equilibrium | Presence | |
| 9 | 3 | | Conditions: Two-dimensions. | Presence | |
| 10 | 3 | | Structures: Plane Trusses, | Presence | |

| | | | | | |
|----|---|---|---|----------|--|
| 11 | 3 | acting on objects in equilibrium. | Frames. | Presence | |
| 12 | 3 | 5. Analyze structures such as trusses and frames to determine their stability and internal forces. | Fluid Static, Friction, Application of Friction: Belts. | Presence | |
| 13 | 3 | | | Presence | |
| 14 | 3 | | Distributed Forces, | Presence | |
| 15 | 3 | 6. Apply principles of friction to solve problems involving systems with belts. | Center of Mass. | Presence | |
| | | 7- Calculate the center of mass for objects and understand its significance in equilibrium and motion analysis. | | | |

11 Course Evaluation

Attending 5 + Quiz 5 + midterm exam 30 + final exam
60 = 100

دليل وصف البرنامج الأكاديمي والمقرر

المقدمة:

يُعد البرنامج التعليمي بمثابة حزمة منسقة ومنظمة من المقررات الدراسية التي تشتمل على إجراءات وخبرات تنظم بشكل مفردات دراسية الغرض الأساس منها بناء وصقل مهارات الخريجين مما يجعلهم مؤهلين لتلبية متطلبات سوق العمل يتم مراجعته وتقييمه سنوياً عبر إجراءات وبرامج التدقيق الداخلي أو الخارجي مثل برنامج الممتحن الخارجي.

يقدم وصف البرنامج الأكاديمي ملخص موجز للسمات الرئيسية للبرنامج ومقرراته مبيناً المهارات التي يتم العمل على اكسابها للطلبة مبنية على وفق اهداف البرنامج الأكاديمي وتتجلى أهمية هذا الوصف لكونه يمثل الحجر الأساس في الحصول على الاعتماد البرامجي ويشترك في كتابته الملاكات التدريسية بإشراف اللجان العلمية في الأقسام العلمية.

ويتضمن هذا الدليل بنسخته الثانية وصفاً للبرنامج الأكاديمي بعد تحديث مفردات وفقرات الدليل السابق في ضوء مستجدات وتطورات النظام التعليمي في العراق والذي تضمن وصف البرنامج الأكاديمي بشكلها التقليدي نظام (سنوي، فصلي) فضلاً عن اعتماد وصف البرنامج الأكاديمي المعمم بموجب كتاب دائرة الدراسات ت م ٢٩٠٦/٣ في ٢٠٢٣/٥/٣ فيما يخص البرامج التي تعتمد مسار بولونيا أساساً لعملها.

وفي هذا المجال لا يسعنا إلا أن نؤكد على أهمية كتابة وصف البرامج الأكاديمية والمقررات الدراسية لضمان حسن سير العملية التعليمية.

مفاهيم ومصطلحات:

وصف البرنامج الأكاديمي: يوفر وصف البرنامج الأكاديمي إيجازاً مقتضباً لرؤيته ورسالته وأهدافه متضمناً وصفاً دقيقاً لمخرجات التعلم المستهدفة على وفق استراتيجيات تعلم محددة.

وصف المقرر: يوفر إيجازاً مقتضباً لأهم خصائص المقرر ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهنماً عما إذا كان قد حقق الاستفادة القصوى من فرص التعلم المتاحة. ويكون مشتق من وصف البرنامج.

رؤية البرنامج: صورة طموحة لمستقبل البرنامج الأكاديمي ليكون برنامجاً متطوراً وملهماً ومحفزاً وواقعياً وقابلاً للتطبيق.

رسالة البرنامج: توضح الأهداف والأنشطة اللازمة لتحقيقها بشكل موجز كما يحدد مسارات تطور البرنامج واتجاهاته.

اهداف البرنامج: هي عبارات تصف ما ينوي البرنامج الأكاديمي تحقيقه خلال فترة زمنية محددة وتكون قابلة للقياس والملاحظة.

هيكلية المنهج: كافة المقررات الدراسية / المواد الدراسية التي يتضمنها البرنامج الأكاديمي على وفق نظام التعلم المعتمد (فصلي، سنوي، مسار بولونيا) سواء كانت متطلب (وزارة، جامعة، كلية وقسم علمي) مع عدد الوحدات الدراسية.

مخرجات التعلم: مجموعة متوافقة من المعارف والمهارات والقيم التي اكتسبها الطالب بعد انتهاء البرنامج الأكاديمي بنجاح ويجب أن يُحدد مخرجات التعلم لكل مقرر بالشكل الذي يحقق اهداف البرنامج.

استراتيجيات التعليم والتعلم: بأنها الاستراتيجيات المستخدمة من قبل عضو هيئة التدريس لتطوير تعليم وتعلم الطالب وهي خطط يتم إتباعها للوصول إلى أهداف التعلم. أي تصف جميع الأنشطة الصفية واللاصفية لتحقيق نتائج التعلم للبرنامج.

١. رؤية البرنامج

تتمثل رؤية قسم الهندسة الطبية الحيوية في إنشاء برنامج أكاديمي مبتكر ومتعدد التخصصات يركز على أساسيات الهندسة الطبية الحيوية. أحدث التطبيقات المتعلقة بالأجهزة الطبية الحيوية، والميكانيكا الحيوية، والمواد الحيوية، والتكنولوجيا الحيوية، والحوسبة الحيوية وغيرها من المجالات المتعلقة بالرعاية الصحية في بيئة من التعلم والبحث مدى الحياة.

. رسالة البرنامج

تتمثل مهمة قسم الهندسة الطبية الحيوية في توفير بيئة تتمحور حول الطالب وتسهل ثقافة التعلم والابتكار متعدد التخصصات، مع تشجيع المشاركة النشطة في الأنشطة العلمية والمهنية لخدمة مهنة الهندسة الطبية الحيوية والمجتمع، مع النهوض بالقتصاد الإقليمي.

. اهداف البرنامج

توفر مواصفات البرنامج هذه ملخضا موجزا للميزات الرئيسية للبرنامج ونتائج التعلم التي من المتوقع بشكل معقول من الطالب النموذجي تحقيقها وإثبات ما إذا كان يستفيد بشكل كامل من فرص التعلم المتوفرة. وهو مدعوم بمواصفات لكل دورة تساهم في البرنامج.

٤. الاعتماد البرامجي

ABET

. المؤثرات الخارجية الأخرى

التوجد جهة راعية

٦. هيكلية البرنامج

| ملاحظات * | النسبة المئوية | وحدة دراسية | عدد المقررات | هيكل البرنامج |
|-----------|----------------|-------------|-------------------------|-----------------|
| - | 8.621% | 15 | 9 | متطلبات المؤسسة |
| | 7.471% | 13 | 7 | متطلبات الكلية |
| | 83.908% | 146 | 60 | متطلبات القسم |
| | | | 1 | التدريب الصيفي |
| | | | ورش عمل وزيارات ميدانية | أخرى |

7. وصف البرنامج

| الساعات المعتمدة | | اسم المقرر او المساق | رمز المقرر او المساق | السنة / المستوى |
|------------------|------|----------------------------|----------------------|--------------------------------|
| عملي | نظري | | | |
| 0 | 1 | اللغة العربية | UREQ211 | المرحلة الثانية /الفصل الول |
| 0 | 1 | اللغة النكليزية III | UREQ212 | المرحلة الثانية /الفصل الول |
| 0 | 2 | الرياضيات III | MATH210 | المرحلة الثانية /الفصل الول |
| 2 | 1 | تقنيات المعلومات | CREQ210 | المرحلة الثانية /الفصل الول |
| 0 | 2 | الميكانيك الهندسي I | MDER210 | المرحلة الثانية /الفصل الول |
| 2 | 2 | علوم المواد | MDER211 | المرحلة الثانية /الفصل الول |

| 3 | 2 | الميكانيك الحيوي II | MDER420 | المرحلة الرابعة /الفصل الثاني |
| 0 | 2 | المواد الحيوية II | MDER421 | المرحلة الرابعة /الفصل الثاني |
| 3 | 2 | التصاللت II | MDER422 | المرحلة الرابعة /الفصل الثاني |
| 0 | 2 | الميكانيك الحصائي | MDER423 | المرحلة الرابعة /الفصل الثاني |
| 2 | 2 | الجهزة التشخيصية | MDER424 | المرحلة الرابعة /الفصل الثاني |
| 3 | 2 | الالكترونيك رقمي II | MDER425 | المرحلة الرابعة /الفصل الثاني |
| 2 | 2 | ميكانيك موانع الحرارة II | MDER 426 | المرحلة الرابعة /الفصل الثاني |
| 0 | 2 | DR.AMER | MDER510 | المرحلة الخامسة /الفصل الول |

| | | | | |
|---|---|---------------------|---------|-------------------------------|
| 2 | 2 | اجهزة شخصية | MDER511 | المرحلة الخامسة /الفصل الول |
| 2 | 2 | السيطرة I | MDER512 | المرحلة الخامسة /الفصل الول |
| 2 | 2 | معالجة صوتية | MDER513 | المرحلة الخامسة /الفصل الول |
| 3 | 2 | المعالج | MDER514 | المرحلة الخامسة /الفصل الول |
| 0 | 2 | نظم وتصميم المستشفى | MDER515 | المرحلة الخامسة /الفصل الول |
| 4 | 0 | المشروع I | MDER516 | المرحلة الخامسة /الفصل الول |
| 0 | 2 | ELECTIVE ii | MDER520 | المرحلة الخامسة /الفصل الثاني |
| 3 | 2 | السيطرة II | MDER522 | المرحلة الخامسة /الفصل الثاني |
| 0 | 2 | شبيكات الحاسوب | MDER523 | المرحلة الخامسة /الفصل الثاني |
| 0 | 2 | الميكانيك الحثكك | MDER524 | المرحلة الخامسة /الفصل الثاني |
| 0 | 2 | الشبيكات العصبية | MDER525 | المرحلة الخامسة /الفصل الثاني |
| 0 | 2 | متحسسات طبية | MDER526 | المرحلة الخامسة /الفصل الثاني |
| 4 | 0 | المشروع II | MDER527 | المرحلة الخامسة /الفصل الثاني |

| ٨. مخرجات التعلم المتوقعة للبرنامج | |
|--|--|
| لمعرفة | |
| التعرف على الجهزة اللكترونية وطريقة صيانتها | لتعرف على مفهوم الهندسة الطبية الحيوية ودراسة وفهم الطراف الاصطناعية . |
| لمهارات | |
| الأهداف المهاراتية الخاصة بالبرنامج | معرفة الطالب بمفهوم الدائرة اللكترونية . |
| قدرة الطالب على تحليل دوائر وأنظمة الأجهزة الطبية. | |
| لقيم | |
| مقالات بين المعلم والطالب: يجاب أن ون الثقة والاحترام والنصاف أساساً لكل تفاعل. ترشاد العادات الخلقية المعلمين لى ت عزيز بينات لالتفاع الالم ا مالن الة والداعة حيث يشعر ل الطالب باناءالم | الصدق: سمة مهمة جداً يجب توفرها في التعليم. الصدق يعني أن تكون مخلصاً وصادقاً وجدياً بالثقة ومخلصاً وعادلاً. إنه أمر مثير لإعجاب في العديد من الثقافات والديان |

| | |
|-------------------------------------|--|
| مسائل الامتحان او عالون ومقدرون. | المسؤولية: تعد المسؤولية، إلى جانب كافة الخالقيات، إحدى الخالقيات الحيوية في التعليم. تقع مسؤولية الطالب عندما يقوم الطالب بدور نشط في دراستهم من خلال الاعتراف ب نهم .مسؤولون عن نجاحهم الأكاديمي |
| | أخالفات تضارب المصالح في التعليم هي حالة يتم فيها التفاوض على مسؤوليتك الرئيسية تجاه الطالب من خلال إشراك الولويات. يمكن أن يظهر تضارب المصالح في مجموعة متنوعة من السياقات ولعدة أسباب مختلفة |

| 9. استراتيجيات التعليم والتعلم |
|---|
| <p>1- التواصل اللفظي</p> <p>التواصل اللفظي - الطالب قادر على التعبير عن أفكاره بوضوح وثقة بالكالم الفترة على التعبير عن الأفكار بوضوح والثقة في الحديث -</p> <p>2- العمل الجماعي</p> <p>العمل بثقة ضمن المجموعة العمل بروح الفريق الواحد - العمل بثقة ضمن المجموعة -</p> <p>3- التحليل والتحقيق</p> <p>المعلومات بشكل منهجي إثبات الحقائق والمبادئ. مشكلة حل: التحليل والتحقيق - جمع المعلومات بشكل منهجي وعلمي إثبات الحقائق و - مبادئ حل المشكلة</p> <p>المبادرة/التحفيز الذاتي 4- قادر على</p> <p>التصرف بنا " على المبادرة وتحديد الفرص والاستباقية في وضعها أفكار وحلول متقدمة مبادرة - الدافع للعمل والقدرة على المبادرة وتحديد الفرص - وتطوير الأفكار والحلول التصاالت الكتابية.5</p> |

| 10. طرائق التقييم |
|---|
| <p>1. الامتحانات</p> <p>2. مناقشة المشروع</p> <p>3. التدريب الصيفي</p> <p>4. الاختبارات العملية</p> |

| | | | | |
|----------------------|------|--------|-------|------------------------|
| 11. الهيئة التدريسية | | | | |
| اعضاء هيئة التدريس | | | | |
| الرتبة العلمية | | التخصص | | اعداد الهيئة التدريسية |
| عام | دقيق | مالك | محاضر | |
| 7 | 20 | 27 | 10 | |

| | |
|--|--|
| التطوير المهني | |
| توجيه اعضاء هيئة التدريس الجدد | |
| تمر عاقلات التوجيه الناجحة بربع مراحل: الإعداد، والتفاوض، وتمكين النمو، والإعلاق. تعتمد هذه المراحل المتسلسلة على بعضها البعض وتختلف في الطول. في كل مرحلة، هناك خطوات واستراتيجيات محددة تؤدي إلى التميز في التوجيه | |
| التطوير المهني لعضاء هيئة التدريس | |
| الحيوية على التكامل المستمر بين مبادئ الهندسة الكالسيكية والحديثة مع علوم الحياة والرعاية الصحية. يطبق مهندسو الطب الحيوي هذه المهارات على الابتكار في صناعة الرعاية الصحية، والعلوم البيولوجية الأساسية، ودعم الممارسة الطبية | |
| يهدف برنامج بكالوريوس العلوم في الهندسة الطبية الحيوية إلى تخريج مهندسين عالميين يساهمون، بعد التخرج، في التنمية الاجتماعية والاقتصادية من خلال تطبيق الهندسة لحل المشاكل. في الطب والبيولوجيا | |

| |
|------------------|
| 12. معيار القبول |
| مركزي |

| |
|--------------------------------|
| 13. اهم مصادر معلومات البرنامج |
| موقع الكلية والجامعة |
| دليل الجامعة اهم |
| الكتب والمصادر الخاصة بالقسم |

| |
|---|
| 14. خطة تطوير البرنامج |
| يتم تطوير البرنامج الكاديمي سنويا من خلال تحديث سنوي للمقررات الدراسية والمفردات التي تواكب التطور العلمي الحاصل في المجال الطبي والالكتروني والذي يتواءم مع احتياجات سوق العمل . |

مخطط مهارات البرنامج

مخرجات التعلم المطلوبة من البرنامج

| القيم | | | | المهارات | | | | المعرفة | | | | اساسي أم اختياري | اسم المقرر | رمز المقرر | السنة / المستوى |

نموذج وصف المقرر

| | |
|--|--|
| ١. اسم المقرر : | |
| لغة العربية | |
| ٢. رمز المقرر : | |
| UREQ211 | |
| ٣. الفصل / السنة : | |
| الفصل الأول / المرحلة الثانية | |
| ٤. تاريخ إعداد هذا الوصف | |
| 2024/4/3 | |
| ٥. أشكال الحضور المتاحة | |
| ٦. عدد الساعات الدراسية (الكلية / عدد الوحدات (الكلية) | |
| نظري : 1 ساعة عدد الوحدات : 1 | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم : م.م. هبة اليمينيل : | |
| ٨. اهداف المقرر | |
| اهداف المادة الدراسية | <p>١. - تقوية القدرة اللغوية لدى الطلبة واكسابهم مهارة التعبير الصحيح. 2- تقوية ملكة الطلبة الدبية لتذوق وادراك مواطن الجمال فيها . 3- تنمية قدرة الطلبة على فهم المادة المقروءة وتنمية مهاراتهم الخطية والمالئية لغرض الكتابة الصحيحة باستعمال عالمات</p> <p>4- الترفيم . مساعدة الطلبة على التعبير الصحيح 5- وضبط اساليبيهم اكساب الطلبة قدرات نحوية تمكنهم من تقويم السننهم عند القراءة .</p> |

| | |
|--|--|
| <p>تنمية الثروة اللغوية للطلبة وتزويدهم بكثير من اللفاظ بفضل ما يعرض عليهم من امثلة واساليب . 7- تدريب الطلبة على حسن الداء وجودة اللقاء . 8- الربط بين مواد اللغة العربية بجميع فروعها . 9- التعرف على مواطن الضعف عند الطلبة في رسم الكلمات والعمل على معالجتها 10- تنمية الذوق الفني لدى الطلبة بما يطلعون عليه من نماذج وما يمارسونه من كتابات .</p> | |
|--|--|

٩. استراتيجيات التعليم والتعلم

| | |
|--|--|
| <p>الاستراتيجية</p> <p>• 1- اتباع اسلوب التدريس الحديث لدروس اللغة العربية للقضاء على صعوبة وجمود بعض مواضيع هذه الدروس ,وإيصال الفكرة والمعلومة للطلبة بطرق مفهومة كالحوار المباشر بين التدريسي والطلبة وبالتالي تحفيزهم على التفكير من خلال طرح الأسئلة التفاعلية من قبل التدريسي . و ثم اتاحة فرصة النقاش بين الطلبة انفسهم لاستفادة من محتوى الموضوع ,وتشجيع الطلبة على التعاون وزيادة اهتمامهم تجاه المواضيع المختلفة وتنمية الابداع لديهم.</p> <p>• 2-امكانية استخدام التكنولوجيا والطرق الحديثة بالتدريس كاستخدام البور بوينت بالصوت والصور لتميز المعلومات.</p> <p>• 3-تكليف الطلبة بإعداد بحوث وتقارير بشكل فردي او على شكل مجموعات للتعبير عن مواهبهم والوقوف على الأخطاء التي تم ارتكابها وبالتالي يستفاد الطالب من هذه الأخطاء وتصحيحها لترسخ في اذهانهم .</p> | |
|--|--|

١٠. بنية المقرر

| الأسبوع | الساعات | مخرجات التعلم المطلوبة | اسم الوحدة او الموضوع | طريقة التعلم | طريقة التقييم |
|---------|---------|--|---|--|---|

١١. تقييم المقرر

توزع الدرجة من 100 على النحو التالي: الامتحان النصفى 30%، التقييم اليومي 10%، والختبار النهائي.
60%

١٢. مصادر التعلم والتدريس

1. الصوت اللغوية / الدكتور ابراهيم انيس 2. شرح
- ابن عقيل على الفية ابن مالك ج1/ المؤلف: ابن عقيل- تحقيق: محمد محي الدين عبد الحميد
3. فقه اللغة / الدكتور علي عبد الواحد وافي

نموذج وصف المقرر

| | |
|--|---|
| ١. اسم المقرر : | |
| بيولوجيا الخلية | |
| ٢. رمز المقرر : | |
| MDER213 | |
| ٣. الفصل / السنة : | |
| الفصل الول / المرحلة الثانية | |
| ٤. تاريخ إعداد هذا الوصف | |
| 2024/4/1 | |
| ٥. أشكال الحضور المتاحة | |
| 6. عدد الساعات الدراسية (الكلية) / عدد الوحدات (الكلية) | |
| نظري : 2 ساعة عدد الوحدات : 2 | |
| 7. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم : د. أشواق مخيف سلمان اليميل : m.ash_aljbouri@yahoo.com | |
| ٨. أهداف المقرر | |
| أهداف المادة الدراسية | التعريف بالمبادئ الأساسية لبيولوجيا الخلية، بما في ذلك تنظيم الخاليا وبنيتها 2. ووظيفتها توفير فهم للمسارات البيوكيميائية التي تحدث داخل الخاليا، بما في ذلك عملية التمثيل الغذائي، وتخليق البروتين. 3. التعريف بمبادئ انقسام الخاليا، بما في ذلك الانقسام والنقسام الختزالي، وكيف تساهم هذه العمليات في نمو وتطور الكائنات 4. الحية توفير فهم لبنية ووظيفة العضيات الخلوية مثل النواة الميتوكوندريا والشبكة إندوبلازمية وجهاز جولجي. |

| | |
|--|---------------------|
| <p>التعريف بمبادئ الاتصال الخلوي، بما في ذلك دور جزيئات الإشارة والمستقبلات والرسل الثاني في إرسال الإشارات الخلوية. 6. بشكل عام، تهدف الوحدة إلى تزويد الب بأساس قوي في بيولوجيا الخلية، وتطوير فهمهم للتفاعلات المعقدة التي تحدث داخل الخاليا. ويهدف أيَّ حَلِّ إلى تزويد الطالب بفهم للعمليات الأساسية التي تدفع نمو الخاليا، والنقسام، والتمايز.</p> | |
| <p>٩. استراتيجيات التعليم والتعلم</p> | |
| <p>المهم حضور المحاضرات بانتظام وتدوين الملاحظات الدقيقة لضمان عدم تفويت أي معلومات مهمة.</p> <ul style="list-style-type: none"> ● حضور المحاضرات وتدوين الملاحظات التفصيلية: بيولوجيا الخلية موضوع معقد، ومن ● استخدام الوسائل البصرية: يمكن أن تكون الهياكل والعمليات الخلوية معقدة ويصعب تصورها. يمكن أن يساعدك استخدام الوسائل المرئية مثل الرسوم البيانية والرسوم المتحركة ومقاطع الفيديو على فهم المادة وتذكرها بشكل أفضل. ● التركيز على فهم المفاهيم: تتضمن بيولوجيا الخلية الكثير من المفاهيم المعقدة، والحفظ وحده ال يكفي. التركيز على فهم المفاهيم وكيفية ارتباطها ببعضها البعض. ● المشاركة في المناقشات: يمكن أن تساعدك المشاركة في مناقشات الفصل وطرح الأسئلة على فهم المادة بشكل أفضل والبقاء منخرطاً في الدورة التدريبية. ● استخدام أدلة الدراسة واختبارات الممارسة: استخدم أدلة الدراسة واختبارات الممارسة الختبار المعرفة وتحديد المجالات التي تحتاج إلى التركيز على الدراسة. ● التعاون مع زملاء الدراسة: يمكن أن يكون العمل مع الطالب الآخرين طريقة فعالة لتعلم المادة. التعاون في حل مجموعات المشكلات، وتنظيم مجموعات الدراسة، ومساعدة بعضهم البعض. ● الممارسة: يتضمن علم الأحياء الخلوي الكثير من الحفظ، لذا تأكد من الممارسة بانتظام. | <p>الاستراتيجية</p> |

• سيساعد ذلك على أن تصبح أكثر ثقة في القدرات وتحسين فهم الهياكل والعمليات الخلوية مع مرور الوقت

١٠. بنية المقرر

| طريقة التقييم | طريقة التعلم | اسم الوحدة او الموضوع | مخرجات التعلم المطلوبة | الساعات | الأسبوع |
|---|---------------------------------------|---|---|---------|---------|
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | Introduction to the cell, theories of cell | Introduction to the cell, theories of cell | 2 | 1 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | types of cells | Understand the types of cells. | 2 | 2 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | Quiz One + prokaryotes, eukaryotes cells , cell shapes, cell size | Understand the prokaryotes, eukaryotes cells , cell shapes, cell size | 2 | 3 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | The viruses | Understand The viruses | 2 | 4 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | the nucleus, cilia and flagella | Understand the the nucleus, cilia and flagella | 2 | 5 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | the plasma membrane | Understand the the plasma membrane | 2 | 6 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | Cytosol, Organelles , Cytoplasm | Understand the Cytosol, Organelles , Cytoplasm | 2 | 7 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | Mid-term Exam + cytoplasmic inclusions | Understand the cytoplasmic inclusions | 2 | 8 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | cytoskeleton, centrosome | Understand the cytoskeleton, centrosome | 2 | 9 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | cell division;somatic cells division, reproductive cell division | Understand the cell division;somatic cells division, reproductive cell division | 2 | 10 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | ribosomes, lysosomes, peroxisomes | Understand the ribosomes, lysosomes, peroxisomes | 2 | 11 |

| | | | | | |
|--|--|--|--|---|----|
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | Quiz Three + the endoplasmic reticulum, mitochondria, the golgi apparatus | Understand the endoplasmic reticulum, mitochondria, the golgi apparatus | 2 | 12 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | protein synthesis. | Understand the protein synthesis. | 2 | 13 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | cell junction | Understand the cell junction | 2 | 14 |
| المتحانات نصف الفصلية والنهائية والواجبات البيئية والمتحانات المفاجئة | النظري، المناقشات، المتحانات المفاجئة | Preparatory week before the final Exam | - | 2 | 15 |

١١. تقييم المقرر

نوزع الدرجة من 100 على النحو التالي: المتحان النصفى 30%، التقييم اليومي 10%، والختبار النهائي.
60%

١٢. مصادر التعلم والتدريس

PRINCIPLES OF Cell Biology. George Plopper and Diana Bebek Ivankovic .Third edition,2021

Karps Cell Biology. Janet Iwasa and Wallace Marshall. Global edition.2016

Course Description Form

| | |
|--|--|
| 1. Course Name: Second stage / English Language | |
| | |
| 2. Course Code: | |
| | |
| 3. Semester / Year: First - second | |
| | |
| 4. Description Preparation Date: 5-4- 2023 | |
| | |
| 5. Available Attendance Forms: Theory | |
| | |
| 6. Number of Credit Hours (Total) / Number of Units (Total): 2 Hours | |
| | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: | <input type="text" value="Abeer Abd Al-Hameed Mahmood"/> |
| Email: | <input type="text" value="Eng.abeer.abd@uobabylon.edu.iq"/> |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none">1. To enable the students to communicate effectively and appropriately in real life situation.2. To use English effectively for study purpose across the curriculum;3. To develop interest in and appreciation of Literature;4. To develop and integrate the use of the four language skills i.e. Reading, Listening, Speaking and Writing;5. to revise and reinforce structure already learnt.6. Students will have the opportunity to consider aspects of current English language teaching theory and develop their awareness of how these theories translate to the classroom to influence teaching practice. |
| 9. Teaching and Learning Strategies | |

| | |
|-----------------|--|
| Strategy | <p>Focus on academic language, literacy and vocabulary</p> <p>Link background knowledge and culture to learning</p> <p>Increase comprehensible input and language output</p> <p>Promote classroom interaction</p> |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|-------------|--------------|-----------------------------------|---|------------------------|--------------------------|
| 1 | 2 | | Unit 1 – Getting to know you (tenses, Questions, Social expression, Using a bilingual dictionary) | Theory | |
| 2 | 2 | | Complete Unit 1 - (Social expression) | Theory | |
| 3 | 2 | | Unit 2 – The way we live (collection – daily life, Making conversation) | Theory | |
| 4 | 2 | | Complete Unit 2 – | Theory | |
| 5 | 2 | | Unit 3 – Past tenses, Word formation | Theory | |

| | | | | | |
|----|---|--|--|--------|--|
| 6 | 2 | | Complete Unit 3 – (Time expression) | Theory | |
| 7 | 2 | | Unit 4 – Let's go shopping! (much / many, some / any, a few, a little, a lot of, | Theory | |
| 8 | 2 | | Complete unit 4 -Articles | Theory | |
| 9 | 2 | | Unit 5 – What do you want to do? (Verb Patterns 1, future forms) | Theory | |
| 10 | 2 | | Complete Unit 5- (Hot verbs and how do you feel?) | Theory | |
| 11 | 2 | | Mid Exam | Theory | |
| 12 | 2 | | Unit 6 – Tell me! What's it like? (what ... like?, comparative and superlatives) | Theory | |

| | | | | | |
|----|---|--|---|--------|--|
| 13 | 2 | | Complete Unit 6 - (synonyms and antonyms, directions) | Theory | |
| 14 | 2 | | Review | Theory | |
| | | | | | |

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

12. Learning and Teaching Resources

| | |
|---|--------------------------------------|
| Required textbooks (curricular books, if any) | Pre- intermediate |
| Main references (sources) | New- Headway English course / Oxford |
| Recommended books and references (scientific journals, reports...) | |
| Electronic References, Websites | |

Course Description Form

| | |
|--|--|
| 1. Course Name: | |
| Mathematics III | |
| 2. Course Code: | |
| MATH210 | |
| 3. Semester / Year: | |
| 1 st semester / 2 nd year | |
| 4. Description Preparation Date: | |
| April, 3, 2024 | |
| 5. Available Attendance Forms: | |
| In class | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | |
| Theory : 2 Hrs ,1 Tut Units : 2 | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: Mr. Ali Talib Jawad Email: eng.ali.talib@uobabylon.edu.iq | |
| 8. Course Objectives | |
| <p>Course Objectives</p> | <ol style="list-style-type: none"> 1. Memorize change of coordinate formulae between rectangular, cylindrical, and spherical coordinate systems. 2. Convert equations between rectangular, cylindrical and spherical coordinate systems. 3. Perform geometric operations on vectors: addition, subtraction, multiplication by a scalar, dot product, and cross product. 4. Memorize formulae for length and direction of vector. 5. Compute dot and cross products given either algebraic or geometric information. 6. Memorize formulae for parametric equation of a line in space and explain geometrical and physical interpretations 7. Given information in a variety of ways, find the critical information needed to write the equation of a plane; namely, a point and a normal vector. |

| | |
|--|--|
| | <ol style="list-style-type: none"> 8. Solve geometric problems involving vectors. 9. Prove basic algebraic properties of vectors. 10. Gain deeper knowledge of multivariate differentiation operations such as Gradient, Divergent and Curl, and Jacobians. 11. Calculate first and second partial derivatives. 12. Compute double and triple integrals. 13. Recognize 1st order equations that can be solved by each of the three methods: separation of variables, linear equations, and exact equations, and use the appropriate method to solve them. 14. Use ∇-first-order differential equation as a mathematical model in some engineering applications. 15. Solve linear and nonlinear higher-order differential equations as well as systems of linear first-order differential equations. 16. Solve first-order differential equation numerically.. |
|--|--|

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | <ul style="list-style-type: none"> • In this classroom, active learning techniques are employed and the focus is placed on more challenging problems. Teams work together in class to come up with a result and explain why it makes sense to use a more formal writing style. Outside of class, students individually practice problem-solving skills. |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|--|---|------------------------------|---|
| 1 | 2 | Understand the 3-D system coordinates: Cartesian, Cylindrical, and Spherical Coordinates, distance between two points in space, equation of sphere in space. | Integration Problems Using Basic Integration Formulas | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Understand the Vectors form, vector algebra operations, unit vector, and vector applications. | Integration Problems Using by Parts Method | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Understand the Dot product , cross product, and triple scalar or box product . | Integration Problems Using Trigonometric Integral Method | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|--|--|------------------------------|---|
| 4 | 2 | Understand the Lines in space and planes in space. | Integration Problems Using Integration by Trigonometric Substitutions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Understand the Del and Curl operators, First order partial differentiation, Second order partial differentiation, and Jacobians. | Integration Problems Using Integration by Partial Fractions | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Understand the Multiple integrals, double integrals, and triple integrals. | Improper Integrals. Convergence and Divergence Theorem | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Mid-term Exam, Introduction to Differential Equations. | Mid-term Exam, Basic fundamentals of Sequences and Series. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Understand the First-Order Differential Equations, separable variables equations, linear equations, and exact equations. | Sequences, Convergence and Divergence of Sequences, Bounded Monotonic Sequences, Infinite Series, Geometric Series | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Understand Modeling with First-Order Differential Equations: Linear Models and Nonlinear Models. | Power Series, Infinite Taylor Series, Infinite Maclaurin Series | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Understand the Modeling with First-Order Differential Equations: Modeling with Systems of First-Order DEs. | Matrices, Determinants, Definition of Matrix, Properties, Special Matrices | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Understand the Higher-Order Differential Equations, Homogeneous and Nonhomogeneous Equations. | Matrix Algebra, Definition of Determinant, Properties, Cofactors and Cominors | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Understand the Modeling with Higher-Order Differential Equations: Linear Models and Nonlinear Models. | Evaluation of determinants, Inverse of Matrix | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|---|---|------------------------------|---|
| 13 | 2 | Understand the Systems of Linear First-Order Differential Equations, Homogeneous Linear Systems. | Solving systems of linear equations using Matrices (1). | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Understand the Systems of Linear First-Order Differential Equations, Nonhomogeneous Linear Systems. | Solving systems of linear equations using Matrices (2). | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | Understand the Numerical Solutions of Ordinary Differential Equations. | Application of Matrices in Engineering. | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following: mid-term exam 30 % , daily evaluation 10%, and final exam. 60 %

12. Learning and teaching Resources

| | |
|---|--|
| Required textbooks (curricular books, if any) | 1 .University Calculus Early Transcendentals Fourth Edition in SI Units, 2020. 2. “A First Course in Differential Equations with Modeling Applications, Eleventh Edition”, Dennis G. Zill, 2018. |
| Recommended books | 1“ .Classical Vector Algebra”, Vladimir Lepetic, 2023 2. A First Course in Differential Equations, Modeling, and Simulation Second Edition. Carlos A. Smith and Scott W. Campbell, 2016. |
| websites | https://www.amazon.com/University-Calculus-Early-Transcendentals-Units/dp/1292317302 https://www.amazon.com/Course-Differential-Equations-Modeling-Applications/dp/1305965728 |

نموذج وصف المقرر

| | |
|---|--|
| ١. اسم المقرر الميكانيك الهندسي I | |
| رمز المقرر BMER210 | |
| ٣ الفصل الأول / السنة الدراسية 2023-2024 | |
| تاريخ إعداد هذا 24/12/2023 | |
| 5. أشكال الحضور المتاحة حضوري | |
| 6. عدد الساعات الدراسية الكلي عدد الوحدات الكلي | |
| 7. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) الاسم: علي صادق جعفر اليميل: ali.sadigj@uobabylon.edu.iq | |
| ٨. اهداف المقرر | |
| اهداف المادة الدراسية | 1. فهم مبادئ ومفاهيم الميكانيكا، بما في ذلك أنظمة القوة والتوازن والحركة. 2. تنمية القدرة على تحليل الأنظمة الثنائية والثالثية الأبعاد وتطبيق التقنيات الرياضية المناسبة. 3. تطبيق مبادئ أنظمة القوة لحل المسائل التي تتضمن العزوم والمحصالت. 4. إنشاء وتفسير مخططات الجسم الحر لتحليل ظروف التوازن في بعدين. |

| | |
|--|--|
| <p>نسب الكفاءة في تحليل وتقييم سلوك الهياكل، مثل الجمالونات</p> <p>التركيب المستوية: 6.</p> <p>تطبيق مبادئ الاحتكاك لحل المسائل المتعلقة بالقوى وتفاعلات الاحتكاك. 7. التعرف على مفهوم مركز الكتلة وتطبيقه في تحليل الأنظمة ذات القوى الموزعة.</p> | |
|--|--|

9. استراتيجيات التعليم والتعلم

| | الاستراتيجية |
|---|--------------|
| <p>المحاضرات: يمكن استخدام المحاضرات التقليدية لتقديم مفاهيم جديدة، وفتح المبادئ النظرية، وتوفير الأساس لفهم مادة الدورة. يمكن للمدرسين استخدام عروض الوسائط المتعددة والعروض التوضيحية والأمثلة الواقعية لتعزيز تجربة التعلم</p> <p>التعلم القائم على حل المشكلات: شجع الطالب على التفاعل بشكل فعال مع مواد الدورة التدريبية من خلال تقديم مشاكل واقعية لهم أو دراسات حالة تتطلب تطبيق المفاهيم التي تعلموها. ويعزز هذا النهج التفككي النقدي ومهارات حل المشكلات</p> <p>المناقشات التفاعلية: قم بإشراك الطالب في المناقشات الصفية لتعزيز الفهم العميق والتفككي النقدي. شجعهم على طرح الأسئلة ومشاركة وجهات نظرهم والمشاركة في الأنشطة التعاونية لحل المشكلات. تتيح هذه الإستراتيجية للطلاب التعلم من بعضهم البعض وتطوير مهارات الاتصال لديهم</p> <p>ثقة والتجارب العملية: دمج الأنشطة العملية أو التجارب المعملية أو المحاكاة لـ تويد الطالب بالخبرة العملية وتعزيز المفاهيم النظرية. يساعد هذا النهج لطلاب على تطوير فهم أفضل للموضوع من خلال المشاركة المباشرة والملاحظة</p> <p>المشارية: جماعية: قم بتعزيز مشارية جماعية أو مهام تتطلب من الطالب العمل بشكل تعاوني لحل المشكلات المعقدة أو تصميم الحلول الهندسية. تعزز هذه الإستراتيجية العمل الجماعي والتواصل وتعزز مهارات حل المشكلات</p> <p>استخدام التكنولوجيا: دمج أدوات وموارد التكنولوجيا مثل عمليات المحاكاة التفاعلية والمختبرات الافتراضية والموارد عبر الإنترنت والبرامج التعليمية لتعزيز التعلم. يمكن أن توفر هذه الأدوات تمثيلات مرئية وتمارين تفاعلية وملاحظات فورية لتسهيل الفهم والمشاركة</p> <p>التقييمات: استخدم مجموعة متنوعة من أساليب التقييم، بما في ذلك الاختبارات والواجبات والامتحانات وعروض المشارية، لتقييم فهم طالب للمادة. تقديم تعليقات بناءة وفي الوقت المناسب لمساعدة الطالب على تحديد مجالات التحسين</p> | |

تطبيقات العالم الحقيقي ربط المواد الدراسية بتطبيقات وأمثلة العالم الحقيقي وهذا يساعد الطالب على فهم أهمية العملية للمفاهيم التي يتم تدريسها ويعزز دوافعهم ومشاركتهم

اس: ياتيجيات التعلم النشط: تشجيع التعلم النشط من خلال أنشطة مثل تمارين حل المشكلات، والمناقشات الجماعية، ولعب الأدوار، ورسم خرائط لمفاهيم، وتعليم القرآن. تعمل هذه الـ ياتيجيات على تعزيز التفاعل بشكل أعمق مع المادة وتعزيز القدرة على الاحتفاظ بها وفهمها

ساعات العمل والدعم الفردي: توفى فرص للدعم الفردي والتوضيح من خلال ساعات العمل أو المشاورات الف ياضية. يتيح ذلك للطلاب طلب المساعدة بشأن أسئلة أو صعوبات محددة قد يواجهونها

١٠. بنية المقرر

| الأسبوع | الساعات | مخرجات التعلم المطلوبة | اسم الوحدة او الموضوع | طريقة التعلم | طريقة التقييم |
|---------|---------|--|--|--------------|--|
| 1 | 3 | 1. فهم المفاهيم الأساسية للقوى، بما في ذلك تمثيل المتجهات وتحليل أنظمة القوى ثنائية البعد. | مقدمة في الأنظمة ثنائية وثلاثية الأبعاد | حضورى | حضور +5 كوزات+5 امتحان المد 30+ امتحان نهائي 100=60 |
| 2 | 3 | 2. إظهار الكفاءة في حساب العزوم المزدوجات والقوى الناتجة في النظام. | أنظمة القوة: نظام القوة ثنائي الأبعاد. | حضورى | |
| 3 | 3 | 3. تطبيق شروط التوازن | العزم، | حضورى | |
| 4 | 3 | لحل مسائل السايتاكا في بعدين. | المزدوج. المحصلة | حضورى | |
| 5 | 3 | 4. أنشئ مخططات الجسم الحر واستخدمها لتحليل القوى المؤثرة على الأجسام في حالة توازن. | التوازن. | حضورى | |
| 6 | 3 | 5. تحليل الهياكل مثل الجمالونات والأطر لتحديد استقرارها والقوى الداخلية. | مخططات الجسم الحر | حضورى | |
| 7 | 3 | 6. تطبيق مبادئ الاحتكاك لحل المسائل المتعلقة بالأنظمة ذات الأحزمة. | ، شروط التوازن: ثنائي الأبعاد. الهياكل: | حضورى | |
| 8 | 3 | 7. حساب مركز الكتلة لأشياء وفهم أهميته في تحليل التوازن والحركة. | الجمالونات | حضورى | |
| 9 | 3 | | ساكنة الموائع، | حضورى | |
| 10 | 3 | | الاحتكاك، تطبيقات الاحتكاك: الأحزمة. | حضورى | |
| 11 | 3 | | | حضورى | |
| 12 | 3 | | | حضورى | |
| 13 | 3 | | | حضورى | |

| | | | | | |
|--|-------|-----------------|--|---|----|
| | حضورى | القوات الموزعة، | | 3 | 14 |
| | حضورى | مركز الكتلة، | | 3 | 15 |

١١. تقييم المقرر

حضور 5 + كوزات 5 + امتحان المد 30 + امتحان نهائي 60 = 100

١٢. مصادر التعلم والتدريس

ENGINEERING MECHANICS STATICS (J. L. MERIAM, L. G. KRAIGE) (FIFTH EDITION).
ENGINEERING_MECHANICS_STATICS [R. C. HIBBELER] (THIRTEENTH EDITION).

نموذج وصف المقرر

| | |
|--|------------------------------|
| ١. اسم المقرر : تكنولوجيا المعلومات / مرحلة ثانية | |
| ٢. رمز المقرر | |
| ٣. الفصل / السنة: الأول - 2023 | |
| ٤. تاريخ إعداد هذا الوصف: 5- 4- 2024 | |
| 5. أشكال الحضور المتاحة: نظري + عملي | |
| 6. عدد الساعات الدراسية (الكلية/ عدد الوحدات) (الكلية) (3 ساعة) | |
| 7. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) الاسم: ع ب ي ر ع ب د ا ل ح م ي د م ح م و د البريد الإلكتروني: eng.abeer.abd@uobabylon.edu.iq | |
| ٨. اهداف المقرر | |
| <p>المعرفة الأساسية لتكنولوجيا المعلومات: التعرف على مفاهيم والمبادئ والمكونات الأساسية لتكنولوجيا المعلومات.</p> <p>تساب المعرفة بأجهزة الكمبيوتر والبرمجيات والشبكات وإدارة البيانات.</p> <p>التعرف على أنظمة التشغيل للكمبيوتر ولغات البرمجة: ، التعرف على فئات MS-DOS and Windows مثل Matlab وتطبيق Python و Java و C++ programming</p> <p>فاهيم الشبكات:</p> <p>لم أساسيات شبكات الكمبيوتر والبروتوكولات.</p> <p>هم بنية الشبكة وأمنها واستكشاف الأخطاء وإصلاحها.</p> <p>من المعلومات:</p> <p>التعرف على مبادئ أمن المعلومات. تعرف على التهديدات الأمنية الشائعة والتشفير وأفضل الممارسات تأمين البيانات والأنظمة.</p> <p>تقنيات الناشئة:</p> | <p>اهداف المادة الدراسية</p> |

| | |
|--|--|
| <p>الطالع على الاتجاهات الحالية والتقنيات الناشئة في مجال تكنولوجيا المعلومات.</p> <p>ستكشف موضوعات مثل الذكاء الاصطناعي والتعلم الآلي (IoT) والحوسبة السحابية وإنترنت الأشياء (IOT).</p> <p>طرق التواصل المهني: تعزيز</p> <p>بها ارت الاتصال الكتابي والشفوي، خاصة في سياق نقل لمعلومات التقنية إلى أصحاب المصلحة غير التقنيين.</p> | |
|--|--|

٩. استراتيجيات التعليم والتعلم

| | |
|---|--|
| <p>الاستراتيجية</p> <p>هي مادة تعليمية بجزئها النظري والعملية خصصت لتزويد الطالب بفهم شامل لمختلف (IT) تكنولوجيا المعلومات لجوانب المتعلقة بتكنولوجيا المعلومات المعاصرة ودورها في مختلف مجالات الحياة.</p> | |
|---|--|

١٠. بنية المقرر

| الأسبوع | الساعات | مخرجات التعلم المطلوبة | اسم الوحدة او الموضوع | طريقة التعلم | طريقة التقييم |
|---------|---------|------------------------|-------------------------------------|--------------|---------------|
| 1 | 3 | | مقدمة في تكنولوجيا المعلومات | ظري + عملي | |
| 2 | 3 | | لمفاهيم الساسية لتكنولوجيا لمعلومات | ظري + عملي | |
| 3 | 3 | | مكونات الحاسوب (النظري والعملية) | ظري + عملي | |
| 4 | 3 | | برمجيات الحاسوب (النظري والعملية) | ظري + عملي | |
| 5 | 3 | | المجال الرقمي | ظري + عملي | |
| 6 | 3 | | الأنظمة (المجال الرقمي لرقمية) | ظري + عملي | |
| 7 | 3 | | بوابات النظام الرقمي | ظري + عملي | |

| | | | | |
|--|------------|------------------------|------|----|
| | ظري + عملي | متحان نصف الكورس الأول | 1:30 | 8 |
| | ظري + عملي | أساسيات الاتصالات | 3 | 9 |
| | ظري + عملي | أنواعها مفهوم الشبكات | 3 | 10 |
| | ظري + عملي | لشبكات المحلية | 3 | 11 |

| | ظري + عملي | الاتصالات الاسلكية | 3 | 14 |
| | ظري + عملي | بروتوكول الاتصالات | 3 | 15 |

١١. تقييم المقرر

توزيع الدرجة من 011 على وفق المهام المكلف بها الطالب مثل التحضير اليومي والامتحانات اليومية والشفوية والشهرية والتحريية والتقارير الخ

١٢. مصادر التعلم والتدريس

| | |
|--|---|
| | الكتب المقررة المطلوبة (المنهجية أن وجدت) |
| | المراجع الرئيسية (المصادر) |
| | الكتب والمراجع الساندة التي يوصى بها (المجلات العلمية، التقارير....) |
| | المراجع الإلكترونية ، مواقع الانترنت |

نموذج وصف المقرر

| | |
|--|--|
| ١. اسم المقرر : | |
| لغة العربية | |
| ٢. رمز المقرر : | |
| UREQ211 | |
| ٣. الفصل / السنة : | |
| الفصل الأول / المرحلة الثانية | |
| ٤. تاريخ إعداد هذا الوصف | |
| 2024/4/3 | |
| ٥. أشكال الحضور المتاحة | |
| ٦. عدد الساعات الدراسية (الكلية / عدد الوحدات (الكلية) | |
| نظري : 1 ساعة عدد الوحدات : 1 | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم : م.م. هبة اليمينيل : | |
| ٨. اهداف المقرر | |
| اهداف المادة الدراسية | <p>١- تقوية القدرة اللغوية لدى الطلبة واكسابهم مهارة التعبير الصحيح. 2- تقوية ملكة الطلبة الدبية لتذوق وادراك مواطن الجمال فيها . 3- تنمية قدرة الطلبة على فهم المادة المقروءة وتنمية مهاراتهم الخطية والمالئية لغرض الكتابة الصحيحة باستعمال عالمات</p> <p>4- الترفيم . مساعدة الطلبة على التعبير الصحيح 5- وضبط اساليهم اكساب الطلبة قدرات نحوية تمكنهم من تقويم السننهم عند القراءة .</p> |

| |
|--|
| <p>تنمية الثروة اللغوية للطلبة وتزويدهم بكثير من اللفاظ بفضل ما يعرض عليهم من امثلة واساليب . 7- تدريب الطلبة على حسن الداء وجودة اللقاء . 8- الربط بين مواد اللغة العربية بجميع فروعها . 9- التعرف على مواطن الضعف عند الطلبة في رسم الكلمات والعمل على معالجتها 10- تنمية الذوق الفني لدى الطلبة بما يطلعون عليه من نماذج وما يمارسونه من كتابات .</p> |
|--|

٩. استراتيجيات التعليم والتعلم

| |
|--|
| <p>الاستراتيجية</p> <ul style="list-style-type: none"> 1- اتباع اسلوب التدريس الحديث لدروس اللغة العربية للفضاء على صعوبة وجمود بعض مواضيع هذه الدروس ,وإيصال الفكرة والمعلومة للطلبة بطرق مفهومة كالحوار المباشر بين التدريسي والطلبة وبالتالي تحفيزهم على التفكير من خلال طرح الأسئلة التفاعلية من قبل التدريسي . و ثم اتاحة فرصة النقاش بين الطلبة انفسهم للاستفادة من محتوى الموضوع ,وتشجيع الطلبة على التعاون وزيادة اهتمامهم تجاه المواضيع المختلفة وتنمية الابداع لديهم. 2-امكانية استخدام التكنولوجيا والطرق الحديثة بالتدريس كاستخدام البور بوينت بالصوت والصور لتميز المعلومات. 3-تكليف الطلبة بإعداد بحوث وتقارير بشكل فردي او على شكل مجموعات للتعبير عن مواهبهم والوقوف على الأخطاء التي تم ارتكابها وبالتالي يستفاد الطالب من هذه الأخطاء وتصحيحها لترسخ في اذهانهم . |
|--|

والختبار النهائي. 50%

١٢. مصادر التعلم والتدريس

Electronic Devices and Circuit Theory 11th-ed Robert L. Boylestad Louis Nashelsky
INTEGRATED ELECTRONICS MILLMAN · HALKIAS.

Course Description Form

| | |
|--|--|
| 1. Course Name: Second stage / English Language | |
| | |
| 2. Course Code: | |
| | |
| 3. Semester / Year: second - scnd | |
| | |
| 4. Description Preparation Date: 5-4- 2024 | |
| | |
| 5. Available Attendance Forms: Theory | |
| | |
| 6. Number of Credit Hours (Total) / Number of Units (Total): 2 Hours | |
| | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: <input type="text" value="Abeer Abd Al-Hameed Mahmood"/> | |
| Email: <input type="text" value="Eng.abeer.abd@uobabylon.edu.iq"/> | |
| 8. Course Objectives | |
| Course Objectives | <ol style="list-style-type: none">1. To enable the students to communicate effectively and appropriately in real life situation.2. To use English effectively for study purpose across the curriculum;3. To develop interest in and appreciation of Literature;4. To develop and integrate the use of the four language skills i.e. Reading, Listening, Speaking and Writing;5. to revise and reinforce structure already learnt.6. Students will have the opportunity to consider aspects of current English language teaching theory and develop their awareness of how these theories translate to the classroom to influence teaching practice. |
| 9. Teaching and Learning Strategies | |

| | |
|-----------------|--|
| Strategy | <p>Focus on academic language, literacy and vocabulary</p> <p>Link background knowledge and culture to learning</p> <p>Increase comprehensible input and language output</p> <p>Promote classroom interaction</p> |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|-------------|--------------|-----------------------------------|--|------------------------|--------------------------|
| 1 | 2 | | Unit 5 – What do you want to do? Verb Patterns 1 | Theory | |
| 2 | 2 | | Unit 5 – What do you want to do? Verb Patterns 1, future forms) | Theory | |
| 3 | 2 | | Unit 5- (Hot verbs and how do you feel?) | Theory | |
| 4 | 2 | | Unit 6 – Tell me! What’s it like? (what ... like?, | Theory | |
| 5 | 2 | | Unit 6 – Tell me! comparative and superlatives) (synonyms and antonyms, directions) | Theory | |

| | | | | | |
|----|---|--|--|--------|--|
| 6 | 2 | | Mid – Exam | Theory | |
| 7 | 2 | | Unit 7- famous couples Present Perfect. for, since | Theory | |
| 8 | 2 | | Unit 7- famous couples Adverbs, word pairs | Theory | |
| 9 | 2 | | Unit 7- famous couples word pairs, short answers | Theory | |
| 10 | 2 | | Unit 8- Do's and don'ts Have (got) to Should / must | Theory | |
| 11 | 2 | | Unit 8- Do's and don'ts Words that go together At the doctor | Theory | |
| 12 | 2 | | Unit 9- Going places Time clauses. If. | Theory | |

| | | | | | |
|----|---|--|---|--------|--|
| 13 | 2 | | Unit 9- Going places Hot verbs In a hotel | Theory | |
| 14 | 2 | | Review | Theory | |
| | | | | | |

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

12. Learning and Teaching Resources

| | |
|---|--------------------------------------|
| Required textbooks (curricular books, if any) | Pre- intermediate |
| Main references (sources) | New- Headway English course / Oxford |
| Recommended books and references (scientific journals, reports...) | |
| Electronic References, Websites | |

Course Description Form

| 1. Course Name: | | | | | |
|--|-------|---|----------------------|-----------------|-------------------|

| 2. Course Code: | | | | | |
| BME3104 | | | | | |
| 3. Semester / Year: | | | | | |
| first semester / Third year | | | | | |
| 4. Description Preparation Date: | | | | | |
| April, 13, 2024 | | | | | |
| 5. Available Attendance Forms: | | | | | |
| ---- | | | | | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | | | | | |
| Theory : 2 Hrs practice Units : 2hrs | | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | | |
| Name: Mohammed Mekkey e-mail Med.asmaa.mohm@uobabylon.edu.iq | | | | | |
| 8. Course Objectives | | | | | |
| Course Objectives | | <ul style="list-style-type: none"> • Acquire a basic background in histology and to understand the properties of cells and their interactions with one another as components of tissues and organs. • To understand how structure and function correlate at the microscopic level. • To be able to describe the normal structure and function of various cell types, tissues, and organs, and to differentiate their histological structures from each other through examination. • To acquire basic background on tissues to be able to know the pathological tissue in the next stage. • To describe the tissues in different organs of human. | | | |
| 9. Teaching and Learning Strategies | | | | | |
| Strategy | | <ul style="list-style-type: none"> • Theory in class room. • Quizzes and seminars. | | | |
| 10. Course Structure | | | | | |
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |

| | | | | | |
|---|---|------------------------|---|------------------------------|---|
| 1 | 2 | Lectures presentations | and solving exercises Tissue preparation | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Lectures presentations | and solving exercises Light microscope | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Lectures presentations | and solving exercises Extracellular matrix | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Lectures presentations | and solving exercises Epithelial tissue | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Lectures presentations | and solving exercises Classification of epithelial tissue | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Lectures presentations | and solving exercises Polarity and Cell-Surface Specializations | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Lectures presentations | and solving exercises Glands | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|------------------------|---|------------------------------|---|
| 8 | 2 | Lectures presentations | and solving exercises Exocrine and endocrine gland | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Lectures presentations | and solving exercises Mid-term exam +classification of glands | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Lectures presentations | and solving exercises Connective tissue | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 11 | 2 | Lectures presentations | and solving exercises Classification of connective tissue | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Lectures presentations | and solving exercises The cartilage | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | Lectures presentations | and solving exercises The bone | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Lectures presentations | and solving exercises The muscle | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|--|--------------------|------------------------------|---|
| 15 | 2 | Lectures presentations and solving exercises | The nervous system | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
|----|---|--|--------------------|------------------------------|---|

11 Course Evaluation :

Distributing the score out of 100 according to the following : mid term exam 30 % , daily evaluation 10%, practice 10%, and final exam. 50 %

12. Learning and teaching Resources

| | |
|--|---|
| Required textbooks (curricular books, if any) | Junqueirs – Basic histology text book 13th addition Anthony L.MESCHER |
| Recommended books | Text book of histology 4th addition |

Course Description Form

| | | | | |
|---|---|--------------------------|--|-------------------|
| 1. Course Name: | | | | |
| The Trunk Anatomy | | | | |
| 2. Course Code: | | | | |
| MDER312 | | | | |
| 3. Semester / Year: | | | | |
| first semester / Third year | | | | |
| 4. Description Preparation Date: | | | | |
| April, 13, 2024 | | | | |
| 5. Available Attendance Forms: | | | | |
| ---- | | | | |
| 6. Number of Credit Hours (Total) / Number of Units (Total) | | | | |
| Theory : 2 Hrs practice Units : 2hrs /3 | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | |
| Name: Dr. Haithem e-mail | | | | |
| 8. Course Objectives | | | | |
| Course Objectives | <ol style="list-style-type: none"> 1. To understand the organization and functional anatomy of the thoracic cage, including the role of the diaphragm in respiration. 2. To gain knowledge of the heart's anatomy, the conductive system, and the major blood vessels involved in systemic and pulmonary circulation. 3. To explore the anatomy and functions of the lungs, pleura, and their role in respiration. 4. To study the topography of the anterior abdominal wall, including its layers, nerve supply, and fascia. 5. To gain an overview of the general topography of the abdomen, including the peritoneum, major abdominal organs, and their arterial supply and venous drainage. | | | |
| 9. Teaching and Learning Strategies | | | | |
| Strategy | <ul style="list-style-type: none"> • Theory in class room. • Quizzes and seminars. | | | |
| 10. Course Structure | | | | |
| | Hours | Required Learning | | Evaluation |

| Week | | Outcomes | Unit or subject name | Learning method | method |
|------|---|---------------------|--|------------------------------------|--|
| 1 | 2 | Theory and practice | Thoracic Cage Organization and Functional Anatomy of Respiration – part 1 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 2 | 2 | Theory and practice | Thoracic Cage Organization and Functional Anatomy of Respiration – part 2 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 3 | 2 | Theory and practice | The Heart and Conductive System – part 1 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 4 | 2 | Theory and practice | The Heart and Conductive System –part 2 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 5 | 2 | Theory and practice | Aorta, Pulmonary Trunk, and Major Veins | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 6 | 2 | Theory and practice | The Mediastinum and Autonomic Nervous System in the Thorax | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 7 | 2 | Theory and practice | Pleura and Lungs – part 1 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 8 | 2 | Theory and practice | Pleura and Lungs – part 2 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 9 | 2 | Theory and practice | Pleura and Lungs | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 10 | 2 | Theory and practice | Radiographic and Sectional Anatomy of the Thorax – part 1 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

| | | | | | |
|----|---|---------------------|---|------------------------------|---|
| 11 | 2 | Theory and practice | Radiographic and Sectional Anatomy of the Thorax – part 2 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 12 | 2 | Theory and practice | Topography of the Anterior Abdominal Wall – part 1 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 13 | 2 | Theory and practice | Topography of the Anterior Abdominal Wall – part 2 | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 14 | 2 | Theory and practice | Muscles of the Antero-lateral Abdominal Wall and Inguinal Region | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |
| 15 | 2 | Theory and practice | General Topography of the Abdomen, Peritoneum, and Alimentary Tract | Theory, discussions, quizzes | Final and Mid term exams, home works, and quizzes |

11 Course Evaluation :

Distributing the score out of 100 according to the following : mid term exam 30 % , daily evaluation 10%, practice 10%, and final exam. 50 %

نموذج وصف المقرر

| | |
|--|---------------------------------------|
| ١. اسم المقرر | |
| التحليلات الهندسية | |
| ٢. رمز المقرر | |
| MDER310 | |
| ٣. الفصل / السنة | |
| الفصل الأول/المرحلة الثالثة | |
| ٤. تاريخ إعداد هذا الوصف | |
| 4/6/2024 | |
| ٥. أشكال الحضور المتاحة | |
| حضور | |
| ٦. عدد الساعات الدراسية (الكلية/ عدد الوحدات) (الكلية) | |
| 3/3 | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم : د.علاء عمران المطيري اليميل : Al_al_44@uobabylon.edu.iq | |
| ٨. اهداف المقرر | |
| <p>اهداف المادة الدراسية:</p> <p>١. تطوير فهم عميق لمتسلمات فورييه، وتحويل فورييه، وتحويل البالس، وأهميتها في التحليل الهندسي. 2.</p> <p>٢. استكشاف مفاهيم الدوال الدورية وتمثيلها من خلال متسلسلة فورييه، مما يتيح تحليل الظواهر الدورية في النظم الهندسية. 3. دراسة خصائص وتطبيقات متسلسلة فورييه، بما في ذلك تحديد المعاملات، وتحديد الدوال الفردية والزوجية، وتقنيات توسيع نصف المدى. 4. استكشاف خصائص وتطبيقات تحويل فورييه، بما في ذلك معالجة الإشارات والتحليل الطيفي وتقنيات الترشيح في التطبيقات الهندسية. 5. للتحقيق في خصائص اللتواء والضرب للوظائف في مجال فورييه، وتسهيل فهم عمليات معالجة الإشارات وسلوك النظام. 6.</p> <p>٦. التعرف بتحويل البالس وتطبيقاته في حل المعادلات التفاضلية الخطية، مما يوفر أداة رياضية قوية لتحليل النظام والتحكم فيه. 7. فهم خصائص وتطبيقات تحويل البالس، بما في ذلك تمثيل مجال التردد لأنظمة الهندسية. فهم تحويل البالس العكسي وتطبيقه في الحصول على حلول المجال الزمني من تمثيلات مجال البالس، مما يتيح تحليل وتوليف الأنظمة الهندسية.</p> | <p>٩. استراتيجيات التعليم والتعلم</p> |

| الاستراتيجية | | | | | |
|--|---------|--|--|--------------|----------------------------|
| يتم عرض المادة بشكل نظري ومن ثم يكلف الطالب بعمل واجبات منزلية. يتخلل المحاضرات شرح طريقة عمل الشبكات بشكل عملي على برنامج packettracer أيضا يكلف الطلبة بعمل سمونات لبعض المواد وعرضها اما الطلبة . | | | | | |
| ١٠. بنية المقرر | | | | | |
| الأسبوع | الساعات | مخرجات التعلم المطلوبة | اسم الوحدة او الموضوع | طريقة التعلم | طريقة التقييم |
| 1 | 3 | Understand fundamental mathematical techniques used in engineering analysis. Gain proficiency in applying mathematical methods to solve engineering problems. | Introduction to engineering analysis ,Natural Signals, and Periodic Signals. | حضور في الصف | امتحان يومي أسئلة شفوية |
| 2 | 3 | Differentiate between natural (non-periodic) signals and periodic signals. Identify common examples of each type of signal in engineering applications. | Fourier series , Dirichlet Conditions and Trigonometric Fourier series form | حضور في الصف | امتحان يومي أسئلة شفوية |
| 3 | 3 | Understand the concept of representing periodic functions using Fourier series. Learn how to express periodic signals using trigonometric or exponential Fourier series forms. | Symmetry Conditions. | حضور في الصف | امتحان يومي أسئلة شفوية |
| 4 | 3 | Recognize the conditions under which a function can be accurately represented using a Fourier series. Apply Dirichlet conditions and symmetry conditions to determine the suitability of a function for Fourier series representation. | Exponential Fourier series form and Parssival's theorem for periodic function power. | حضور في الصف | امتحان يومي أسئلة شفوية |
| 5 | 3 | Apply Fourier series techniques to analyze electrical circuits. Understand how periodic signals are used to model and analyze circuit behavior. | Fourier Series applications in circuit analysis . | حضور في الصف | امتحان يومي أسئلة شفوية |
| 6 | 3 | Understand the concept of transforming signals from the time domain to the frequency domain. Learn how to use the | Fourier transform definition . | حضور في الصف | امتحان يومي أسئلة شفوية |

| | | | | | |
|----------------------------|-----------------|--|--|---|----|
| | | | Fourier transform to analyze non-periodic signals. | | |
| امتحان يومي أسئلة شفوية | حضور في الصف | Properties of Fourier transform. | Gain familiarity with key properties of the Fourier transform, such as linearity, time shifting, frequency shifting, and scaling. Apply these properties to simplify signal analysis and manipulation. | 3 | 7 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Convolution property and inverse Fourier transform. | Understand how convolution in the time domain corresponds to multiplication in the frequency domain. | 3 | 8 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Fourier transform on electrical circuits applications. | Understand how frequency-domain analysis can provide insights into circuit performance and response. | 3 | 9 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Laplace transform definition, Laplace transform of special functions | Understand the definition of the Laplace transform. | 3 | 10 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Midterm Exam | | 3 | 11 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Properties of Laplace Transform. | Explore the properties of the Laplace transform. | 3 | 12 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Inverse Laplace transform. | Master the techniques for finding the inverse Laplace transform. | 3 | 13 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Laplace transform applications to circuits | Apply Laplace transform methods to analyze circuits. | 3 | 14 |

| | | | | | |
|----------------------------|-----------------|---|---|---|----|
| امتحان يومي أسئلة شفوية | حضور في الصف | Laplace transform applications to circuits | Demonstrate proficiency in utilizing Laplace transform techniques for solving engineering problems. | 3 | 15 |
|----------------------------|-----------------|---|---|---|----|

١١. تقييم المقرر

Mid Exam = 30% , attendance and quizzes = 10%

| السم : أ.م.د. اشواق مخيف سلمان اليميل : m.ash_aljbouri@yahoo.com | |
| ٨. أهداف المقرر | |
| أهداف المادة الدراسية | فهم تكوين ووظائف سوائل الجسم .1 المختلفة، بما في ذلك الدم والبازما والسائل الخالي والسائل داخل الخاليا تحديد ووصف السوائل المختلفة في .2 الجسم، بما في ذلك الأجزاء داخل الخاليا .وخارجها، وفهم كيفية تنظيم توزيع السوائل فهم اليات الحفاظ على توازن الماء في .3 الجسم، بما في ذلك امتصاص الماء وإعادة امتصاصه وإفرازه، بالإضافة إلى دور الهرمونات مثل الهرمون المضاد لإدرار .(ADH) البول دراسة توازن الإلكتروليت وأهميته .4 لمختلف العمليات الفسيولوجية، بما في ذلك |

تنظيم الأيونات مثل الصوديوم والبوتاسيوم والكالسيوم والكلوريد، والآليات المشاركة في الحفاظ على توازن الإلكتروليت

5. اكتساب فهم شامل لخاليا الدم الحمراء ، بما في ذلك بنيتها ووظيفتها (RBCs) وإنتاجها من خالل تكوين الكريات الحمر ، وفهم حالت مثل فقر الدم وكثرة الحمر

استكشاف دور خاليا الدم البيضاء في 6. الاستجابة المناعية، بما في ذلك الأنواع المختلفة من خاليا الدم البيضاء، ووظائفها، وأهميتها في الدفاع ضد مسببات الأمراض

تطوير المعرفة بعلم المناعة، بما في ذلك 7. الاستجابات الفطرية والتكيفية للجهاز المناعي، ودور الأجسام المضادة في آليات دفاعية محددة، وفهم الأنواع المختلفة (IgM ، IgE ، IgD) ، منها (IgG ، IgA)

فهم بنية ووظيفة الصفائح الدموية، 8. ودورها في تخثر الدم ، والوعي بالاضطرابات المتعلقة بوظيفة الصفائح الدموية

فهم مسارات التخثر الخارجية والداخلية، 9. بما في ذلك سلسلة التفاعلات التي تؤدي إلى تكوين جلطات الدم، وفهم أهمية هذه العملية في التئام الجروح ومنع النزيف الزائد

10. دراسة نظام فصائل الدم ABO، بما في ذلك فصائل الدم المختلفة (A، B، AB، O)، ومدى توافقها مع عمليات نقل الدم، وفهم مشاكل نقل الدم.

| ٩. استراتيجيات التعليم والتعلم | | | | | |

١١. تقييم المقرر

نوزع الدرجة من 100 على النحو التالي: الامتحان النصفى 30%، التقييم اليومي 10%، والعملية 10%
والختبار النهائى 50%.

١٢. مصادر التعلم والتدريس

Ferdinand P. Beer et.al., Mechanics of Materials, Textbook Sixth Edition, 2012.

R. C. HIBBELER ,Mechanics of Materials, Textbook, 2008.

Course Description Form

| | |
|--|---|
| 1. Course Name: Third stage – English Language | |
| | |
| 2. Course Code: | |
| | |
| 3. Semester / Year: second / third | |
| | |
| 4. Description Preparation Date: 5-4-2024 | |
| | |
| 5. Available Attendance Forms: Theory | |
| | |
| 6. Number of Credit Hours (Total) / Number of Units (Total): 2 Hours | |
| | |
| 7. Course administrator's name (mention all, if more than one name) | |
| Name: | <input type="text" value="Abeer Abd Al-Hameed Mahmood"/> |
| Email: | <input type="text" value="Eng.abeer.abd@uobabylon.edu.iq"/> |
| 8. Course Objectives | |
| <p>Course Objectives</p> | <p>Developing Language Skills:</p> <ul style="list-style-type: none"> Improve overall proficiency in English, focusing on listening, speaking, reading, and writing skills. Enhance vocabulary knowledge and understanding of grammar rules and structures. <p>Communication Skills:</p> <ul style="list-style-type: none"> Build the ability to communicate effectively in various everyday situations, such as social interactions, travel, work, and study. Practice using functional language for expressing opinions, making suggestions, giving advice, etc. <p>Cultural Awareness:</p> <ul style="list-style-type: none"> Introduce students to different cultures and customs through authentic texts, dialogues, and activities. Develop an understanding of cultural |

nuances in language use and communication.

| | |
|---|--|
| | Grammar and Vocabulary: |
| | <ul style="list-style-type: none"> • Reinforce and expand on essential grammar points and language patterns. • Increase vocabulary range and usage through thematic units and contexts. |
| | Listening and Speaking: |
| | <ul style="list-style-type: none"> • Improve listening skills through a variety of audio materials, including dialogues, interviews, and recordings of native speakers. • Enhance speaking abilities by providing opportunities for role-plays, discussions, debates, and presentations. |
| | Reading and Writing: |
| | <ul style="list-style-type: none"> • Develop reading comprehension skills with engaging texts, articles, and stories that reflect real-world contexts. • Practice different types of writing, such as emails, letters, reports, and essays, to enhance writing skills. |
| | Exam Preparation (if applicable): |
| | <ul style="list-style-type: none"> • Provide practice tasks and exercises that prepare students for English proficiency exams, such as Cambridge English: First (FCE) or similar exams. |
| | Language Functions and Situations: |
| | <ul style="list-style-type: none"> • Cover a range of language functions and situations, including expressing likes and dislikes, describing experiences, talking about future plans, etc. • Offer language practice in contexts relevant to students' daily lives and future needs. |
| Critical Thinking and Problem-Solving: | |
| <ul style="list-style-type: none"> • Encourage students to think critically and analyze language use in different contexts. • Develop problem-solving skills through language tasks that require creative thinking and application of learned concepts. | |
| Self-Study and Autonomy: | |
| <ul style="list-style-type: none"> • Promote self-study habits by providing supplementary materials, exercises, and online resources. • Encourage learners to take ownership of their learning process and set language learning goals. | |

9. Teaching and Learning Strategies

| | |
|-----------------|--|
| Strategy | The teaching and learning strategies in the "New Headway Intermediate" series aim to create an engaging and effective learning experience for students, enabling them to develop their language skills in a communicative and interactive way. |
|-----------------|--|

10. Course Structure

| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
|------|-------|----------------------------|---|-----------------|-------------------|
| 1 | 2 | | Unit 4 – Doing the right things Modal verbs (1) | Theory | |
| 2 | 2 | | Unit 4 – Doing the right things Modal verbs (1) | Theory | |
| 3 | 2 | | Unit 4 – Doing the right things Requests and offers | Theory | |
| 4 | 2 | | Unit 5 – On the move Future forms | Theory | |
| 5 | 2 | | Unit 5 – On the move Future forms | Theory | |

| | | | | | |
|----|---|--|---|--------|--|
| 6 | 2 | | Unit 5 – On the move Travelling around | Theory | |
| 7 | 2 | | Mid – exam | Theory | |
| 8 | 2 | | Unit 6 – Likes and dislikes Like | Theory | |
| 9 | 2 | | Unit 6 – Likes and dislikes Verb + -ing or infinitive? | Theory | |
| 10 | 2 | | Unit 6 – Likes and dislikes Verb + -ing or infinitive? | Theory | |
| 11 | 2 | | Unit 6 – Likes and dislikes Sign and soundbites | Theory | |
| 12 | 2 | | Review | Theory | |

| | | | | | |
|--|--|--|--|--|--|
| | | | | | |
| 11. Course Evaluation | | | | | |
| Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc | | | | | |
| 12. Learning and Teaching Resources | | | | | |
| Required textbooks (curricular books, if any) | | | | | |
| Main references (sources) | | | | | |
| Recommended books and references (scientific journals, reports...) | | | | | |
| Electronic References, Websites | | | | | |

| حضور | |
| ٦. عدد الساعات الدراسية (الكلية / عدد الوحدات) (الكلية) | |
| 5 / 3 | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم: ا.م.د. امير فريد بورتو البكري البريد الإلكتروني: amir.albakri@uobabylon.edu.iq | |
| ٨. اهداف المقرر | |
| <p>اهداف المادة الدراسية</p> <p>يهدف هذا البرنامج إلى إثراء مهاراتك في حل المشكلات لمواجهة التحديات القادمة ضمن تطبيق الفيزياء الطبية في مجال الهندسة الطبية الحيوية.</p> <p>ستمكنك الوحدة من فهم مبادئ الفيزياء التي يقوم عليها إنشاء - الصور الطبية المستخدمة على نطاق واسع من قبل المتخصصين في مجال الصحة والاستشاريين الطبيين في قطاع الرعاية إن تنفيذ هذه الوحدة في المستوى 3 ستمكنك من أن - الصحية تصبح ماهراً في تطبيق هذه المفاهيم الأساسية بشكل أكثر في معالجة الصور الطبية وتحسينها باستخدام الخوارزميات الرقمية والحاسوبية التي سيتم تسليمها كجزء من وحدة معالجة الصور الطبية في المستوى 5</p> <p>تم تصميم هذه الوحدة وتطويرها بعناية لتتيح لك تعزيز معرفتك السليمة في الفيزياء الطبية ومبادئها وتطبيقاتها وبالتالي إعداد نفسك لدور تقني أو بحثي أو تطوري ضمن الفيزياء الطبية أو أنظمة التصوير.</p> | |
| ٩. استراتيجيات التعليم والتعلم | |
| <p>الاستراتيجية</p> <p>ستشارك أي وقتاً في مناقشات الفصول الدراسية والمجموعات. في هذه الوحدة سوف تحضر المحاضرات والندوات ويتم دعم كل من هذه الأنشطة من خلال الدراسة الذاتية الموجهة قبل الجلسة وبعدها، مثل الاختبارات. الصغيرة تعمل هذه الوحدة على تطوير فهمك للتصوير الطبي (نظام الأشعة السينية، الماسح الضوئي، القصيرة أو الواجبات المقطعي، ونظام التصوير بالرنين المغناطيسي) في الهندسة الطبية الحيوية وسوف تستخدم مثلثة على كيفية تطبيق الفيزياء على تكوين الصورة في مجموعة متنوعة من الطرائق</p> | |

| ١٠. بنية المقرر | | | | | |
|-----------------|------------------------------|---|--|--------------|--|
| الأسبوع | الساعات | مخرجات التعلم المطلوبة | اسم الوحدة او الموضوع | طريقة التعلم | طريقة التقييم |
| 16 | نظري ٢ عملي ٢ تمارين ١ | تطوير المعلومات النظرية و المهارات العملية | اجهزة الشعبة - اجهزة المفراس - اجهزة الرنين | نظري و عملي | امتحانات شهرية امتحانات يوية امتحانات عملي امتحان نهائي |

| ١١. تقييم المقرر | |
|--|---|
| توزيع الدرجة من 011 على وفق المهام المكلف بها الطالب مثل التحضير اليومي والامتحانات اليومية والشفوية والشهرية والحريرية والتقارير ... الخ | |
| ١٢. مصادر التعلم والتدريس | |
| | الكتب المقررة المطلوبة (المنهجية أن وجدت) |
| | المراجع الرئيسية (المصادر) |
| | الكتب والمراجع الساندة التي يوصى بها (المجلات العلمية، التقارير) |
| | المراجع الإلكترونية ، مواقع الانترنت |

| ٥. أشكال الحضور المتاحة | |
| حضور | |
| ٦. عدد الساعات الدراسية (الكلية / عدد الوحدات) (الكلية) | |
| 5 / 3 | |
| / اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم: ا.م.د. امير فريد بروتو البكري البريد الإلكتروني: amir.albakri@uobabylon.edu.iq | |
| ٨. اهداف المقرر | |
| اهداف المادة الدراسية | يهدف هذا البرنامج إلى إثراء مهاراتك في حل المشكلات لمواجهة التحديات القادمة ضمن تطبيق الفيزياء الطبية في مجال الهندسة الطبية الحيوية وحدة من فهم مبادئ الفيزياء التي يقوم عليها توليد الإشارات الطبية المستخدمة على نطاق واسع من قبل المتخصصين في مجال الصحة والاستشاريين الطبيين في قطاع الرعاية الصحية إن تنفيذ هذه الوحدة في المستوى 4 سيمكنك من أن تصبح ماهراً في تطبيق هذه المفاهيم الأساسية بشكل أكبر في معالجة وتعزيز الإشارات الطبية باستخدام الخوارزميات الرقمية والحاسوبية التي سيتم تسليمها كجزء من وحدة معالجة الإشارات الطبية في المستوى 5 تم تصميم هذه الوحدة وتطويرها بعناية لتتيح لك تعزيز معرفتك السليمة في الفيزياء الطبية ومبادئها وتطبيقاتها وبالتالي إعداد نفسك لدور تقني أو بحثي أو تطوري ضمن الفيزياء الطبية أو أنظمة الإشارات الطبية الحيوية |
| ٩. استراتيجيات التعليم والتعلم | |
| الاستراتيجية | تشارك أي ضل في مناقشات الفصول الدراسية والمجموعات. في هذه الوحدة سوف تحضر المحاضرات والندوات ويتم دعم كل من هذه الأنشطة من خلال الدراسة الذاتية الموجهة قبل الجلسة وبعدها، مثل الاختبارات. الصغيرة في الهندسة (EEG)، (ECG، EMG) تعمل هذه الوحدة على تطوير فهمك للإشارات الطبية. القصيرة أو الواجبات. الطبية الحيوية وستستخدم أمثلة على كيفية تطبيق فيزياء على تكوين الإشارات في مجموعة متنوعة من الطرائق |

| ١٠. بنية المقرر | | | | | |

Course Description Form

| 1. Course Name: | | | | | |
|--|--|---------------------------------------|------------------------------|---------------------|--|
| Biomaterials II | | | | | |
| 2. Course Code: | | | | | |
| MDER421 | | | | | |
| 3. Semester / Year: | | | | | |
| Second semester/ Fourth year | | | | | |
| 4. Description Preparation Date: | | | | | |
| 4/4/2024 | | | | | |
| 5. Available Attendance Forms: In class | | | | | |
| | | | | | |
| 6. Number of Credit Hours (Total) / Number of Units (Total): | | | | | |
| 2 / 2 | | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | | |
| Name: Sura Baha Email: | | | | | |
| 8. Course Objectives | | | | | |
| Course Objectives | <ol style="list-style-type: none"> 1. To understand of Biomaterials. 2. This course deals with the History of Biomaterials. 3. This is the basic subject Fields of Knowledge to Develop Biomaterials. 4. To understand Selection of Biomedical Materials. <p>To perform Properties of Biomaterials. </p> | | | | |
| 9. Teaching and Learning Strategies | | | | | |
| Strategy | <p>In this module you will be attending lectures and seminars. You will also participate in classroom and small group discussions. Each of these activities is supported by pre and post-session, directed self-study such as quizzes or assignments. This module develops your understanding biomaterial in biomedical fields .</p> | | | | |
| 10. Course Structure | | | | | |
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |
| 1 | Th. 2 | Theoretical and Practical experiences | Introduction to Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|---|-------|---------------------------------------|---|---------------------|--|
| 2 | Th. 2 | Theoretical and Practical experiences | Biocompatibility and Biological Interactions | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 3 | Th. 2 | Theoretical and Practical experiences | Physical and Chemical Characterization | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 4 | Th. 2 | Theoretical and Practical experiences | Mechanical Characterization, Biological Tests of Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 5 | Th. 2 | Theoretical and Practical experiences | Metals and Alloys Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 6 | Th. 2 | Theoretical and Practical experiences | Ceramic Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 7 | Th. 2 | Theoretical and Practical experiences | Polymer and Composites Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 8 | Th. 2 | Theoretical and Practical experiences | Orthopedics and Dental Applications of Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-------|---------------------------------------|---|---------------------|--|
| 9 | Th. 2 | Theoretical and Practical experiences | Mid. Exam + Neural Application of Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 10 | Th. 2 | Theoretical and Practical experiences | Biomaterials in Drug Delivery System | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 11 | Th. 2 | Theoretical and Practical experiences | Biomaterials in Tissue Engineering | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 12 | Th. 2 | Theoretical and Practical experiences | Hydrogels and Injectable Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 13 | Th. 2 | Theoretical and Practical experiences | Ethics and Regularity Consideration | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 14 | Th. 2 | Theoretical and Practical experiences | Emerging Trends in Biomaterial for Biomedical Engineering | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 15 | Th. 2 | Theoretical and Practical experiences | Smart Biomaterials | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-------|---------------------------------------|--|---------------------|--|
| 16 | Th. 2 | Theoretical and Practical experiences | Preparatory week before the final Exam | Theory and practice | Test, Laboratory, Quizzes and final exam |

| <p>اهداف المادة الدراسية</p> <ul style="list-style-type: none"> • تعريف الطالب على الشارة وتحليلها في أكثر من مجال • تعريف الطالب الى الجزء الساسية لنظام التصالت • معوقات إرسال الشارة • تعريف الطالب على مبدأ التضمنين والغاية منه وأنواع التضمنين • أسباب التحول بالعمل من النظام التماثلي الى النظام الرقمي • تعريف الطالب على مصادر الضوضاء في عناصر الدائرة الكهربائية | |
| ٩. استراتيجيات التعليم والتعلم | |
| <p>الاستراتيجية</p> <p>الاستراتيجية الساسية في تطبيق هذا المنهاج هو عرض المادة بشكل محاضرة , وتشجيع الطالب على حل التمارين والجابة على الأسئلة المهمة . بالإضافة الى تحفيز الطالب على المشاركة الفعالة في أداء الواجبات البيئية و تنفيذ البرامج لعملية على المتالب . كذلك توضيح المادة من خلال تجارب مختبرية ذات صلة بالمادة.</p> | |

| ١٠. بنية المقرر | | | | | |
|-----------------|---------|--|---|-----------------------|-------------------|
| الأسبوع | الساعات | مخرجات التعلم المطلوبة | اسم الوحدة او الموضوع | ريقة التعلم | امتحان وواجب بيئي |
| 1 | 3 | تقديم الطالب الى الشارات وطرق تمثيلها | مقدمة, انواع الشارة , تمثيل الشارة الشكل التخطيطي لنظام التصالات | محاضرة ومناقشة | امتحان وواجب بيئي |
| 2 | 3 | قدرة الطالب على تحليل الشارات الدورية وغير الدورية | سلسلة وتحويل فورير | محاضرة وامتحان | امتحان وواجب بيئي |
| 3 | 3 | فهم الخواص المهمة للفورير | خواص تحويل فورير , ومعكوس تحويل فورير وتطبيقاتها | محاضرة وامتحان | امتحان وواجب بيئي |
| 4 | 3 | شرح مبدأ كثافة طيف الطاقة وطيف القدرة وخواصهما | كثافة طيف الطاقة وكثافة طيف القدرة | محاضرة ومناقشة | امتحان وواجب بيئي |
| 5 | 3 | شرح مبدا الشارة baseband و passband | التضمين وأرسال ال baseband وال passband | محاضرة ومناقشة | امتحان وواجب بيئي |
| 6 | 3 | تعريف الطالب على التضمين السعوي وخواصه | التضمين السعوي وخواصه والطيف الترددي له | محاضرة وتجارب مختبرية | امتحان وواجب بيئي |
| 7 | 3 | فهم الطالب لدوائر التوليد والكشف عن الشارة | دوائر توليد وكشف اشارة التضمين السعوي والمقارة بين أنواع التضمين السعوي | محاضرة وتجارب مختبرية | امتحان وواجب بيئي |
| 8 | 3 | فهم الطالب لمبدأ التضمين الترددي وخواصه | التضمين السعوي وطيف التضمين السعوي | محاضرة وتجارب مختبرية | امتحان وواجب بيئي |
| 9 | 3 | فهم الطالب لشرح الشتقاق لحساب حزمة التردد والقدرة في التضمين الترددي | باله بيسيل , وأشتقاق معادلات حساب القدرة وحزمة التردد. | محاضرة وواجب بيئي | امتحان وواجب بيئي |
| 10 | 3 | تعليم الطالب لنظرية أخذ العينات من الشارة وإعادة توليد الشارة من العينات | نظرية العينات ومعدل نيكوست , وإعادة الشارة | محاضرة وواجب بيئي | امتحان وواجب بيئي |
| 11 | 3 | تعليم الطالب النواع وخواص التضمين النبضي | التضمين النبضي : التمين النظي السعوي والوقتي والموقعي . | محاضرة وواجب بيئي | امتحان وواجب بيئي |

| | | | | | |
|-------------------|-------------------|---|--|---|----|
| أمتحان وواجب بيئي | محاضرة وواجب بيئي | تضمن الجفرة النظرية , وعملية التكميم , لتكميم المنتظم , وحساب نسبة الإشارة الى لوضواء | الطالب اللي التحول نحو البيانات الرقمية بدل التماثلية وعملية التكميم | 3 | 12 |
| أمتحان وواجب بيئي | محاضرة وواجب بيئي | لتبليكس تقسيم الوقت وتقسيم الوقت | بيان طريقة إرسال المعلومات من خل تقسيم التردد أو تقسيم الوقت | 3 | 13 |
| أمتحان وواجب بيئي | محاضرة وواجب بيئي | لوضواء وأنواعه ومصادره. | التعرف على مصادر الوضواء | 3 | 14 |
| | | Assessment Exam | | | 15 |

١١. تقييم المقرر

تكون الدرجة كالتالي: 10% على الواجب, 30% امتحان منتصف الكورس, 10% درجة تنفيذ تجارب المختبر, 50% على الامتحان النهائي

١٢. مصادر التعلم والتدريس

Course Description Form

| | | | | |
|---|---|--------------------------|--|-------------------|
| 1. Course Name: | | | | |
| English Language VIII | | | | |
| 2. Course Code: | | | | |
| UREQ421 | | | | |
| 3. Semester / Year: | | | | |
| Second semester/ Fourth year | | | | |
| 4. Description Preparation Date: | | | | |
| 4/4/2024 | | | | |
| 5. Available Attendance Forms: In class | | | | |
| 6. Number of Credit Hours (Total) / Number of Units (Total): | | | | |
| 1 / 1 | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | |
| Name: Noor ahmed Email: | | | | |
| 8. Course Objectives | | | | |
| Course Objectives | <ul style="list-style-type: none"> 1- 1. To enable the students to communicate effectively and appropriately in real life situation. 2- 2. To use English effectively for study purpose across the curriculum; 3- 3. To develop interest in and appreciation of Literature; 4- 4. To develop and integrate the use of the four language skills i.e. Reading, Listening, Speaking and Writing; 5- 5. to revise and reinforce structure already learnt. 6- 6. Students will have the opportunity to consider aspects of current English language teaching theory and develop their awareness of how these theories translate to the classroom to influence teaching practice. | | | |
| 9. Teaching and Learning Strategies | | | | |
| Strategy | <p>Focus on academic language, literacy and vocabulary</p> <p>Link background knowledge and culture to learning</p> <p>Increase comprehensible input and language output</p> <p>Promote classroom interaction</p> | | | |
| 10. Course Structure | | | | |
| | Hours | Required Learning | | Evaluation |

| Week | | Outcomes | Unit or subject name | Learning method | method |
|------|-----------------|---------------------------------------|---|---------------------|--|
| 1 | Th. 1 Tut. 1 | Theoretical and Practical experiences | The tense system: auxiliary verbs, modal auxiliary verbs, full verbs. English tense usage: time, the simplest aspect, the continuous aspect, the perfect aspect, active and passive. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 2 | Th. 1 Tut. 1 | Theoretical and Practical experiences | The present perfect: Present perfect simple and continuous (unfinished past, present result, indefinite past). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 3 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Narrative tenses: past simple, past perfect, past continuous, present perfect, time clauses). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 4 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Questions: question forms, asking for descriptions, indirect questions. Negatives: forming negatives, negative questions. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 5 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Listening and speaking: listen to syllabus subjects-related tapes, and discussing presentation given by students. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 6 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Future forms: will and going to for (prediction, intentions, and decisions), present continuous for arrangements, present simple for timetable, future continuous, | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-----------------|---|--|------------------------|---|
| 7 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Expressing quantity: meaning, usage of all quantifiers with different examples. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 8 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Everyday English, social expressions, hot verbs (make and do), formal language and informal language. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 9 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Mid-term Exam + Discussing answers of mid-term exam. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 10 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Modal <u>auxiliary</u> verbs: uses of modal auxiliary verbs for (probability, present, future, ability, advice, obligation, permission, willingness, and refusal) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 11 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Relative clauses: defining relative clauses, non-defining relative clauses. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 12 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Expressing habit: as present simple, present continuous | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 13 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Reading and speaking skills: reading exercises, discussing presentation given by students | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-----------------|---|--|------------------------|---|
| 14 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Hypothesizing: first and second conditional, third conditional, other structures of hypothesis. | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 15 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Determiners: each and every, enough, articles (a/an, the, zero article). | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 16 | Th. 1 Tut. 1 | Theoretical and Practical experiences | Preparatory week before the final Exam | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|---|--|--|--|--|--|
| | | | | | |
| 11. Course Evaluation | | | | | |
| Exam ,quiz ,report | | | | | |
| 12. Learning and Teaching Resources | | | | | |
| Required textbooks (curricular books, if any) | | | | | |
| Main references (sources) | | | | | |
| Recommended books and references (scientific journals, reports...) | | | | | |
| Electronic References, Websites | | | | | |

Course Description Form

| | | | | | |
|--|--|-----------------------------------|-----------------------------|------------------------|--------------------------|
| 1. Course Name: | | | | | |
| Therapeutic Instrumentation | | | | | |
| 2. Course Code: | | | | | |
| MDER424 | | | | | |
| 3. Semester / Year: | | | | | |
| Second semester/ Fourth year | | | | | |
| 4. Description Preparation Date: | | | | | |
| 4/4/2024 | | | | | |
| 5. Available Attendance Forms: In class | | | | | |
| | | | | | |
| 6. Number of Credit Hours (Total) / Number of Units (Total): | | | | | |
| 4 / 3 | | | | | |
| 7. Course administrator's name (mention all, if more than one name) | | | | | |
| Name: Sura Baha Email: | | | | | |
| 8. Course Objectives | | | | | |
| Course Objectives | <ol style="list-style-type: none"> 1. To develop problem-solving skills and an understanding of Therapeutic Instrumentation through the application of techniques. 2. To understand how to deal with medical device malfunctions. 3. To understand how to calibrate medical devices. 4. To develop the student skills to develop the medical system to fit the work with the vital variables of the human body. 5. To understand how biosignals are processed. 6. To understand the types of medical devices required to treat human body problems. | | | | |
| 9. Teaching and Learning Strategies | | | | | |
| Strategy | The main strategy that will be adopted in delivering this module is to encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials, and by considering types of simple experiments involving some sampling activities that are interesting to the students. | | | | |
| 10. Course Structure | | | | | |
| Week | Hours | Required Learning Outcomes | Unit or subject name | Learning method | Evaluation method |

| | | | | | |
|---|-------|---------------------------------------|--|---------------------|--|
| 1 | Th. 2 | Theoretical and Practical experiences | Introduction – what is the Therapeutic Instrumentation | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 2 | Th. 2 | Theoretical and Practical experiences | Sensors and transducers | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 3 | Th. 2 | Theoretical and Practical experiences | Pacemakers (types, working, anatomy of circuit, problems, and development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 4 | Th. 2 | Theoretical and Practical experiences | Defibrillators (types, working, anatomy of circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 5 | Th. 2 | Theoretical and Practical experiences | Lithotripsy (types, working, anatomy of the circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 6 | Th. 2 | Theoretical and Practical experiences | Anesthesia machine (types, working, anatomy of the circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 7 | Th. 2 | Theoretical and Practical experiences | Ventilators (types, working, anatomy of circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-------|---------------------------------------|--|---------------------|--|
| 8 | Th. 2 | Theoretical and Practical experiences | Hemodialysis (types, working, anatomy of circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 9 | Th. 2 | Theoretical and Practical experiences | Wax Bath Devices, Infrared (IR), Ultraviolet (UV), and Ultrasonic Therapeutic devices (types, working, anatomy of the circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 10 | Th. 2 | Theoretical and Practical experiences | Microwaves and Short Waves Devices, Electrotherapy, Electrical Stimulation for Pain Relief (types, working, anatomy of the circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 11 | Th. 2 | Theoretical and Practical experiences | Med term Exam and solving the problem and practical | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 12 | Th. 2 | Theoretical and Practical experiences | Tooth Chair (Dental Unit) (types, working, anatomy of circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 13 | Th. 2 | Theoretical and Practical experiences | Cardioversion, Cardio tachometer (types, working, anatomy of the circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 14 | Th. 2 | Theoretical and Practical experiences | Pressure-Volume-Flow Diagrams, Medical Gases, Oxygen Therapy (types, working, anatomy of the circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|----|-------|---------------------------------------|---|---------------------|--|
| 15 | Th. 2 | Theoretical and Practical experiences | Physiotherapy Devices (types, working, anatomy of the circuit, problems, development) | Theory and practice | Test, Laboratory, Quizzes and final exam |
| 16 | Th. 2 | Theoretical and Practical experiences | The preparatory week before the Final Exam | Theory and practice | Test, Laboratory, Quizzes and final exam |

| | | | | | |
|--|--|--|--|--|--|
| | | | | | |
| 11. Course Evaluation | | | | | |
| Exam ,quiz ,report ,final exam | | | | | |
| 12. Learning and Teaching Resources | | | | | |
| Required textbooks (curricular books, if any) | | | | | |
| Main references (sources) | | | | | |
| Recommended books and references (scientific journals, reports...) | | | | | |
| Electronic References, Websites | | | | | |

نموذج وصف المقرر

| | |
|---|--|
| ١. اسم المقرر | |
| الميكانيك التحليلي | |
| ٢. رمز المقرر | |
| BMER423 | |
| ٣. الفصل / السنة | |
| الفصل الدراسي الثاني / المرحلة الرابعة | |
| ٤. تاريخ إعداد هذا الوصف | |
| 2024/04/10 | |
| ٥. أشكال الحضور المتاحة | |
| حضور | |
| ٦. عدد الساعات الدراسية (الكلية/ عدد الوحدات) (الكلية) | |
| 30 ساعة في الفصل/ ساعتين كل محاضرة | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم: د. فواز فريد بورت و الأيمل fawaz.al-bakri@uobabylon.edu.iq : | |
| ٨. اهداف المقرر | |
| اهداف المادة الدراسية | • نطق المشكالت القابلة للحل من خلال تطوير تقنيات قياسية مع نطاق واسع من قابلية التطبيق في اختصاص الطب الحياتي • فهم البنية الرياضية للميكانيك الهندسي. |
| ٩. استراتيجيات التعليم والتعلم | |
| الاستراتيجية | • سوف يكتسب الطالب المعرفة الأساسية لدراسة الأنظمة الميكانيكية مع إيلاء اهتمام خاص لحركات وديناميكيات الأجسام الصلبة. • سوف يتعلم الطالب الأدوات الرياضية، مثل النظريات والخوارزميات، التي تسمح له بمواجهة مشاكل حقيقية في الرياضيات التطبيقية والفيزياء والمعلوماتية والعديد من المجالات الأخرى. باستخدام هذه الأدوات الرياضية، يكتسب الطالب قدرات جديدة لحل المشكالت النظرية والتطبيقية المعقدة. • سوف يكون الطالب قادر على تحليل وفهم انواع الهزازات ذات الحركة الواحدة والحركتين باثئر القوى او من دونها. • في نهاية الكورس سيكون الطالب قادراً على الحصول على تقنيات رياضية جديدة للمعرفة والفهم لمواجهة جميع الروابط المحتملة، عالوة على ذلك، إذا كان ذلك ممكناً، فسوف يقترح مشاكل جديدة غير معالجة |

| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم: ا.م.د. امير فريد بركتو البكري البريد الإلكتروني: amir.albakri@uobabylon.edu.iq | |
| ٨. اهداف المقرر | |
| اهداف المادة الدراسية | يهدف هذا البرنامج إلى إثراء مهاراتك في حل المشكلات لمواجهة التحديات القادمة ضمن تطبيق الفيزياء الطبية في مجال الهندسة الطبية الحيوية. تتمكّنك هذه الوحدة من فهم مبادئ الفيزياء التي يقوم عليها إنشاء أدوات التشخيص الطبي المستخدمة على نطاق واسع من قبل المتخصصين في مجال الصحة المتحالفة والمستشارين الطبيين في قطاع الرعاية الصحية. إن تنفيذ هذه الوحدة في المستوى 5 سيمكنك من أن تصبح ماهراً في مواصلة تطبيق هذه المفاهيم الأساسية في معالجة الصور الطبية وتحسينها باستخدام الخوارزميات الرقمية والحاسوبية التي سيتم تسليمها كجزء من وحدة معالجة الصور الطبية في المستوى 5. تم تصميم هذه الوحدة وتطويرها بعناية لتتيح لك تعزيز معرفتك السليمة في الفيزياء الطبية ومبادئها وتطبيقاتها وبالتالي إعداد نفسك لدور تقني أو بحثي أو تطوري ضمن الفيزياء الطبية أو أنظمة الصور الطبية الحيوية .. |
| ٩. استراتيجيات التعليم والتعلم | |

| |
|--|
| <p>الاستراتيجية</p> <p>ستشارك أي جُدا في مناقشات الفصول الدراسية والمجموعات. في هذه الوحدة سوف تحضر المحاضرات والندوات ويتم دعم كل من هذه الأنشطة من خلال الدراسة الذاتية الموجهة قبل الجلسة وبعدها، مثل الاختبارات. الصغيرة تعمل هذه الوحدة على تطوير فهمك للتصوير المريكي في لهندسة الطبية الحيوية وستستخدم. القصيرة أو الواجبات. أمثلة على كيفية تطبيق الفيزياء على تكوين الصورة في مجموعة متنوعة من الأساليب</p> |
|--|

Introduction to artificial neural systems, J. M. Zurada, West Publishing Co. (1992).

Fundamentals of neural networks: architectures, algorithms and applications, L. V. Fausett, Pearson Education India, (2006).

نموذج وصف المقرر

| | |
|--|--|
| ١. اسم المقرر | |
| شبكات الحاسوب | |
| ٢. رمز المقرر | |
| MDER523 | |
| ٣. الفصل / السنة | |
| فصل الثاني / المرحلة الخامسة | |
| ٤. تاريخ إعداد هذا الوصف | |
| 2024/4/6 | |
| ٥. أشكال الحضور المتاحة | |
| حضور | |
| ٦. عدد الساعات الدراسية (الكلية) / عدد الوحدات (الكلية) | |
| 2 ساعة / 2 وحدة | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | |
| الاسم : عالء عمران المطيري البريد الإلكتروني : al_al_44@uobabylon.edu.iq | |
| ٨. أهداف المقرر | |
| <p>أهداف المادة الدراسية</p> <p>- التعرف على أساسيات شبكات الحاسوب وأهميتها في حوسبة الحديثة.</p> <p>تكتشاف أنواع مختلفة من الشبكات وطبولوجيا الشبكة. 3- تعريف الطالب نموذج OSI وطبقاته وفهم وظائف ومسؤوليات كل طبقة OSI. 4-</p> <p>تعرف على عناوين IPv4، بما في ذلك بنية عناوين II والشبكات الفرعية.</p> <p>فهم وظائف وأدوار الأجهزة المختلفة في شبكة الكمبيوتر. 6- السكتشاف عملية تسليم الحزم وإعادة توجيهها في شبكة قائمة على بروتوكول الإنترنت. 7- فهم عرض وتشغيل بروتوكول تحليل العناوين (ARP). 8- التعرف بعنونة IPv6 مازياها مقارنة بـ IPv4. فهم الآثار العملية للتشاور الموجات في تصميم شبكات لاسلكية</p> | |

٩. استراتيجيات التعليم والتعلم

| | |
|---|----------------------------|
| <p>يتم عرض المادة بشكل نظري ومن ثم يكلف الطالب بعمل واجبات منزلية. يُنقل المحاضرات شرح طريقة عمل الشبكات بشكل عملي على برنامج packettracer أيضا يكلف الطلبة بعمل سمونات لبعض المواد وعرضها اما الطلبة .</p> | <p>الاستراتيجية</p> |
|---|----------------------------|

١٠. بنية المقرر

| الأسبوع | الساعات | مخرجات التعلم المطلوبة | اسم الوحدة او الموضوع | ريقة التعلم | طريقة التقييم |
|---------|---------|--|---|--------------|----------------------------|
| 1 | 2 | المفاهيم الأساسية لشبكات الكمبيوتر | Introduction to computer networks. | حضور في الصف | امتحان يومي أسئلة شفوية |
| 2 | 2 | أنواع الشبكات (LAN، WAN، MAN)، طبولوجيا الشبكة (الحافلة، النجمة، الشبكة، الحلقة)، بروتوكولات ومعايير الشبكة، نماذج خادم العميل مقابل نماذج نظير إلى نظير | OSI computer network reference model – Part 1. | حضور في الصف | امتحان يومي أسئلة شفوية |
| 3 | 2 | نموذج OSI وطبقاته | OSI computer network reference model – Part 2. | حضور في الصف | امتحان يومي أسئلة شفوية |
| 4 | 2 | نموذج TCP/IP وطبقاته | TCP/IP (Internet) computer network reference model. | حضور في الصف | امتحان يومي أسئلة شفوية |
| 5 | 2 | عنوان IPv4 والشبكات الفرعية، فئة ذات الفئات وغير الفئات، أقتعة الشبكة الفرعية وحسابات الشبكة الفرعية | Network Layer , IPV4 addresses (Classful addressing). | حضور في الصف | امتحان يومي أسئلة شفوية |
| 6 | 2 | عنوان IPv4 والشبكات الفرعية، العنوان ذات الفئات وغير الفئات، أقتعة الشبكة الفرعية وحسابات الشبكة الفرعية | Network Layer , IPV4 addresses (Classless addressing). | حضور في الصف | امتحان يومي أسئلة شفوية |
| 7 | 2 | عنوان الشبكة (NAT) والعنوان الخاصة، نظرة عامة على أجهزة الشبكة: المحاولات، وأجهزة التوجيه، وجد ارن الحماية، والمحوار | Computer Network Devices. | حضور في الصف | امتحان يومي أسئلة شفوية |

| | | | | | |
|----------------------------|--------------|---|--|---|----|
| امتحان يومي أسئلة شفوية | حضور في الصف | Delivery and Forwarding of IP Packets. | فهم طريق توجيه الحزم داخل الشبكات | 2 | 8 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Address Resolution Protocol (ARP). | فهم بروتوكول ARP | 2 | 9 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Network Layer , IPV6 addresses. | وعنونة IPv6 البنية والأنواع | 2 | 10 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Free Space Wave Propagation – Friis Equation. | بوضوح انتقال الموجات وكذلك فهم معادلة فرس | 2 | 11 |
| | | Midterm Exam | | 2 | 12 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Wave Propagation – Related Power to Electrical field. | التعرف على طريق حساب البور عند المستلم | 2 | 13 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Ground Reflection and diffraction Part-1 | فهم تأثير الموجات الراديوية بعد انعكاسها عن الرض | 2 | 14 |
| امتحان يومي أسئلة شفوية | حضور في الصف | Ground Reflection and diffraction Part-2 | محاضرة تطبيقية | 2 | 15 |

| | |
|---|---|
| ١١. تقييم المقرر | |
| امتحان الند (30%) + الكوز اليومي مع السمنر (5%) + الحضور والمشاركة (5%) | |
| ١٢. مصادر التعلم والتدريس | |
| | الكتب المقررة المطلوبة (المنهجية أن وجدت) |
| Data and Computer Communications, Eighth Edition, William Stallings 2007 | المراجع الرئيسية (المصادر) |
| | الكتب والمراجع الساندة التي يوصى بها (المجلات العلمية، التقارير....) |
| | المراجع الإلكترونية ، مواقع الانترنت |

نموذج وصف المقرر

| | | | |
|--|---------|--|-----------------------|
| ١. اسم المقرر | | | |
| النشأرت و النظمة | | | |
| ٢. رمز المقرر | | | |
| MDER520 | | | |
| ٣. الفصل / السنة | | | |
| الفصل الثاني / المرحلة الخامسة | | | |
| ٤. تاريخ إعداد هذا الوصف | | | |
| 4/4/2024 | | | |
| ٥. أشكال الحضور المتاحة | | | |
| حضورى | | | |
| ٦. عدد الساعات الدراسية (الكلية / عدد الوحدات) (الكلية) | | | |
| 3 / 2 | | | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | | | |
| الاسم: ا.م.د. امير فريد بارتو البكري البريد الإلكتروني: amir.albakri@uobabylon.edu.iq | | | |
| ٨. اهداف المقرر | | | |
| اهداف المادة الدراسية | | <p>رياضي لمحتوى تردد الإشارة مع إشارة. خاصة إلى سلسلة فورييه وتحويل فورييه</p> <p>اشرح الأساس الرياضي للاستجابة الترددية لنظام خطي ثابت مع الزمن، أو وقت تناظري أو منفصل</p> <p>مادج رياضية وتحليل استجابة النظمة الخطية. الثبنة مع الزمن، والزمن التناظري أو المنفصل</p> <p>حل المعادالت التفاضلية العادية والفرقية الخطية ذات المعامل الثابت بشكل فعال</p> <p>..</p> | |
| ٩. استراتيجيات التعليم والتعلم | | | |
| الاستراتيجية | | <p>يتم بمتشارك أي صلا في مناقشات الفصول الدراسية والمجموعات الصغيرة. في هذه الوحدة سوف تحضر المحاضرات. بدعم كل من هذه الأنشطة من خلال الدراسة الذاتية الموجهة قبل الجلسة وبعدها، مثل الاختبارات القصيرة أو الواجبات تعمل هذه الوحدة على تطوير فهمك لمعالجة الإشارات الطبية الحيوية في الهندسة الطبية الحيوية وستستخدم أمثلة على كيفية تطبيق الفيزياء على تكوين الإشارات في مجموعة متنوعة من الأساليب</p> | |
| ١٠. بنية المقرر | | | |
| الأسبوع | الساعات | مخرجات التعلم المطلوبة | اسم الوحدة او الموضوع |
| | | | طريقة التقييم |

| | | | | | |
|--|------|------------------|---|--------------------|----|
| امتحانات شهرية امتحانات يومية امتحان نهائي | نظري | الشارات و النظمة | تطوير المعلومات النظرية و المهارات العملية | نظري ٢ تمارين ١ | 16 |
|--|------|------------------|---|--------------------|----|

| | |
|---|--|
| ١١. تقييم المقرر | |
| توزيع الدرجة من 011 على وفق المهام المكلف بها الطالب مثل التحضير اليومي والامتحانات اليومية والشفوية والشهرية والحريرية والتقارير الخ | |
| ١٢. مصادر التعلم والتدريس | |

| | |

| | الكتب المقررة المطلوبة (المنهجية أن وجدت) |
| | المراجع الرئيسية (المصادر) |
| | الكتب والمراجع الساندة التي يوصى بها (المجلات العلمية، التقارير) |
| | المراجع الإلكترونية ، مواقع الانترنت |

نموذج وصف المقرر

| | | | | | |
|--|--|------------------------|-----------------------|--------------|---------------|
| ١. اسم المقرر | | | | | |
| Control 2 | | | | | |
| ٢. رمز المقرر | | | | | |
| ٣. الفصل / السنة | | | | | |
| الول / 2024-2023 | | | | | |
| ٤. تاريخ إعداد هذا الوصف | | | | | |
| ٥. أشكال الحضور المتاحة داخل الجامعة | | | | | |
| ٦. (عدد الساعات الدراسية الكلي) / (عدد الوحدات الكلي) | | | | | |
| 75 ساعة / 3 وحدات | | | | | |
| ٧. اسم مسؤول المقرر الدراسي (إذا أكثر من اسم يذكر) | | | | | |
| الاسم: أ.م.د. حيدر مهدي عبد الرضا اليميل : drenghaider@uobabylon.edu.iq | | | | | |
| ٨. اهداف المقرر | | | | | |
| اهداف المادة الدراسية | To provide the fundamental knowledge of control system engineering and the concept of mathematical modeling of the physical system. • The subject gives various classical analysis tools for design and stability of system in time and frequency domain • | | | | |
| ٩. استراتيجيات التعليم والتعلم | | | | | |
| الاستراتيجية | 1- إستراتيجية التفكير حسب قدرة الطالب (مثال : إذا استطاع الطالب أن يتعلم مفهوم الدارة الصحيح يكتسب مهارة إدارة وتنظيم حياته الشخصية) 2- إستراتيجية مهارة التفكير العالية(مثال اذا كان الطالب يرغب في اتخاذ قرار جيد، من يفكر جيدا قبل أن يتخذ القرار و إذا قرر دون تفكير أو إذا كان ال يستطيع التفكير جيدا أو إذا كان ال يستطيع أن يقرر ربما لن يقرر فهذا يعني ليس لديه مهارة التفكير العالية) 3- إستراتيجية التفكير الناقد في التعلم (Thanking Critical) هي مصطلح يرمز إلى مستويات التفكير والتي يهدف إلى طرح مشكلة ما ثم تحليلها منطقياً للوصول إلى الحل المطلوب | | | | |
| ١٠. بنية المقرر | | | | | |

|--|--------------------------------|------------|---|---|------------------------|
| امتحان السعي امتحان فصلي تقييم اداء نشاط لطالب في المحاضرة واجبات بيئية | لقاء المحاضرات وحل التمارين | Control II | مبادئ نظرية وتطبيقات | 2 | 15- State Observers |
| ١١. تقييم المقرر | | | | | |
| توزيع الدرجة من 100 على وفق المهام المكلف بها الطالب مثل الحضور اليومي والامتحانات اليومية والشفهية والشهوية والحريرية والتقارير الخ | | | | | |
| ١٢. مصادر التعلم والتدريس | | | | | |
| | | | الكتب المقررة المطلوبة (المنهجية أن وجدت) | | |
| Discrete-Time Control Systems by K. OGATA | | | المراجع الرئيسية (المصادر) | | |
| | | | الكتب والمراجع الساندة التي يوصى بها (المجلات العلمية، التقارير) | | |
| | | | المراجع الإلكترونية ، مواقع الانترنت | | |
