12th INTERNATIONAL CONFERENCE on “STANDARDIZATION, PROTOTYPES AND QUALITY: A MEANS OF BALKAN COUNTRIES’ COLLABORATION”

Main Theme:

“PROTOTYPES – MODELS IN ARCHITECTURE FROM ANTIQUITY TO THE FUTURE”

October 22-24, 2015,
Kocaeli University İzmit, Kocaeli, Turkey.

Standardization in human activities has proved to be of great importance, in local as well as in international levels. The International Conferences within the scope of “Standardization, Prototypes and Quality: A means of Balkan Countries’ Collaboration” are organized by the Balkan Coordinating Committee (BCC) in a different Balkan Country each year.

The main target of these Conferences is that scientists present information from international knowledge and experience on Standardization topics, so that Balkan model standards' background is evaluated, reconsidered and enriched. At the International Conferences are invited scientists (Academics, specialists, executives etc) according to the Aristotelian meaning of the term “Science” that “knowledge being the one and only science”, of course under continuous consideration.

For this scope we exploit the experience of west European Illumination Era, when west European Scientists have harmonically collaborated, succeeded the “Scientific and Technological Revolution” which broke out the “Industrial Revolution” that changed the course of humanity’s development. The repetitive global crises and radical global changes in Technology and Science marked the last few decades, the end of the “Industrial Era” and the beginning of the Postindustrial one. Nowadays, the Information and Globalization Era we live, is characterized from new forms of work, new forms of thinking and new forms of society.

The 12th International Conference “Standardization, Prototypes and Quality: A means of Balkan Countries’ Collaboration”, embracing the entire range of the field within an international content and quality, it mainly focuses on the theme “Prototypes – Models in Architecture from Antiquity to the Future”.

12th conference of the series will be an additional step for the rational and comprehensive entrance of Balkans to the new Era. Furthermore a scientific and social environment will be formed, where Balkan people will harmonically collaborate promoting a development model for the rest of Europe.

Conference Chair Prof. Dr. Nevnihal Erdoğan
