Predicting Spam Emails Using Data Mining Techniques

Abstract

Email Spam has become a major problem nowadays, with Rapid growth of internet users, Email spams is also increasing. People are using them for illegal and unethical conducts, phishing and fraud. Sending malicious link through spam emails which can harm our system and can also seek in into a system. Creating a fake profile and email account is much easy for the spammers, they pretend like a genuine person in their spam emails. This project will identify those spam by using techniques of machine learning.
