

Extended detection and response

Abstract:

We hope you find this template useful! This one is set up to yield a 80X100cm (3x4') vertical poster.

We've put in the headings we usually see in these posters, you can copy and paste and change to your heart's content! We suggest you use black text against a light background so that it is easy to read. Background color can be changed in the design tab, background drop down menu.

The boxes around the text will automatically fit the text you type, and if you click on the text, you can use the little handles that appear to stretch or squeeze the text boxes to whatever size you want. If you need just a little more room for your type, change the line spacing to a multiple of .90 or even .85 in home >paragraph >line spacing. The type in your poster's text boxes should be at least 24 point.

The dotted lines through the center of the piece will not print, they are for alignment. You can move them around by clicking and holding them, and a little box will tell you where they are on the page. Use them to get your pictures or text boxes aligned together.

You can add a guideline by holding the control key down as you move one. It can also help to turn on Snap to Guides by right clicking the background and going to Grid and Guides. That will make images and text boxes "magnetically" snap to the guidelines.
