**Propose Algorithm for Select The Best Context for GLCM**

Supervised By Prof.Dr.Tawfiq A.Alasadi

Abstract : The use of Glcm for explain the structure of an image by obtain the element of textuare there are varity number of contexts which can used in Glcm . The proposed System consist of applying GLCM method to extract the textuare of the image , and apply a method for selecting the best of GLCM based on selecting the appropriate context which represented the more details of the textuar.
