Abstract

The project aims to develop the bank's banking system designated for card members to give you sufficient experience and security in managing financial matters. Through the challenges faced by traditional banking systems, the project is dedicated to improving the banking experience for users. The main goal is to create an easy-to-use platform for card members to access banking services easily and safely. Its purpose is to overcome the obstacles facing users, especially in remote banking areas or have limited mobility. And to provide smart management tools for users to monitor and track transactions and update account information. The project contributes to enhancing financial inclusion and enabling users to manage their financial affairs safely. The project contributes to enhancing financial inclusion and enabling users to manage, including the most important financial affairs, safely.
