Abstract

Exam Hall Seating Arrangement System is necessary for the college to simplify examination hall allocation and seating arrangement. It facilitates to access the examination information of a particular student in a particular class. To problem is distributing the students and ensuring that there is no cheating among the students in the exams, and helping the teachers to ensure that a good percentage of cheating does not occur. In addition to enable tutors for booking the exam halls for each subject without a conflict between the reservations, and the distribution so that the teachers can get a PDF for the students. Those who were distributed to the examination halls, and the PDF form contains boxes indicating the seats, and each seat contains the name of the student. The project aim to develop a website to distribute students to exam seats, avoid having people who take the same exam sit together in the same seat, ensure that there is no cheating in the exam at a good rate, and display a form that contains the name of each student and his or her seating location in the hall.
